It balances coverage of traditional areas such as regional development and labour markets with insight into new and evolving topics like neoliberalism, consumption, creativity and alternative economic practices. The Peoples of the Caribbean Nicholas J. Saunders, 2005-12-16 A true first, this encyclopedia is the only comprehensive guide ever published on the archaeology and traditional culture of the Caribbean. In *The Peoples of the Caribbean*, archaeologist Nicholas J. Saunders assembles for the first time a comprehensive sourcebook on the archaeology, folklore and mythology of the entire region, charting a story 7,000 years in the making. Drawing on decades of study in the Caribbean and South America, Saunders explores landmark archaeological sites such as Caguana in Puerto Rico with its ceremonial architecture and ballcourts, and plantation sites such as Jamaica's Drax Hall. The author dives into the underwater archaeology of Spanish treasure galleons and untangles stories of cannibalism, zombies and hallucinogenic snuffing rituals. He examines the impact of key Europeans such as Christopher Columbus and introduces readers to the native people such as the Arawak who welcomed them. Bringing the story up to date, Saunders chronicles the struggle of the indigenous people from the Caribs of Dominica to the Taíno of the Dominican Republic, trying to reclaim and revitalize their historical cultural identity.

, 2005-11 Consumption and Its Consequences Daniel Miller, 2013-04-17 This is a book for those looking for different answers to some of today's most fundamental questions: What is a consumer society? Does being a consumer make us less authentic or more materialistic? How and why do we shop? How should we understand the economy? Is our seemingly insatiable desire for goods destroying the planet? Can we reconcile curbs on consumption with goals such as reducing poverty and social inequality? Miller responds to these questions by proposing feasible and, where possible, currently available alternatives drawn mainly from his own original ethnographic research. Here you will find shopping analysed as a technology of love, clothing that sidesteps politics in tackling issues of immigration. There is an alternative theory of value that does not assume the

economy is intelligent scientific moral or immoral We see Coca Cola as an example of localization not globalization We learn why the response to climate change will work only when we reverse our assumptions about the impact of consumption on citizens Given the evidence that consumption is now central to the way we create and maintain our core values and relationships the conclusions differ dramatically from conventional and accepted views as to its consequences for humanity and the planet
