some new information as well. The book's sections on behavior standards and working with gifted students are especially helpful as a parent and now as I work with my grandkids as they school at home. The advice on how to teach the various subjects of reading, writing, math, social studies, and computer skills is invaluable. I have greater confidence to help the kids learn at home regardless of whether they are primarily learning remotely or in a classroom. This book gives you the tools to enrich their learning. Sue Woods, Mediator, Facilitator, Consensus and Collaboration Program, CSUS BA 1975, Social Welfare, San Diego State University. I'm a grandparent and not homeschooling on a regular basis but I am often helping grandkids with schoolwork. So Home Schooling During COVID 19 and Beyond is helpful even for having a successful single lesson. The parts about mutual respect and working WITH your student are very useful. The book is well organized, easy to understand, and is full of specific routines for productive and rewarding homeschooling for teacher and student. Debbie taught my daughter Vinci in fourth grade and it was a wonderful year for her. She gained the necessary confidence to succeed academically in Debbie's class that propelled her lively mind and scholastic achievements to this day. Dawn Daro, mother of Vinci Daro, BA and secondary teaching credential, UC Berkeley, taught Junior High, Richmond Unified School District.

For parents new to teaching, as for anybody else, simple tools can help a lot. Deborah Nichols Poulos, Home Schooling During COVID 19 and Beyond, supplies them in a well organized format. For math, she gives you handy grids for adding, subtracting, multiplying, and dividing, plus simple tricks that aid intuition, such as the use of manipulative objects. To build up reading and spelling, she offers bonus devices for rewarding new learning without any mark downs for errors. For writing, try her tips on building sentences and paragraphs. Positive feedback, no tears. Even without covid, this book would have been timely. Peter and Lin Lindert, parents of Nick Lindert, one of Deborah's students. [How to Create and Use Rubrics for Formative Assessment and Grading](#), Susan M. Brookhart, 2013-01-11. What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right? Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: 1) criteria that relate to the learning, not the tasks that students are being asked to demonstrate; and 2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics, for example, general versus task specific, and analytic versus holistic, explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses common misconceptions about rubrics, important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful. How to use rubrics for formative assessment and grading, including standards based grading and report card grades. Intended for educators who are already

familiar with rubrics as well as those who are not this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources And it makes the case that rubrics when used appropriately can improve outcomes by helping teachers teach and helping students learn
