The presence of birds, bees, and butterflies suggests a healthy, earth-friendly place. These most welcome guests also bring joy to those who appreciate watching them. Now you can turn your yard into a perfect habitat that attracts them and more importantly helps them thrive. Professional nature photographer and botanist George Oxford Miller provides all the information you need in this must-have guide for Northern California. Learn how to landscape and create pollinator gardens with native plants. The book begins with an in-depth introduction to native pollinators and to birds. It is followed by a field guide section to more than 100 native plants that are widely available to utilize, are easy to care for, and provide great benefit to birds, bees, and butterflies. The species are organized by level of sunlight needed and then by plant types. Each species includes full-color photographs and information about hardiness zones, what they are most likely to attract, soil requirements, light levels, and George's notes. As an added bonus, you'll make use of blooming charts, tips on attracting specific species, and more.
