Ozanne,2013-09-13 In most countries whether secular or otherwise education and religion are closely interlinked and no
matter how hard the state tries it can be very difficult to remove the ties between them This book investigates the links
between education religion and politics The dominant feature in creating a common culture between peoples each of which
has its own distinct heritage and practices is religion Globalisation is leading to a redefinition of the state community and
local identity this latter often perceived as resistance against the forces of unity whether through culture economic activity or
language Recent world events have focused attention on the interplay between education religion and politics like never
before Even more pertinent is the fact that the involvement of politics in decisions about religion and education is often
central and impossible to disentangle Education and Religion covers all the major religious traditions Buddhist Christian
Jewish Hindu Muslim Sikh and cites global examples throughout the world It aims to understand the underlying complexities
in the struggle to reconcile education religion and politics in an informative and sensitive way This book was originally
published as a special issue of Comparative Education *Handbook of Food Fortification and Health* Victor R.
