Mick Smith, Jason Young

The Vanishing Face Of Gaia A Final Warning:

The Vanishing Face of Gaia James Lovelock, 2009-04-14 The global temperature is rising the ice caps are melting and levels of pollution across the world have reached unprecedented heights According to eminent scientist James Lovelock in order to survive an assault from her dependents the Earth is lurching ever closer to a permanent hot state Within the next century we will almost certainly be forced to give up many of the comforts of western living as supplies are threatened Only the fittest and the smartest will survive A reluctant jeremiad from one of the environmental movement's elder statesmen The Vanishing Face of Gaia offers an essential wake up call for the human race *The Vanishing Face of Gaia*, 2013

Sounding the Limits of Life Stefan Helmreich, 2015-10-27 What is life What is water What is sound In *Sounding the Limits of Life* anthropologist Stefan Helmreich investigates how contemporary scientists biologists oceanographers and audio engineers are redefining these crucial concepts Life water and sound are phenomena at once empirical and abstract material and formal scientific and social In the age of synthetic biology rising sea levels and new technologies of listening these phenomena stretch toward their conceptual snapping points breaching the boundaries between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis *Sounding the Limits of Life* shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision **Radical Intellectuals and the Subversion of Progressive Politics** Michael J.

Thompson, Gregory Smulewicz-Zucker, 2015-09-09 *Radical Intellectuals and the Subversion of Progressive Politics* is a challenge to contemporary radical politics and political thought This collection of essays critiques the dominant trends and figures on the left that have distorted the legacy of progressive politics arguing that they have moved politics away from issues of class and economic power toward a preoccupation with culture and identity The contributors discuss this new radicalism from the perspective of a more rational form of leftism capable of reviving interest in a more politically relevant form of politics **Encyclopedia of Environmental Change** John A Matthews, 2013-12-13 Accessibly written by a team of international authors the *Encyclopedia of Environmental Change* provides a gateway to the complex facts concepts techniques methodology and philosophy of environmental change This three volume set illustrates and examines topics within this dynamic and rapidly changing interdisciplinary field The encyclopedia includes all of the following aspects of environmental change Diverse evidence of environmental change including climate change and changes on land and in the oceans Underlying natural and anthropogenic causes and mechanisms Wide ranging local regional and global impacts from

The Urgency of Climate Change Kiarash Aramesh, Gerard Magill, 2017-01-06 The Urgency of Climate Change addresses a pivotal challenge for the sustainability of our planet This topic was selected for the inaugural conference in 2015 of an annual series on the Integrity of Creation The essays in this collection were selected in a peer reviewed manner and appeal to a general audience The chapters move from general to more specific points of view with a discussion at the end of each section addressing the global impact of climate change The first section sets the Context for the discussion explaining that the climate is an indispensable common good The part on Science emphasises that empirical reality must guide any analysis of the climate as a matter of basic knowledge and comprehension A crucial implication is whether the climate is sufficiently robust for the Earth to flourish for millennia ahead as discussed in the part on Sustainability In turn these sections raise pivotal questions regarding Ethics about social obligations for the planet to flourish and regarding Religion to foster global stewardship Finally this alignment of Ethics and Religion around the problems related to Science and Sustainability leads to the final section on Law that considers policy possibilities to effectively engage Climate Change

Surviving the 21st Century Julian Cribb, 2016-09-20 The book explores the central question facing humanity today how can we best survive the ten great existential challenges that are now coming together to confront us Besides describing these challenges from the latest scientific perspectives it also outlines

and integrates the solutions both at global and individual level and concludes optimistically This book brings together in one easy to read work the principal issues facing humanity It is written for the two next generations who will have to deal with the compounding risks they inherit and which flow from overpopulation resource pressures and human nature The author examines ten intersecting areas of activity mass extinction resource depletion WMD climate change universal toxicity food crises population and urban expansion pandemic disease dangerous new technologies and self delusion which pose manifest risks to civilization and potentially to our species long term future This isn't a book just about problems It is also about solutions Every chapter concludes with clear conclusions and consensus advice on what needs to be done at global level but it also empowers individuals with what they can do for themselves to make a difference Unlike other books it offers integrated solutions across the areas of greatest risk It explains why Homo sapiens is no longer an appropriate name for our species and what should be done about it

