[With Illustrations.]** Nikolaus Pevsner, 1968 **The Source of Modern Architecture and Design** Nikolaus Pevsner, 1973 **Form and Function** Open University, 1975 Provides the evidence for an understanding of the intellectual climate from which the architecture and design of today have spring with writings of such influential authors as Louis Sullivan Adolf Loos Henry Van de Velde Hermann Muthesius Walter Gropius Le Corbusier Mies van der Rohe Bruno Taut and Frank Lloyd Wright *Modern Architecture and Design* Bill Risebero, 1983 British architect and planner Bill Risebero recreates 200 years of modern architecture and design against a backdrop of class dominance over rising industrialism The lively and opinionated text and more than 1 000 captioned drawings by the author provide a refreshing reinterpretation of architectural developments in the modern period *Sources of Modern Architecture* Dennis Sharp, 1981 **Twelve Modern Houses, 1945-1985** Graham Livesey, University of Calgary. Canadian Architectural Archives, Michael McMordie, Geoffrey Simmins, 1995 This publication part of the ongoing mandate of the Canadian Architectural Archives to examine the characteristics of Canadian architecture as reflected in the collections of the University of Calgary Library examines twelve architect created houses designed between the 1940s and the 1980s for several distinct regions of Canada The architects chosen number among the most prolific and best known in Canada who were working during this period including Raymond T Affleck Raymond Moriyama Arthur Erickson Douglas Cardinal John B Parkin Associates and Patkau Architects Other architects with perhaps a more regional reputation have also been included

such as the Vancouver based firm of McCarter Nairne Calgary's Jack Long and Edmonton's Peter Hemingway Apart from the documentation of the twelve houses drawings and photos there are interpretative essays on each A co authored introductory essay explores several related themes modernity the contemporary house approaches to landscape and the role of drawings in contemporary practice Le Corbusier, the Dishonest Architect Malcolm Millais, 2018-01-23 This is not a book for architects but for all those that have suffered consciously and unconsciously from modern architecture and have wondered how it came about This was largely due to one man an architect called Le Corbusier For some he was a genius but the truth is he was a sham a fake a charlatan whose only gift was for self publicity He was the most influential architect of the second half of the twentieth century his influence overwhelmed the architectural profession on a global scale who swallowed his publicity whole and still hold him in awe For the rest of the world the mere mortals his influence was disastrous as traditional buildings were destroyed and replaced by featureless boxes of varying sizes imposing a dreariness hitherto unimagined As usual it was the poor who suffered most as they were herded into tower blocks These were often grouped into estates that ringed many towns and cities which then degenerated into high rise slums with all the well known attendant social problems This book exposes the myths that surround Le Corbusier detailing the endless failures of his proposals and his projects These were due to his profound dishonesty both as a person and as an architect His legacy was an architectural profession that believed and still believe they were designing buildings based on logic functionality and honesty whereas they were doing the opposite The Imperfect City: On Architectural Judgment Samir Younes, 2016-03-03 If architectural judgment were a city a city of ideas and forms then it is a very imperfect city When architects judge the success or failure of a building the range of ways and criteria which can be used for this evaluation causes many contentious and discordant arguments Proposing that the increase in number and intensity of such arguments threatens to destabilize the very grounds upon which judgment is supposed to rest this book examines architectural judgment in its historical cultural political and psychological dimensions and their convergence on that most expressive part of architecture namely architectural character It stresses the value of reasoned judgment in justifying architectural form a judgment based on three sets of criteria those criteria that are external to architecture those that are internal to architecture and those that pertain to the psychology of the architect as image maker External criteria include philosophies of history or theories of modernity internal criteria include architectural character and architectural composition while the psychological criteria pertain to mimetic rivalry or rivaling desires for the same architectural forms Yet although architectural conflicts can adversely influence judgment they can at the same time contribute to the advancement of architectural culture *Journal of Contemporary Urban Affairs. Modern Architecture and the Sacred Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume *Modern Architecture and the Sacred* presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized

religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West Studies in Art, Architecture, and Design: Victorian and after Nikolaus Pevsner, 1908 **Mackintosh's Masterwork** Charles Rennie Mackintosh, 2004 Of the many practitioners of art nouveau in Great Britain Charles Rennie Mackintosh 1868 1928 has outlasted them all His work bridged the more ornate style of the later nineteenth century and the forms of international modernism that followed Like Frank Lloyd Wright with whom he is frequently compared he is known for so thoroughly integrating art and decoration that the two became inseparable His work has been honored by a major exhibition at the Metropolitan Museum of Art and his designs have proliferated to such an extent that they can be found reproduced in posters prints jewelry and even new buildings His most important project was the Glasgow School of Art which still functions as a highly prestigious art school This glorious building is visited each year by thousands of tourists from around the world Built over a dozen years beginning in 1897 the Glasgow School of Art is Mackintosh s greatest and most influential legacy This completely redesigned and heavily illustrated edition of Mackintosh s Masterwork has been greatly expanded and contains newly discovered material about both the early life of the architect and the formative years in which his plans for the School of Art were executed
