The Success Of Sanctions Lessons Learned From The Eu Experience:

The Success of Sanctions Asst Prof Francesco Giumelli, 2013-08-28 The effectiveness of sanctions cannot purely be measured by the way they change the behaviour of their intended target The degree to which sanctions constrain a rogue state's behaviour and the signals they send to future targets should also be prime considerations In this thought provoking book Francesco Giumelli measures the true effectiveness of EU sanctions against a range of states including Belarus Zimbabwe Moldova Uzbekistan the USA and China He demonstrates that focussing purely on behavioural change is limiting especially when considering the actions and motivations of an international organisation and develops a process to evaluate the direct and indirect impact of EU sanctions Giumelli demonstrates the many different ways sanctions have been used by the EU to produce positive direct and indirect results and provides a multi level framework to assess the success of sanctions in the future

A Tight Embrace Marco Zoppi, 2020-12-16 This book provides various examples showing how Europe and Africa can be conceptualized and researched as a single macro area connected by interrelated global and multilevel dynamics What types of relations characterize Europe and Africa today The nature of the connections is neither clear nor unilinear rather they appear dialectical multifaceted and pointing in different

directions This edited book explores narratives contemporary dynamics and historical legacies demonstrating the long standing relations between the continents suggesting that the entangled Euro African relations in multiple fields should be intended as a permanent condition for any analyses The authors provide various evidence of the fact that the two continents are deeply part of shared but uneven structures of global wealth and power Within those structures certain dynamics are constantly produced and reproduced yet new opportunities to subvert existing relations have also emerged recently Hence instead of proposing conceptual premises holding Africa and Europe as separate regions that get in touch at specific moments in time be it colonialism the Cold War globalization migration this book critically considers that each of the matters explored is anything but an episode in a more complex intertwined story that ultimately represents the explanatory framework for present Euro African relations

Regional Peacemaking and Conflict Management Carmela Lutmar, Benjamin Miller, 2015-11-06 This volume examines mechanisms for regional peacemaking and conflict management in Europe and the Middle East To date little research has been devoted to uncovering the conditions for peace and the factors that contribute to stabilizing the state of peace This volume assesses the factors that contribute to regional pacification the incentives that motivate states in

establishing peaceful relations and most importantly how regions become peaceful. It discusses the conditions under which various types of peace might emerge on a regional level and the factors most likely to determine the outcome. The book takes an innovative approach through a systematic comparison of two regions that are particularly prominent and important for the subject of regional pacification: Europe and the Middle East. While many believe that the European case is the indispensable model for peacemaking, others believe that these two regions are too different for Europe to be a useful framework for the Middle East. This volume occupies a middle ground between these two extreme positions. It argues that while a mindless copying of European models will not lead to peace in the Middle East, important insights can be gained from the most successful case of regional peacemaking to date. This work will be of much interest to students of regional security, peacemaking, conflict management, Middle East politics, European security, and IR in general.

The Routledge Economic History of War Jari Eloranta, Jeremy Land, Elina Kuorelahti, Price Fishback, 2025-05-30. The Routledge Economic History of War presents a broad overview of the latest research on the long-lasting changes and effects that collapsing security in international relations has had on the world's economies and societies. Arranged around five key themes: Fiscal and Military Capacity, Military Spending, Economic Effects of War, War and Institutions, and Business and War, this handbook features contributions from an international range of scholars on varying methodological approaches, theories, and geographical arenas. Encompassing a range of disciplinary approaches, the main focus is on how economic history can provide insights into the societal impact of war, addressing issues such as how war preparations and arms races affect government spending, the direct economic effects of war, and how societies adjust to the economic realities of rearmament and recovery. This volume also explores whether wars change or alter institutions such as governments, religion, and democracy. It also looks at what lessons we can learn from the past about military spending, state capacity, and the effects of war on both individual societies and global cooperation. Ultimately, this book provides a broad overview of the methodological, geographical, and multidisciplinary range of the economic history of war and demonstrates how war, economics, institutions, and society are inextricably linked throughout history.

The Conflict in Syria and the Failure of International Law to Protect People Globally

Jeremy Julian Sarkin, 2021-11-28 This book explores through the lens of the conflict in Syria why international law and the United Nations have failed to halt conflict and massive human rights violations in many places around the world which has allowed tens of millions of people to be killed and hundreds of millions more to be harmed The work presents a critical socio legal analysis of the failures of international law and the United Nations UN to deal with mass atrocities and conflict It argues that international law in the way it is set up and operates falls short in dealing with these issues in many respects The argument is that international law is state centred rather than victim friendly is to some extent outdated is vague and often difficult to understand and therefore at times hard to apply While various accountability processes have come to the fore recently processes do not exist to assist individual victims while the conflict occurs or the abuses are being perpetrated The book focuses on the problems of international law and the UN and in the context of the many enforced disappearances and arbitrary detentions in Syria why nothing has been done to deal with a rogue state that has regularly violated international law It examines why the responsibility to protect R2P has not been applied and why it ought to be used generally and in Syria It uses the Syrian context to evaluate the weaknesses of the system and why reform is needed It examines the UN institutional mechanisms the role they play and why a civilian protection system is needed It examines what mechanism ought to be set up to deal with the possible one million people who have been disappeared and detained in Syria The book will be a valuable resource for students academics and policy makers working in the areas of public international law international human rights law political science and peace and security studies **After the Great War** Phillip