After They're Gone Peter Marren, 2022-05-05 Wise challenging and offering some unexpected laughter in the dark this is a rational and insightful account of the sixth great extinction event Peter Marren is a brilliant writer and a national treasure PATRICK BARKHAM Thoughtful fascinating and very timely STEPHEN MOSS Important and thought provoking CAROLINE LUCAS GREEN PARTY MP Essential reading Marren makes a page turner out of Armageddon SIMON BARNES In his characteristic style Peter Marren has humanised the story of wildlife losses with humour and wit but also with his enormous knowledge and deep love for the living world MARK COCKER We are in the midst of an extinction event the sixth mass extinction on earth and one entirely caused by mankind All species become extinct sooner or later but we have accelerated that natural process several hundredfold and now it is happening right in front of our eyes Extinction has a terrifying finality to it And many species have already been lost to us forever there is little we can do about that What we can do however is reflect remember and ultimately acknowledge the unvarnished truth We must see the natural world as it is and not as we might want it to be Our trajectory is one that has benefited one species alone humankind For all other beings from mammals to fish from birds to insects and coral from plants to lichens and fungi the future for better or worse is in our hands

How to Think about the Climate Crisis Graham Parkes, 2020-11-26 Choice Outstanding Academic Title 2021 Coping with the climate crisis is the greatest challenge we face as a species We know the main task is to reduce our emissions as rapidly as possible to minimise the harm to the world's population now and for generations to come What on earth can philosophy offer us In this compelling account of a problem we think we know inside out the philosopher Graham Parkes outlines the climatic predicament we are in and how we got here and explains how we can think about it anew by considering the relevant history science economics politics and for the first time the philosophies underpinning them Introducing the reality of global warming and its increasingly dire consequences he identifies the immediate obstructions to coping with the problem outlines the libertarian ideology behind them and shows how they can be circumvented Drawing on the wisdom of the ancients in both the East Asian and Western traditions as

embodied in such figures as Confucius Laozi Zhuangzi Dogen Plato Epicurus Marcus Aurelius and Nietzsche Parkes shows how a greater awareness of non Western philosophies and especially the Confucian political philosophy advocated by China can help us deal effectively with climate change and thrive in a greener future If some dominant Western philosophical ideas and their instantiation in politics and modern technology got us into our current crisis Parkes demonstrates persuasively that expanding our philosophical horizons will surely help get us out *Learning, Environment and Sustainable Development* William Scott,Paul Vare,2020-11-11 This book is an introduction to the long history of human learning the environment and sustainable development about our struggles with the natural world first for survival then for dominance currently for self preservation and in future perhaps even for long term mutually beneficial co existence It charts the long arc of human environment relationships through the specific lens of human learning putting on record many of the people ideas and events that have contributed often unwittingly to the global movement for sustainable development Human learning has always had a focus on the environment It s something we ve been engaged in ever since we began interacting with our surroundings and thinking about the impacts outcomes and consequences of our actions and interactions This unique story told by the authors is episodic rather than a connected linear account it probes questions and re examines familiar issues from novel perspectives and looks ahead The book is of particular interest to those studying and teaching courses with a focus on socio economic and environmental sustainability and non governmental organisations whose work brings them face to face with the general public and social enterprises **Contemporary Poetry** Nerys Williams,2011-04-06 Discussing the work of more than 60 poets from the US UK Ireland Australia New Zealand and the Caribbean Nerys Williams guides students through the key ideas and movements in the study of poetry today **The Original Earth Manifesto** Tiffany Twain,2013-06-07 The Original Earth Manifesto is the first of what has evolved into 12 Books of the Earth Manifesto Each of the 121 one page Soliloquies in this original manuscript has been transcribed from the original in this historic version of provocative ideas and insightful understandings This Book Nine also contains important ideas that were germinating as history unfolded in late 2015 **Does the Earth Care?** Mick Smith,Jason Young,2022-04-12 Rethinking our relationship with Earth in a time of environmental emergency The world is changing Progress no longer has a future but any earlier sense of Earth as providential seems of merely historical interest The apparent absence of Earthly solicitude is a symptom and consequence of these successive Western modes of engagement with the Earth now exemplified in global capitalism Within these constructs Earth can only appear as constitutively indifferent to the fate of all its inhabitants The provisional ecology outlined in Does the Earth Care drawing on a variety of literary and philosophical sources from Richard Jefferies and Robert Macfarlane to Martin Heidegger and Gaia theory fundamentally challenges that assumption while offering an Earthly alternative to either cold realism or alienated despair in the face of impending ecological disaster Forerunners is a thought in process series of breakthrough digital works Written between fresh ideas and finished books Forerunners draws on scholarly work initiated in
