Globalization and Language in Contact James Collins, Stef Slembrouck, Mike Baynham, 2009-12-29 An excellent study of linkages between the global and local demonstrating

opportunities and challenges for contemporary sociolinguistics *Globalization and Language Vitality* Cécile B. Vigouroux, Salikoko S. Mufwene, 2008-11-05 This book discusses the effects of globalization on languages in Africa In contrast to previous studies the contributors examine whether or not globalization is affecting African languages in the same ways and at the same rate in different countries and how local experiences of language change vary from place to place Rather than seeing English as the killer language par excellence the contributors probe ways in which languages are being used side by side to complement each other in some contexts while competing against European colonial languages in others The result is a diverse canvas of language vitality in the African context including matters of endangerment and loss through the lense of globalization in its various interpretations This book is a must read for students and researchers interested in language change and death and in the fate of European languages in the rest of the world **Language and Globalization** Ingrid Piller, Alexandra Grey, 2018-10-26 A relatively new yet flourishing field Language and Globalization can be confusing and difficult to navigate for students and scholars To help make sense of the diverse and voluminous scholarship this new four volume collection will include key research from a broad spectrum of disciplines but also from a wide range of geographical regional and historical contexts *Language and Culture on the Margins* Sjaak Kroon, Jos Swanenberg, 2018-10-03 This collection of thirteen essays examines sociolinguistic phenomena in a wide variety of marginal environments providing both an overview of globalizaiton on the margins and a foundation for an expanded understanding of the processes of linguistic and cultural changes at work in these settings Taking an expansive conceptual view of margins the volume is organized in three parts looking at examples of marginal spaces in the nation state in online environments and in the peripheries of urban locations globally to call attention to new and changing discursive genres patterns practices and identities emerging in these spaces as a result of contemporary mobilities the evolving global economy and socio political changes With previous research previously confined to the study of globalization in urban areas this volume opens the door for further research on the complex sociolinguistic processes resulting from globalization on the margins making this an ideal resource for students and scholars in sociolinguistics globalization and heritage studies new media anthropology and cultural studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution CC BY **Intercultural Contact, Language Learning and Migration** Barbara Geraghty, Jean Conacher, 2014-09-25 At the heart of this volume lies an exploration of what actually happens to languages and their users when cultures come into contact What actions do supra national institutions nation states communities and individuals take in response to questions raised by the increasingly diverse forms of migration experienced in a globalized world The volume reveals the profound impact that decisions made at national and international level can have on the lives of the individual migrant language student or speech community Equally it evaluates the broader ramifications of actions taken by migrant communities and individual language learners around issues of language learning language maintenance and

intercultural contact Reflecting Jan Blommaert's assertion that in a world shaped by globalization what is needed is a theory of language in society of changing language in a changing society this volume argues that researchers must increasingly seek diverse methodological approaches if they are to do justice to the diversity of experience and response they encounter

English in Business and Commerce Tamah Sherman, Jiri Nekvapil, 2018-05-07 This volume fills an important gap in exploring English in the domains of business and commerce through the prism of sociolinguistics and the sociology of language as opposed to analyzing business genres or taking a linguodidactic approach It expands the regional coverage of English in Europe with several studies based in Central Europe and also considers contexts which interact with Europe even though they are physically outside of it Asia Africa It addresses English as just one of several languages at play in the ecology of the countries It focuses not only on the position of languages as declared in documents of various organizations that is language policy but also everyday linguistic practices as observed in business contexts that is interactions The studies are divided into three thematic areas ideologies and discourses on English in the business sphere the management of English in business and organizational contexts and English and other languages on local and international labor markets It will be of interest to readers concerned with multilingualism in the economic sphere and the workplace and the interplay between macro and micro levels during the management of communication in organizations *Linguistic Superdiversity in Urban Areas* Joana Duarte, Ingrid Gogolin, 2013-12-18 Rapidly increasing migration flows contribute to the development of multiple forms of social and cultural differentiation in urban areas or to super diversity Language diversity is an important part of the resulting new social and cultural constellations Although linguistic diversity is not a new phenomenon per se the response of individuals or education systems to it is still largely based on a monolingual habitus associating one nation or a region within a nation to one language Building on the top quality expertise of researchers from different academic fields the volume offers insights into the study of linguistic diversity from linguistic and education science perspectives The studies derive from different countries different disciplines different research traditions and methodological approaches all aiming towards a better understanding of actual linguistic reality and its consequences for individual language development and for education The book addresses an academic readership and experts who are interested in learning more about linguistic diversity as an inevitable effect of globalisation and on ways to deal with this reality in research as well as practise in urban areas

