The Urban Fabric Of Crime And Fear

Vania Ceccato, Andrew Newton

The Urban Fabric Of Crime And Fear:

The Urban Fabric of Crime and Fear Vania Ceccato, 2012-06-21 How does the city's urban fabric relate to crime and fear and how is that fabric affected by crime and fear Does the urban environment affect one's decision to commit an offence Is there a victimisation related inequality within cities How do crime and fear interrelate to inequality and segregation in cities of developing countries What are the challenges to planning cities which are both safe and sustainable This book searches for answers to these questions in the nature of the city particularly in the social interactions that take place in urban space distinctively guided by different land uses and people's activities In other words the book deals with the urban fabric of crime and fear The novelty of the book is to place safety and security issues on the urban scale by 1 showing links between urban structure and crime and fear 2 illustrating how different disciplines deal with urban vulnerability to and fear of crime 3 including concrete examples of issues and challenges found in European and North American cities and without being too extensive also in cities of the Global South

Urban Transition Marita Wallhagen, Mathias Cehlin, 2023-12-20 This book assembles the latest knowledge linked to urban environments and urban socio-eco technological systems including urban energy transport material and ecosystems Urban environments and systems affect every person's life in many ways and can have negative impacts on the local and global environment They create value but sometimes with a high environmental cost from a lifecycle perspective Therefore scientists and global leaders call for an urban transition to create more urban environments and systems that are climate positive sustainable and healthy which is necessary for society to function within the planetary boundaries This is a great challenge Huge transformations and new ways of thinking regarding the design and co-existence of technical social and ecological systems are necessary to turn the present challenge into opportunities This book *Urban Transition Perspectives on Urban Systems and Environments* explores this challenge and several different topics related to possible probable or necessary urban transitions in the urban environment It assembles a variety of authors who present many aspects and the latest knowledge linked to urban transitions of the urban environment and urban socio-eco technological systems including urban energy transport building material and eco systems Furthermore the importance of urban systems and urban environments is seldom clearly linked to their impact on the environment and humans This book examines this gap the crucial issues relating to how urban systems influence the urban structure and how they can be formed and designed to become more sustainable It explores the link between the complex systems in cities the physicality of the built environment and the living environments for the people The book proposes a rich garden of ideas to provoke and develop current research debate and new forms of practice

positions with particular attention to what happens in the neighbouring fields of the arts and sciences *The Oxford Handbook of Environmental Criminology* Gerben J.N. Bruinsma, Shane D. Johnson, 2018-02-08 The study of how the environment local geography and physical locations influence crime has a long history that stretches across many research traditions These include the neighborhood effects approach developed in the 1920s the criminology of place and a newer approach that attends to the perception of crime in communities Aided by new technologies and improved data reporting in recent decades research in environmental criminology has developed rapidly within each of these approaches Yet research in the subfield remains fragmented and competing theories are rarely examined together The Oxford Handbook of Environmental Criminology takes a unique approach and synthesizes the contributions of existing methods to better integrate the subfield as a whole Gerben J N Bruinsma and Shane D Johnson have assembled a cast of top scholars to provide an in depth source for understanding how and why physical setting can influence the emergence of crime affect the environment and impact individual or group behavior The contributors address how changes in the environment global connectivity and technology provide more criminal opportunities and new ways of committing old crimes They also explore how crimes committed in countries with distinct cultural practices like China and West Africa might lead to different spatial patterns of crime This is a state of the art compendium on environmental criminology that reflects the diverse research and theory developed across the western world *Terrorism, Risk and the Global City* Jon Coaffee, 2016-03-16 First published in 2003 this account of the anti terrorist measures of London s financial district and the changes in urban security after 9 11 has been revised to take into account developments in counter terrorist security and management particularly after the terrorist attack in London on July 7th 2005 It makes a valuable addition to the current debate on terrorism and the new security challenges facing Western nations Drawing on the post 9 11 academic and policy literature on how terrorism is reshaping the contemporary city this book explores the changing nature of the terrorist threat against global cities in terms of tactics and targeting and the challenge of developing city wide managerial measures and strategies Also addressed is the way in which London is leading the way in developing best practice in counter terrorist design and management and how such practice is being internationalized *International Encyclopedia of Transportation* , 2021-05-13 In an increasingly globalised world despite reductions in costs and time transportation has become even more important as a facilitator of economic and human interaction this is reflected in technical advances in transportation systems increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts This has become particularly acute with the impact that Covid 19 has had on transportation across the world at local national and international levels Encyclopedia of Transportation Seven Volume Set containing almost 600 articles brings a cross cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering operations research economics geography and sociology in order to understand the changes taking place Emphasising the

