A Climate for Change Katharine Hayhoe, Andrew Farley, 2009-10-29 Most Christian lifestyle or environmental books focus on how to live in a sustainable and conservational manner A CLIMATE FOR CHANGE shows why Christians should be living that way and the consequences of doing so Drawing on the two authors experiences one as an internationally recognized climate scientist and the other as an evangelical leader of a growing church this book explains the science underlying global warming the impact that human activities have on it and how our Christian faith should play a significant role in guiding our opinions and actions on this important issue **Climate and Cultural Change in Prehistoric Europe**

and the Near East Peter F. Biehl, Olivier P. Nieuwenhuys, 2016-11-23 The subject of climate change could hardly be more timely In *Climate and Cultural Change in Prehistoric Europe and the Near East* an interdisciplinary group of contributors examine climate change through the lens of new archaeological and paleo environmental data over the course of more than 10 000 years from the Near East to Europe Key climatic and other events are contextualized with cultural changes and transitions for which the authors discuss when how and if changes in climate and environment caused people to adapt move or perish More than this publication of crucial archaeological and paleo environmental data however the volume seeks to understand the social political and economic significance of climate change as it was manifested in various ways around the Old World Contrary to perceptions of threatening global warming in our popular media and in contrast to grim images of collapse presented in some archaeological discussions of past climate change this book rejects outright societal collapse as a likely outcome Yet this does not keep the authors from considering climate change as a potential factor in explaining culture change by adopting a critical stance with regard to the long standing practice of equating synchronicity with causality and explicitly considering alternative explanations **When Technology Fails** Matthew R. Stein, Matthew Stein, 2008-03-27

Matthew Stein's comprehensive guide to sustainable living skills gives you the tools you need to fend for yourself and your family in times of emergency or disaster It also goes a step further giving sound instructions on how to become self reliant in seemingly stable times and for the long term by adopting a sustainable lifestyle Cover p 4 [The Routledge Companion to](#)

Questioning Collapse Patricia A. McAnany,Norman Yoffee,2009-09-28 Questioning Collapse challenges those scholars and popular writers who advance the thesis that societies past and present collapse because of behavior that destroyed their environments or because of overpopulation In a series of highly accessible and closely argued essays a team of internationally recognized scholars bring history and context to bear in their radically different analyses of iconic events such as the deforestation of Easter Island the cessation of the Norse colony in Greenland the faltering of nineteenth century China the migration of ancestral peoples away from Chaco Canyon in the American southwest the crisis and resilience of Lowland Maya kingship and other societies that purportedly collapsed Collectively these essays demonstrate that resilience in the face of societal crises rather than collapse is the leitmotif of the human story from the earliest civilizations to the present Scrutinizing the notion that Euro American colonial triumphs were an accident of geography Questioning Collapse also critically examines the complex historical relationship between race and political labels of societal success and failure
