The Web Of Life A New Understanding Of Living Systems:

The Web of Life Fritjof Capra, 1997-09-15 The vitality and accessibility of Fritjof Capra's ideas have made him perhaps the most eloquent spokesperson of the latest findings emerging at the frontiers of scientific social and philosophical thought. In his international bestsellers *The Tao of Physics* and *The Turning Point* he juxtaposed physics and mysticism to define a new vision of reality. In *The Web of Life* Capra takes yet another giant step setting forth a new scientific language to describe interrelationships and interdependence of psychological biological physical social and cultural phenomena the web of life. During the past twenty five years scientists have challenged conventional views of evolution and the organization of living systems and have developed new theories with revolutionary philosophical and social implications. Fritjof Capra has been at the forefront of this revolution. In *The Web of Life* Capra offers a brilliant synthesis of such recent scientific breakthroughs as the theory of complexity Gaia theory chaos theory and other explanations of the properties of organisms social systems and ecosystems. Capra's surprising findings stand in stark contrast to accepted paradigms of mechanism and Darwinism and provide an extraordinary new foundation for ecological policies that will allow us to build and sustain communities without diminishing the opportunities for future generations. Now available in paperback for the first time *The Web of Life* is cutting edge science writing in the tradition of James Gleick's *Chaos* Gregory Bateson's *Mind and Matter* and Ilya Prigogine's *Order Out of Chaos*. *African Environmental and Human Security in the 21st Century* Helen E. Purkitt, 2009 *Schools That Learn (updated and revised second edition)* Peter Senge, 2012-07-31 A NEW EDITION OF THE GROUNDBREAKING BOOK A new edition revised and updated with over 100 pages of new material of the groundbreaking book that brings the principles of organizational learning to today's schools and classrooms. A unique collaboration between the celebrated management thinker and Fifth Discipline author Peter Senge and a team of renowned educators and organizational change leaders the revised edition of *Schools That Learn* addresses the new and unique pressures on our educational system that have emerged since the book's initial publication in 2000. In a fast changing world where school populations are increasingly diverse children live in ever more complex social and media environments standardized tests are applied as overly simplistic quick fixes and advances in science and technology continue to accelerate the pressures on our educational system are inescapable. *Schools That Learn* offers a much needed way to open dialogue about these problems and provides pragmatic opportunities to transform school systems into learning organizations. *The New Net Zero* Bill Maclay, 2014 The new threshold for green building is not just low energy it's net zero energy. In *The New Net Zero* sustainable architect Bill Maclay charts the path for designers and builders interested in exploring green design's new frontier net zero energy structures that produce as much energy as they consume and are carbon neutral. In a nation where traditional buildings use roughly 40 percent of the total fossil energy the interest in net zero building is growing enormously among both designers interested in addressing climate change and consumers interested in energy efficiency and long term savings. Maclay an award winning net zero designer

whose buildings have achieved high performance goals at affordable costs makes the case for a net zero future explains net zero building metrics integrated design practices and renewable energy options and shares his lessons learned on net zero teambuilding Designers and builders will find a wealth of state of the art information on such considerations as air water and vapor barriers embodied energy residential and commercial net zero standards monitoring and commissioning insulation options costs and more The comprehensive overview is accompanied by several case studies which include institutional buildings commercial projects and residences Both new building and renovation projects are covered in detail The New Net Zero is geared toward professionals exploring net zero design but also suitable for nonprofessionals seeking ideas and strategies on net zero options that are beautiful and renewably powered *Local Natures, Global Responsibilities*

,2010-01-01 In the New Literatures in English nature has long been a paramount issue the environmental devastation caused by colonialism has left its legacy with particularly disastrous consequences for the most vulnerable parts of the world At the same time social and cultural transformations have altered representations of nature in postcolonial cultures and literatures It is this shift of emphasis towards the ecological that is addressed by this volume A fast expanding field ecocriticism covers a wide range of theories and areas of interest particularly the relationship between literature and other texts and the environment Rather than adopting a rigid agenda the interpretations presented involve ecocritical perspectives that can be applied most fruitfully to literary and non literary texts Some are more general holistic approaches literature and other cultural forms are a living organism part of an intellectual ecosystem implemented and sustained by the interactions between the natural world both human and non human and its cultural representations Nature itself is a new interpretative category in line with other paradigms such as race class gender and identity A wide range of genres are covered from novels or films in which nature features as the main topic or protagonist to those with an ecocritical agenda as in dystopian literature Other concerns are nature as a cultural construct gendered natures and the city country dichotomy The texts treated challenge traditional Western dualisms human animal man nature woman man While such global phenomena as media old or new tourism and catastrophes permeate many of these texts there is also a dual focus on nature as the inexplicable elusive Other and the need for human agency and global responsibility **Quality of Human Resources: Education - Volume III**