interaction between these different aspects of research it offers new solutions to modern day problems related to transportation Each of its nine sections is based around familiar themes but brings together the views of experts from different disciplinary perspectives Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines different parts of the world and different social perspectives The nine sections are structured around the following themes Transport Modes Freight Transport and Logistics Transport Safety and Security Transport Economics Traffic Management Transport Modelling and Data Management Transport Policy and Planning Transport Psychology Sustainability and Health Issues in Transportation Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future oriented view of new research areas or challenges The end result is a reference work that offers researchers and practitioners new approaches new ways of thinking and novel solutions to problems All encompassing and expertly authored this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world Provides a forward looking and integrated approach to transportation Updated with future technological impacts such as self driving vehicles cyber physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach including sets of comparative studies and applications

Moving Safely Vania Ceccato, 2013-09-12 A sustainable city enables the fulfillment of the mobility needs of its citizens via accessible reliable and safe transportation systems Safety is one of many factors influencing

the mobility of individuals in urban environments Moving Safely Crime and Perceived Safety in Stockholm s Subway Stations aims to provide both theoretical and empirical perspectives on safety conditions at subway stations The book adopts an approach that is place centered looking upon those who travel through the system and who may become a victim of crime Safety at transportation nodes is not a field for one science only it demands the combination of cross disciplinary theories urban criminology architecture geography transportation and urban planning as well as integrated methods that are capable of dealing with an ever increasing volume of data Adopting a whole journey approach to safety the book offers suggestions on how to plan safety at subway stations with a variety of passengers needs Although these suggestions are not the first ones in the literature certainly they are new in terms of relying on findings from hypothesis testing and spatial data from a Scandinavian city Moving Safely is relevant for experts in safety and transportation research including criminologists planners transportation engineers architects as well as professionals dealing directly with safety interventions

The Infrastructures of Security Martin Murray, 2022-08-15 Much of the South African government s response to crime especially in Johannesburg has been to rely increasingly on technology This includes the widespread use of video cameras Artificial Intelligence machine learning and automated systems effectively replacing human watchers with machine watchers The aggregate effect of such steps is to determine who is and isn t allowed to be in public spaces essentially another way to continue segregation In The Infrastructures of Security author Martin J Murray concentrates on not only the turn toward technological solutions to managing the risk of crime through digital and software based surveillance and automated information systems but also the introduction of somewhat bizarre and fly by night experimental answers to perceived risk and danger Digitalized surveillance is significant for two reasons first it enables monitoring to take place across wide geographical distances with little time delay and second it allows for the active sorting identification and tracking of bodies behaviors and characteristics of subject populations on a continuous real time basis These new software based surveillance technologies represent monitoring tracking and information gathering without walls towers or guards

The Palgrave Handbook of Criminology and the Global South Kerry Carrington, Russell Hogg, John Scott, Máximo Sozzo, 2018-01-12 The first comprehensive collection of its kind this handbook addresses the problem of knowledge production in criminology redressing the global imbalance with an original focus on the Global South Issues of vital criminological research and policy significance abound in the Global South with important implications for South North relations as well as global security and justice In a world of high speed communication technologies and fluid national borders empire building has shifted from colonising territories to colonising knowledge The authors of this volume question whose voices experiences and theories are reflected in the discipline and argue that diversity of discourse is more important now than ever before Approaching the subject from a range of historical theoretical and social perspectives this collection promotes the Global South not only as a space for the production of knowledge but crucially as a source of innovative research and theory on crime and justice Wide ranging in

scope and authoritative in theory this study will appeal to scholars activists policy makers and students from a wide range of social science disciplines from both the Global North and South including criminal justice human rights and penology
