Continuity and Discontinuity in Criminal Careers Paul E. Tracy, Kimberly Kempf-Leonard, 2013-11-21. It takes courage to do research on crime and delinquency. Such research is typically conducted in an atmosphere of concern about the problem it addresses and is typically justified as an attempt to discover new facts or to evaluate innovative programs or policies. When, as must often be the case, no new facts are forthcoming or innovative programs turn out not to work, hopes are dashed and time and money are felt to have been wasted. Because they take more time, longitudinal studies require even greater amounts of courage. If the potential for discovery is enhanced, so is the risk of wasted effort. Long term longitudinal studies are thought to be especially risky for other reasons as well. Theories, issues and statistical methods in vogue at the time they were planned may not be in vogue when they are finally executed. Perhaps worse, according to some perspectives, the structure of causal factors may shift during the execution of a longitudinal project such that in the end its findings apply to a reality that no longer exists. These fears and expectations assume an ever changing world and a corresponding conception of research as a more or less disciplined search for news. Such ideas belittle the contributions of past research and leave us vulnerable to theories, programs, policies and research agendas that may have only tenuous connections to research of any kind.

Desistance from Crime Michael Rocque, 2017-04-25. This book represents a brief treatise on the theory and research behind the concept of desistance from crime. This ever growing field has become increasingly relevant as questions of serious issues regarding sentencing, probation and the penal system continue to go unanswered. Rocque covers the history of research on desistance from crime and

provides a discussion of research and theories on the topic before looking towards the future of the application of desistance to policy The focus of the volume is to provide an overview of the practical and theoretical developments to better understand desistance In addition a multidisciplinary integrative theoretical perspective is presented ensuring that it will be of particular interest for students and scholars of criminology and the criminal justice system **Abstracts on Criminology and**