Natalia P. Tarasova,2009-11-10 Quality of Human Resources Education is a component of Encyclopedia of Human Resources Policy Development and Management which is part of the global Encyclopedia of Life Support Systems EOLSS an integrated compendium of twenty one Encyclopedias The Theme is organized into five different topics which represent the main scientific areas of the theme Foundations of Educational Systems Knowledge for Education Structural Foundations of Educational Systems Educational Systems Case Studies and Educational Indices Education for Sustainable Development Each of these consists of a topic chapter emphasizing the general aspects and various subject articles explaining the background theory and practice of a specific type of education which is a very important factor in human development and

awareness for achieving global sustainable development These three volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers and NGOs

The Ambient Christ Joseph Masterleo, 2020-12-01 There is a unified field in the cosmos that holds everything together and every discipline is a portal to it Science calls it a field of fundamental forces and elementary particles Religion calls it God and accepts it by faith as an impenetrable mystery How can their unbending perspectives be reconciled In *The Ambient Christ* the author proposes a novel paradigm that explains their complementarity as a seamless unity This innovative model provides a new story for an ailing and divided planet in the twenty first century and a viable solution to the holy grail quest There is something too narrow and missing in the gospel as it is presented to us In spite of appearances our age is more religious than ever it only needs stronger meat Pierre Teilhard de Chardin A religion old or new that stressed the magnificence of the universe as revealed by modern science might be able to draw forth reserves of reverence and awe hardly tapped by conventional faiths Sooner or later such a religion will emerge Carl Sagan

The Quest for Meaning , 2009-01-01 *The Quest for Meaning Teaching Learning and the Arts* presents a narrative arts based approach to pedagogy and research in higher education Through narratives of experience the book offers revealing poignant examples of the transformative power of the arts and of narrative inquiry in learners lives and of the centrality of story in their ongoing quest for meaning *The Quest for Meaning* will be valuable in a wide range of graduate and undergraduate settings It provides a framework for the development of new pedagogies which integrate the theory and practice of narrative arts based approaches to education The work makes a contribution to the fields of narrative and arts based inquiry and pedagogy qualitative research methods holistic and integrated studies and self directed inquiry It will appeal to a range of audiences who are interested in this creative integrative approach to education and who want to gain insights into how students learn from their own unique perspectives Grounded in Dr Beattie s interconnected approach to research and pedagogy the book begins with her own story of teaching learning research and the arts This provides the backdrop to an account of a collaborative pedagogy designed to enable students to conduct in depth narrative inquiries into their lives and to learn how to do narrative arts based research with others The author provides insights into the practices and processes of solitary and collaborative inquiry and the interaction and integration that take place within the three kinds of dialogue she proposes the dialogue with the self the dialogue with others and the dialogue between the dialogues The book s other twelve narratives show from learners unique perspectives how the creation and re creation of their ways of ways of knowing and being is a distinctively individual process involving all aspects of their humanity Individually these narratives provide valuable glimpses into the challenges the joys the frustrations and emotionality and the important personal satisfactions involved in the processes of learning unlearning and re learning In their own voices these learners tell of the diverse ways in which they became more responsive to their own inner lives to the perspectives and understandings of others

and to the creation of more meaningful narratives for their current and future lives Collectively the narratives highlight the importance of recognizing personal experience in settings of higher education They also present compelling evidence for acknowledging the significance of inquiry creativity imagination dialogue interaction and integration in enabling learners to bring the whole of their being to the learning process to the exploration of the stories by which they live and to the creation of new narratives for their future lives

The Living School Jerry A. Rice Ed. D.,2011-08-19 At a time when countless educational reforms mandates and change programs are being foisted on our public schools it seems clear that new approaches and solutions are needed In *The Living School* the author details the thinking that brought us to our current educational dilemma and the forces that formed our model of American schools He explores new ways of thinking about school leadership organizations and learning gently leading the reader to a new viewpoint of schools and the educational process He puts into perspective recent educational and organizational research and discoveries and demonstrates how they must be applied to our schools in order for true reform to happen

