Data Science and Simulation in Transportation Research Janssens, Davy, Yasar, Ansar-Ul-Haque, Knapen, Luk, 2013-12-31

Given its effective

techniques and theories from various sources and fields data science is playing a vital role in transportation research and the consequences of the inevitable switch to electronic vehicles This fundamental insight provides a step towards the solution of this important challenge Data Science and Simulation in Transportation Research highlights entirely new and detailed spatial temporal micro simulation methodologies for human mobility and the emerging dynamics of our society Bringing together novel ideas grounded in big data from various data mining and transportation science sources this book is an essential tool for professionals students and researchers in the fields of transportation research and data mining *Handbook of Spatial Analysis in the Social Sciences* Sergio J. Rey,Rachel S. Franklin,2022-11-18 Providing an authoritative assessment of the current landscape of spatial analysis in the social sciences this cutting edge Handbook covers the full range of standard and emerging methods across the social science domain areas in which these methods are typically applied Accessible and comprehensive it expertly answers the key questions regarding the dynamic intersection of spatial analysis and the social sciences Spatial Microsimulation for Rural Policy Analysis Cathal O'Donoghue,Dimitris Ballas,Graham Clarke,Stephen Hynes,Karyn Morrissey,2012-10-12 The aim of this book is to explore the challenges facing rural communities and economies and to demonstrate the potential of spatial microsimulation for policy and analysis in a rural context This is done by providing a comprehensive overview of a particular spatial microsimulation model called SMILE Simulation Model of the Irish Local Economy The model has been developed over a ten year period for applied policy analysis in Ireland which is seen as an ideal study area given its large percentage of population living in rural areas The book reviews the policy context and the state of the art in spatial microsimulation against which SMILE was developed describes in detail its model design and calibration and presents example of outputs showing what new information the model provides using a spatial matching process The second part of the book explores a series of rural issues or problems including the impacts of new or changing government or EU policies and examines the contribution that spatial microsimulation can provide in each area **Transportation Systems Analysis and Assessment** Stefano De Luca,Roberta Di Pace,Boban Djordjevic,2020-01-22 The transportation system is the backbone of any social and economic system and is also a very complex system in which users transport means technologies services and infrastructures have to cooperate with each other to achieve common and unique goals The aim of this book is to present a general overview on some of the main challenges that transportation planners and decision makers are faced with The book addresses different topics that range from user s behavior to travel demand simulation from supply chain to the railway infrastructure capacity from traffic safety issues to Life Cycle Assessment and to strategies to make the transportation system more sustainable **Transportation Systems Planning** Konstadinos G. Goulias,2002-12-26 Transportation engineering and transportation planning are two sides of the same coin aiming at the design of an efficient infrastructure and service to meet the growing needs for accessibility and mobility Many well designed transport systems that meet these needs are based on a solid understanding of human behavior Since transportation systems Data Mining
