Orality, Textuality, and the Homeric Epics Jonathan L. Ready, 2019-07-30 Written texts of the Iliad and the Odyssey achieved an unprecedented degree of standardization after 150 BCE but what about Homeric texts prior to the emergence of standardized written texts Orality Textuality and the Homeric Epics sheds light on that earlier history by drawing on scholarship from outside the discipline of classical studies to query from three different angles what it means to speak of Homeric poetry together with the word text Part I utilizes work in linguistic anthropology on oral texts and oral intertextuality to illuminate both the verbal and oratorical

landscapes our Homeric poets fashion in their epics and what the poets were striving to do when they performed Looking to folkloristics part II examines modern instances of the textualization of an oral traditional work in order to reconstruct the creation of written versions of the Homeric poems through a process that began with a poet dictating to a scribe Combining research into scribal activity in other cultures especially in the fields of religious studies and medieval studies with research into performance in the field of linguistic anthropology part III investigates some of the earliest extant texts of the Homeric epics the so called wild papyri By looking at oral texts dictated texts and wild texts this volume traces the intricate history of Homeric texts from the Archaic to the Hellenistic period long before the emergence of standardized written texts in a comparative and interdisciplinary study that will benefit researchers in a number of disciplines across the humanities

Lloyd,2023-07-28 From the 90 or so articles he has published in the last two decades Professor Lloyd has chosen fifteen of the most important and influential to be reprinted in this collection They tackle a wide range of problems in ancient Greek and Chinese thought focussing especially on science but including also medicine mathematics philosophy and mythology Three common themes recur the ancients own concern with disciplinary boundaries their engagement in polemics and the heterogeneity of different traditions cultivating different styles of reasoning with different results in ancient science Alongside papers that deal with technical issues in the interpretation of our sources others raise strategic questions to do with the institutional framework of ancient science the role of literacy in its development and the underlying ontological and epistemological presuppositions of different groups of ancient investigators The collection closes with a study in which Lloyd sets out how he sees the further comparative study of ancient science developing Two of the articles appear here for the first time in English The others are reprinted in their original form Supplementary bibliographies

are added referring to the most recent scholarship on the issues discussed

Orality and Performance in Classical Attic Prose Alessandro Vatri, 2017-02-23 This study discusses the question of whether there is a linguistic difference between classical Attic prose texts intended for public oral delivery and those intended for written circulation and private performance Identifying such a difference which exclusively reflects these disparities in modes of reception has proven to be a difficult challenge for both literary scholars and cultural historians of the ancient world with answers not always satisfactory from a methodological and an analytical point of view The legitimacy of the question is first addressed through a definition of what such slippery notions as orality and oral performance mean in the context of classical Athens reconstruction of the situations in which the extant prose texts were meant to be received and an explanation of the grounds on which we may expect linguistic features of the texts to be related to such situations The idea that texts conceived for public delivery needed to be as clear as possible is substantiated by available cultural historical and anthropological facts however these do not imply that the opposite was required of texts conceived for private reception In establishing a rigorous methodology for the reconstruction of the native perception of clarity in the original contexts of textual reception this study offers a novel approach to assessing orality in classical Greek prose through examination of linguistic and grammatical features of style It builds upon the theoretical insights and current experimental findings of modern psycholinguistics providing scholars with a new key to the minds of ancient writers and audiences

Memory in a Time of Prose Daniel D. Pioske, 2018-08-15 Memory in a Time of Prose investigates a deceptively straightforward question what did the biblical scribes know about times previous to their own Daniel D Pioske attempts to answer this question by studying the sources limits and conditions of knowing that would have shaped biblical stories told about a past that preceded the composition of these writings by a generation or more This book is comprised of a series of case studies that compare biblical references to an early Iron Age world ca 1175 830 BCE with a wide range of archaeological and historical evidence from the era in which these stories are set Pioske examines the relationship between the past disclosed through these historical traces and the past represented within the biblical narrative He discovers that the knowledge available to the biblical scribes about this period derived predominantly from memory and word of mouth rather than from a corpus of older narrative documents For those Hebrew scribes who first set down these stories in prose writing the means for knowing a past and the significance attached to it were in short wed foremost to the faculty of remembrance Memory in a Time of Prose reveals how the past was preserved transformed or forgotten in the ancient world of oral living speech that informed biblical storytelling

Text as Revelation Hanna Tervanotko, Jonathan Stökl, 2023-12-28 Text as Revelation analyses the shift of revelatory experiences from oral to written that is described in ancient Jewish literature including rabbinic texts The individual essays seek to understand how why and for whom texts became the locus of revelation While the majority of the contributors analyze ancient Jewish literature for depictions of oral and written revelation such as the Hebrew Bible and the literature of the

