The Way Of The Panda The Curious History Of Chinas Political Animal:

The Way of the Panda Henry Nicholls, 2010-09-30 In a most original book science writer Henry Nicholls uses the rich and curious story of the panda from its discovery 150 years ago in the highlands of China to its present international status as endearing icon of the World Wide Fund for Nature WWF fifty years old in 2011 and shy darling of the world's zoos to do several things to chart the emergence of modern China onto the global stage to examine our changing attitude to the natural world and to offer a compelling history of the conservation movement

The Way of the Panda Henry Nicholls, 2012-06-01 Learn how the extraordinary impact of the panda from obscurity to fame is also the story of China's transition from shy beginnings to center stage Giant pandas have been causing a stir ever since their formal scientific discovery just over 140 years ago Yet in spite of humankind's evident obsession with the giant panda it is only in the last few decades that scientific research has begun to show us what this mysterious frequently misunderstood creature is really like Henry Nicholls uses the rich and curious history of the giant panda to do several things to ponder our changing attitudes toward the natural world to offer a compelling history of the conservation movement and to chart the rise of modern China on its journey to become the self-sufficient twenty-first century superpower it is today

Cargoes in Motion

Burkhard Schnepel, Julia Verne, 2022-02-08 An innovative collection of essays that foregrounds specific cargoes as a means to understand connectivity and mobility across the Indian Ocean world. Scholars have long appreciated the centrality of trade and commerce in understanding the connectivity and mobility that underpin human experience in the Indian Ocean region. But studies of merchant and commercial activities have paid little attention to the role that cargoes have played in connecting the disparate parts of this vast oceanic world. Drawing from the work of anthropologists, geographers and historians, *Cargoes in Motion* tells the story of how material objects have informed and continue to shape processes of exchange across the Indian Ocean. By following selected cargoes through both space and time, this book makes an important and innovative contribution to Indian Ocean studies. The multidisciplinary approach deepens our understanding of the nature and dynamics of the Indian Ocean world by showing how transoceanic connectivity has been driven not only by economic, social, cultural and political factors but also by the materiality of the objects themselves. Essays by Edward A. Alpers, Fahad Ahmad, Bishara Eva, Maria Knoll, Karl Heinz Kohl, Lisa Jenny Krieg, Pedro Machado, Rupert Neuhfer, Mareike Pampus, Hannah Pilgrim, Burkhard Schnepel, Hanne Schmitz, Tansen Sen, Steven Serels, Julia Verne, Kunbing Xiao. [Animal History in the Modern City](#) Clemens Wischermann, Aline Steinbrecher, Philip Howell, 2018-09-06 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. Animals are increasingly recognized as fit and proper subjects for historians, yet their place in conventional historical narratives remains contested. This volume argues for a history of animals based on the centrality of liminality, the state of being on the threshold, not quite one thing yet not quite another. Since animals stand between nature and culture, wildness and domestication, the countryside and the city, and tradition and modernity, the concept of liminality has a special resonance for historical animal studies. Assembling an impressive cast of contributors, this volume employs liminality as a lens through which to study the social and cultural history of animals in the modern city. It includes a variety of case studies, such as the horse-human relationship in the towns of New Spain, hunting practices in 17th-century France, the birth of the zoo in Germany, and the role of the stray dog in the Victorian city, demonstrating the interrelated nature of animal and human histories. *Animal History in the Modern City* is a vital resource for scholars and students interested in animal studies, urban history, and historical geography. **The Art of Environmental Law** Benjamin J. Richardson, 2019-12-12 Environmental law has aesthetic dimensions. Aesthetic values have shaped the making of environmental law, and in turn, such law governs many of our nature-based sensory experiences. Aesthetics is also integral to understanding the very fabric of environmental law in its institutions, procedures, and discourses. *The Art of Environmental Law*, the first book of its kind, brings new insights into the importance of aesthetic issues in a variety of domains of environmental governance around the world, from climate change to biodiversity conservation. It also argues for aesthetics and relatedly, the arts, to be taken more seriously in the practice of environmental law, so as to improve our emotional and ethical capacities to address the upheavals of the Anthropocene.