The Human Capacity for Transformational Change Valerie A. Brown,John A. Harris,2014-02-24 Pressures for transformational change have become a regular feature of most fields of human endeavour Master thinkers and visionaries alike have reframed existing divisions as connecting relationships bringing together as dynamic systems the supposed opposites of parts and wholes stability and change individuals and society and rational and creative thinking This reframing of opposites as interconnected wholes has led to realisation of the power of a collective mind This book offers ways and means of creating the synergies that are crucial in influencing a desired transformational change towards a just and sustainable future It describes how and why our current decision making on any complex issue is marked by clashes between the different interests involved More optimistically the book pursues a mode of

thinking that brings together government specialised and community interests at the local regional and personal scales in a collective transformation process Practical examples signal the emergence of a new knowledge tradition that promises to be as powerful as the scientific enlightenment Written in accessible language this book will be insightful reading for anyone struggling with transformational change especially researchers students and professionals in the fields of administration governance environmental management international development politics public health public law sociology and community development

Spider Web, Labyrinth, Tightrope Walk Regina Schober, 2023-08-07 *Spider Web Labyrinth Tightrope Walk* explores the shifting functions of the network as a metaphor model and as an epistemological framework in US American literature and culture from the 19th century until today The book critically inquires into the literary cultural philosophical and scientific rhetoric values and ideological underpinnings that have given rise to the network concept Literature and culture play a major role in the ways in which networks have been imagined and how they have evolved as conceptual models This study regards networks as historically emergent and culturally constructed formations closely tied with the development of knowledge technologies in the process of modernization as well as with an increasingly critical awareness of network technologies and infrastructures While the rise of the network in scientific philosophical political and sociological discourses has received wide attention this book contributes an important cultural and historical perspective to network theory by demonstrating how US American literature and culture have been key sites for thinking in and about networks in the past two centuries

John Hardman,2013-07-03 This book presents the regenerative leadership framework that has emerged from doctoral research and consulting work with successful sustainability leaders and their organizations in business education and community The framework synthesizes the levels of awareness the leadership styles and behaviours and the organizational arrangements that correlate most significantly across these domains Most importantly the overwhelming majority of the leaders in this work agree that individual and collective consciousness development is critical to transforming the culture of organizations for sustainability and beyond The term regenerative has not been chosen arbitrarily but to provide an alternative to the notion of sustainability which many of the leaders featured here indicate has become insufficient to describe what needs to be done economically socially and environmentally if we are to ensure a flourishing world for present and future generations This work in turn has led to the development of the Regenerative

Capacity Index RCI a tool designed to assess an organization's readiness to engage in regenerative practice From this evaluation of an organization's regenerative capacity it becomes possible to design a strategy for regeneration that considers all levels of its environmental social and economic impact both internally and externally in the local and global community Among its major findings the book argues that the more evolved sustainability leaders are becoming increasingly dissatisfied with the construct of sustainability and indicate the need for a profound cultural shift towards regenerative human systems In this framework regenerative organizations are driven by a sense higher purpose and leadership is exercised horizontally and collaboratively Leaders and followers engage in generative conversations to create desirable futures which are then backcasted to eliminate unanticipated consequences Throughout leaders emphasize the critical importance of engaging in personal and collective consciousness development or inner work in order to make regenerative practices possible

Writing Home Elmer Kennedy-Andrews, 2008 The idea of place and of being displaced is a powerful leit motif in Northern Irish poetry It is here explored in depth from the 1960s to the present day Ideas of home place and identity have been continually questioned re imagined and re constructed in Northern Irish poetry Concentrating on the period since the outbreak of the Troubles in the late 1960s this study provides a detailed consideration of the work of several generations of poets from Hewitt and MacNeice to Fiacca and Montague to Simmons Heaney Mahon and Longley to Muldoon Carson Paulin and McGuckian to McDonald Morrissey Gillis and Flynn It traces the extent to which their writing represents a move away from concepts of rootedness and towards a deterritorialized poetics of displacement mobility openness and pluralism in an era of accelerating migration and globalisation In the new readings of place inherited maps are no longer reliable and home is no longer the stable ground of identity but seems instead to be always where it is not The crossing of boundaries and the experience of diaspora open up new understandings of the relations between places a new sense of the permeability and contingency of cultures and new concepts of identity and home Professor ELMER KENNEDY ANDREWS teaches in the Department of English at the University of Ulster