Second Temple era a number of articles also investigate textualization of revelation in cognate cultures analyzing Egyptian Mesopotamian and Greek sources With subjects ranging from Ancient Egyptian and Sibylline oracles to Hellenistic writings and the books of Isaiah Deuteronomy and Jeremiah the studies in this volume bring together established and new voices reflecting on the issues raised by the interplay between writing and divinatory revelation Texts, Transmissions, Reception, 2014-10-16 The papers collected in this volume study the function and meaning of narrative texts from a variety of perspectives The word text is used here in the broadest sense of the term it denotes literary books but also oral tales speeches newspaper articles and comics One of the purposes of this volume is to discover what these different texts have in common The texts are approached from four main perspectives New Philology Linguistics Iconography and Reception studies Contributors come from diverse disciplines such as Classical Studies Medieval Studies English literature Philosophy Religious Studies Cultural Studies Art History Linguistics and Communication and Information Studies all united in a common purpose to understand the workings of narrative texts *The Politics of Orality* Craig Richard Cooper, 2007 This volume represents the sixth in the series on Orality and Literacy in the Ancient Greek and Roman Worlds The present work comprises a collection of essays that explore the tensions and controversies that arise as a society moves from an oral to literate culture Part 1 deals with both Homeric and other forms of epic part 2 explores different ways in which texts and writing were manipulated for political ends Part 3 and 4 deals with the controversies surrounding the adoption of writing as the accepted mode of communication whereas some segments of society began to privilege writing over oral communication others continued to maintain that the latter was superior Part 4 looks at the oral elements of Athenian Law Myth and Philosophy in Plato's Phaedrus Daniel S. Werner, 2012-07-09 Plato's dialogues frequently criticize traditional Greek myth yet Plato also integrates myth with his writing Daniel S Werner confronts this paradox through an in depth analysis of the Phaedrus Plato's most mythical dialogue Werner argues that the myths of the Phaedrus serve several complex functions they bring nonphilosophers into the philosophical life they offer a starting point for philosophical inquiry they unify the dialogue as a literary and dramatic whole they draw attention to the limits of language and the limits of knowledge and they allow Plato to co-opt cultural authority as a way of defining and legitimating the practice of philosophy Platonic myth as a species of traditional tale is thus both distinct from philosophical dialectic and similar to it Ultimately the most powerful effect of Platonic myth is the way in which it leads readers to participate in Plato's dialogues and to engage in a process of self examination *The Layers of the Text* Richard Hunter, 2021-10-25 This volume collects the most recent essays of Richard Hunter one of the world's leading experts in the field of Greek and Latin literature The essays range across all periods of ancient literature from Homer to late antiquity with a particular focus not just on the texts in their original contexts but also on how they were interpreted and exploited for both literary and more broadly cultural purposes later in antiquity Taken together the essays sketch a picture of a continuous tradition of critical and historical engagement with the literature of the

past from the period of Aristophanes and then Plato and Aristotle in classical Athens to the rich prose literature of the Second Sophistic Richard Hunter's earlier essays are collected in *On Coming After* Berlin 2008 [Animo Decipiendi?](#) Antonio Guzmán, Javier Martínez, 2019-04-30 Many new and fruitful avenues of investigation open up when scholars consider forgery as a creative act rather than a crime We invited authors to contribute work without imposing any restrictions beyond a willingness to consider new approaches to the subject of ancient fakes forgeries and questions of authenticity The result is this volume in which our aim is to display some of the many possibilities available to scholarship Following *Splendide Mendax* this is the latest installment of an ongoing inquiry conducted by scholars in numerous countries into how the ancient world its literature and culture its history and art appears when viewed through the lens of fakes and forgeries sincerities and authenticities genuine signatures and pseudepigrapha **The Frontiers of Ancient Science** Brooke Holmes, Klaus-Dietrich Fischer, 2015-03-30 Our understanding of science mathematics and medicine today can be deeply enriched by studying the historical roots of these areas of inquiry in the ancient Near East and Mediterranean The fields of ancient science and mathematics have in recent years witnessed remarkable growth The present volume brings together contributions from more than thirty of the most important scholars working in these fields in the United States and Europe in honor of the eminent historian of ancient science and medicine Heinrich von Staden Professor Emeritus of Classics and History of Science at the Institute of Advanced Study and William Lampson Professor Emeritus of Classics and Comparative Literature at Yale University The papers range widely from Mesopotamia to Ancient Greece and Rome from the first millennium B C to the early medieval period and from mathematics to philosophy mechanics to medicine representing both a wide diversity of national traditions and the cutting edge of the international scholarly community [An Introduction](#) Giulio Colesanti, Manuela Giordano, 2014-08-27 This volume deals with the submerged literature of ancient Greece that is all the texts produced for socially relevant events that have contributed to the configuration and articulation of ancient Greek culture as we know it In particular the hermeneutic tool of submerged literature may shed new light on the dynamics behind the emersion or submersion of certain texts during different periods The category of submerged literature is extended here to include preserved and lost texts as well as those texts that can be reconstructed through investigation The volume investigates the manifold speech acts that we know of through various sources and that either from the outset or over the course of time have been placed at the edge of diffusion conservation and transmission The essays contained in the volume deal with questions of hermeneutics philology and methodology as well as with epic cycles lyric poetry tragedy comedy satyr drama and mime By approaching these genres from the perspective of submerged literature the book tries to provide a more precise contextualization of the texts within the communication system of ancient Greece The book thus presents a new line of research and a series of studies that take a fresh look at the texts and all archaeological and iconographic sources relating to Greek culture taking into account the results of ethnographic and anthropological research This extensive investigation

examines unique ancient Greek orality and literacy dynamics using a new hermeneutic frame that will hopefully reshape our understanding of ancient Greek culture
