Tried True Lessons Level Book:

Getting to the Core of Literacy for History/Social Studies, Science, and Technical Subjects, Grades 6–12 Vicky Giouroukakis, Maureen Connolly, 2013-05-14 Literacy is not just for English teachers anymore. The new Common Core English Language Arts Standards aren't just for English teachers. Fluent reading and writing are critically important to the study of history, social studies, science, and technical subjects too. What's more, the progress your students make is directly tied to their ability to process information they read and to express their ideas in writing. So how do you make literacy a focus of your teaching without taking time away from essential content? This practical resource, packed with teacher-tested CCSS-based sample lessons, shows you how using the Backward Design approach to set and meet your goals. Each lesson template includes the teaching strategies you'll utilize, ways to incorporate technology and media, variations for differentiation and interdisciplinary connections, links to the work of major educational theorists. Following these models, you'll set the CCSS in your sights and develop lessons that both meet standards and fit your classroom. Before you know it, you'll be infusing reading and writing across your curriculum in purposeful and meaningful ways. *Getting to the Core of English Language Arts, Grades 6-12* Vicky Giouroukakis, Maureen Connolly, 2012-04-19 Design effective CCSS-aligned lessons for secondary students. If you want to revamp your secondary English Language Arts curriculum to reflect the Common Core State Standards, this book is the perfect resource. The authors move the implementation of the CCSS for ELA from the abstract to the concrete by providing adaptable exemplar lesson plans in each of the CCSS strands: reading, writing, speaking and listening, and language. Each lesson template includes the intended grade level band, timeline, and the type of student writing involved. Connections to supporting theory, including the Backward Design model, variations to differentiate lessons for diverse student populations, ways to link the lesson to technology and service learning. Reproducible handouts. *Opening the Common Core* Carol Corbett Burris, Delia T. Garrity, 2012-03-13 The CCSS open the door to success. Do you wish you could leverage the Common Core State Standards (CCSS) to equip all students, not just high achievers, with the higher-level thinking skills they need? You can, and this book will show you how. The authors helped lead their district, Rockville Centre in Long Island, New York, in closing achievement gaps and increasing the number of students who completed four-year college programs. The results of their efforts show a remarkable increase in both excellence and equity in English language arts, math, and science. This book outlines the authors' research-based ACES framework for instructional improvement to help achieve similar results: Acceleration rather than remediation, Critical thinking, Equity in education for all students. Support Educators will find practical strategies that are applied and developed in model lessons linked to the CCSS and KSUS Knowledge and Skills for University Success standards. Understanding why we need to prepare all children to be college and career ready is easy. Making it happen is not. Learn from those who have succeeded, and your students will reap the rewards.
