Constructing Interpersonality Enrique Lafuente-Millán, Rosa Lorés-Sanz, Pilar Mur-Dueñas, 2010-02-19 The view that academic discourse is by definition impersonal has long been superseded It seems unquestionable now that the interpersonal component of texts that is the ways in which the writers project themselves and their audience in the discourse is an essential factor determining the success of scholarly communication and has become a fundamental issue in the field of English for Academic Purposes EAP Interpersonality is the key issue around which the articles in this edited book focus on

The eighteen contributions included in this volume provide a wide exploratory view of the many academic genres in which interpersonalness is manifested and the various analytical approaches from which the textual manifestation of that interpersonalness can be studied. The varied origin of the contributors is also representative of the global interest that the issue of interpersonalness arouses in the field of academic discourse analysis at an international level. The present volume constitutes a highly valuable tool for applied linguists and discourse analysts with an interest in EAP as well as for students, instructors and language teachers interested in academic discourse. The book may also be of interest to other agents intervening in the research publication process such as translators, proofreaders, reviewers and editors.

Handbook of Writing for the Mathematical Sciences Nicholas J. Higham, 1998-08-01 Nick Higham follows up his successful HWMS volume with this much anticipated second edition.

Research Methods for Therapists Avril Drummond, Jo Campling, 2013-11-11 This book is aimed at beginners. If you are totally confused and dismayed at the prospect of undertaking a research project, read on. If you are an expert in research, this is not the book for you unless you merely wish to revise your existing knowledge. Above all, this book is intended as an outline and a guide. It does not provide a definitive recipe on how to conduct a research project. You will learn by your own studies which methods and techniques suit you best and how to modify ideas to meet your own requirements. NB: Therapist is referred to as she in the text for simplicity. Acknowledgements: I owe particular thanks to Dr Naomi Fraser Holland for her substantial contributions to the production of this book. My sincere thanks also go to Marion Walker, Dr John Gladman, Dr Nadina Lincoln, Dr Alison Hammond and Julia Nuthall for ideas, information and advice, and to Jane Greaves for her wonderful cartoons. I would also like to acknowledge the assistance of colleagues at the Stroke Research Unit, City Hospital, Nottingham, and at the Derby School of Occupational Therapy. I am grateful to Jo Campling for her support and guidance, and to the staff at Chapman Hall for all their assistance. Finally, special thanks to my husband, Dr Tim Daniel, for his encouragement and good humour.