Language Education and the Challenges of Globalisation Edith Esch, Martin Solly, 2014-06-02 This book by an international group of scholars focuses on a number of sociolinguistic issues some of them complex and controversial linked to language education in the age of globalisation It examines these in different contexts of immigration and super diversity in the light of new mobilities and new conceptualisations of changing social realities and language communities The various investigations presented in the volume are often united and interconnected in their approaches to these key areas of focus although each peer edited chapter brings its own relevance to the work as a whole and each reflects the complexities and

practices of the particular contexts and speech communities examined The insights presented provide a useful way of looking at the current state of the art of language education across the different levels of schooling and also within the various contexts analysed Because of the increasing interest in language education as a result of both the growing number of migrant children in schools and the globalisation associated with the rapid spread of English the volume will be of interest to a wide international readership including scholars and students of sociolinguistics and language education

Language, Media and Globalization in the Periphery Sender Dovchin, 2018-05-11 The title seeks to show how people are embedded culturally socially and linguistically in a certain peripheral geographical location yet are also able to roam widely in their use and takeup of a variety of linguistic and cultural resources Drawing on data examples obtained from ethnographic fieldwork trips in Mongolia a country located geographically politically and economically on the Asian periphery this book presents an example of how peripheral contexts should be seen as crucial sites for understanding the current sociolinguistics of globalization Dovchin brings together several themes of wide contemporary interest including sociolinguistic diversity in the context of popular culture and media in a globalized world with a particular focus on popular music and transnational flows of linguistic and cultural resources to argue that the role of English and other languages in the local language practices of young musicians in Mongolia should be understood as linguascapes This notion of linguascapes adds new levels of analysis to common approaches to sociolinguistics of globalization offering researchers new complex perspectives of linguistic diversity in the increasingly globalized world

The Power of Identity and Ideology in Language Learning Peter I. De Costa, 2016-05-09 This critical ethnographic school based case study offers insights on the interaction between ideology and the identity development of individual English language learners in Singapore Illustrated by case studies of the language learning experiences of five Asian immigrant students in an English medium school in Singapore the author examines how the immigrant students negotiated a standard English ideology and their discursive positioning over the course of the school year Specifically the study traces how the prevailing standard English ideology interacted in highly complex ways with their being positioned as high academic achievers to ultimately influence their learning of English This potent combination of language ideologies and circulating ideologies created a designer student immigration complex By framing this situation as a complex the study problematizes the power of ideologies in shaping the trajectories and identities of language learners

The Handbook of Language and Globalization Nikolas Coupland, 2010 The Handbook of Language and Globalization brings together important new studies of language and discourse in the global era consolidating a vibrant new field of sociolinguistic research

Language Policy and Language Planning Sue Wright, 2016-04-08 This revised second edition is a comprehensive overview of why we speak the languages that we do It covers language learning imposed by political and economic agendas as well as language choices entered into willingly for reasons of social mobility economic advantage and group identity

Language and the City Diarmait Mac Giolla Chríost, 2007-06-29 This book shows the effects of

globalization on language in social context identifying the city as the key site for the realization of these effects It challenges assumptions that hold sustainable linguistic diversity to be inherently non urban while regarding the city as an unproblematic site for understanding the social function of language Scientific Discourse and the Rhetoric of Globalization Carmen Pérez-Llantada, 2012-03-29 The rhetorical practices involved with the dissemination of scientific discourse are shifting Addressing these changes this book places the discourse of science in an increasingly multilingual and multicultural academic area It contests monolingual assumptions informing scientific discourse calling attention to emerging glocal discourses that make hybrids of the standard globalized and local academic English norms English clearly has a hegemonic role as the lingua franca of global academia this book conducts an intercultural rhetorical and textographic analysis to compare how Anglophone and non Anglophone academics utilise the standardized rhetorical conventions for scientific writing It takes an academic literacies approach providing a rhetorically and pedagogically informed discussion It enquires into the process of linguistic and rhetorical acculturation of both monolingual and multilingual scholars and in doing so redefines the contemporary rhetoric of science
