

43. X JUMPS

1. Start by standing up with your feet slightly wider than shoulder width apart before bending both your hips and knees (see Exercise 2 – Squat).
2. Lean your body forward slightly so that you are able to touch your RIGHT foot with your LEFT hand.
3. Once in this position, propel your body upwards into the air, extending your legs before landing back into squat position (see Exercise 8 – Jump Squat). When landing, ensure that you land through the balls of your feet first before rolling through the flat and heel and maintain 'soft' knees to prevent injury.
4. As you land, lean your body forward slightly so that you are able to touch your LEFT foot with your RIGHT hand.
5. Propel your body upwards into the air again, extending your legs before landing back into squat position.
6. Repeat.
