Encyclopedia of Twentieth Century Architecture R. Stephen Sennott,2004 For more information including the introduction a full list of entries and contributors a generous selection of sample pages and more visit the Encyclope dia of 20th Century Architecture website Focusing on architecture from all regions of the world this three volume set profiles the twentieth century s vast chronicle of architectural achievements both within and well beyond the theoretical confines of modernism Unlike existing works this encyclopedia examines the complexities of rapidly changing global conditions that have dispersed modern architectural types movements styles and building practices across traditional geographic and cultural boundaries

The Grove Encyclopedia of American Art Joan M. Marter,2011 Arranged in alphabetical order these 5 volumes encompass the history of the cultural development of America with over 2300 entries

The Urban Project Leen Duin,2009 Summarizes the experiences particularly significant to those involved in design building thinking and managing the urban scene

The Fractal Dimension of Architecture Michael J. Ostwald,Josephine Vaughan,2016-09-01 Fractal analysis is a method for measuring analysing and comparing the formal or geometric properties of complex objects In this book it is used to investigate eighty five buildings that have been designed by some of the twentieth century s most respected and celebrated architects Including

designs by Le Corbusier Eileen Gray Frank Lloyd Wright Robert Venturi Frank Gehry Peter Eisenman Richard Meier and Kazuyo Sejima amongst others this book uses mathematics to analyse arguments and theories about some of the world's most famous designs Starting with 625 reconstructed architectural plans and elevations and including more than 200 specially prepared views of famous buildings this book presents the results of the largest mathematical study ever undertaken into architectural design and the largest single application of fractal analysis presented in any field The data derived from this study is used to test three overarching hypotheses about social stylistic and personal trends in design along with five celebrated arguments about twentieth century architecture Through this process the book offers a unique mathematical insight into the history and theory of design Nelson Goodman and Modern Architecture Kasper Lægring, 2024-07-19 This book orchestrates a convergence of two discourses from the 1960s Nelson Goodman's aesthetic theory on one side and critiques of modern architecture articulated by figures like Peter Blake Charles Jencks and Robert Venturi Denise Scott Brown on the other Grounded in Goodman's aesthetic theory the book explores his conceptual framework within the context of modern architecture At the heart of the investigation lies Goodman's concept of exemplification While his notion of denotation pertains to representational elements often ornaments in architecture exemplification accentuates specific formal properties at the expense of others including color spatial orientation transparency seriality and the like Supplemented by findings from phenomenology the book traces these effects in buildings notably those by Ludwig Mies van der Rohe Walter Gropius Le Corbusier and Frank Lloyd Wright all key figures in the critiques of modern architecture Employing Goodman's framework the book aims to address accusations of emptiness and alienation directed at modern architecture in the postwar era It illustrates that modern architecture symbolizes aesthetically in a fundamentally different way than architecture from earlier periods This book will be of interest to architects artists researchers and students in architecture architectural history theory cultural theory philosophy and aesthetics

Photographic Architecture in the Twentieth Century Claire Zimmerman, 2014-05-01 One hundred years ago architects found in the medium of photography so good at representing a building's lines and planes a necessary way to promote their practices It soon became apparent however that photography did more than reproduce what it depicted It altered both subject and reception as architecture in the twentieth century was enlisted as a form of mass communication Claire Zimmerman reveals how photography profoundly influenced architectural design in the past century playing an instrumental role in the evolution of modern architecture Her picture anthropology demonstrates how buildings changed irrevocably and substantially through their interaction with photography beginning with the emergence of mass printed photographically illustrated texts in Germany before World War II and concluding with the postwar age of commercial advertising In taking up photographic architecture Zimmerman considers two interconnected topics first architectural photography and its circulation and second the impact of photography on architectural design She describes how

architectural photographic protocols developed in Germany in the early twentieth century expanded significantly in the wartime and postwar diaspora and accelerated dramatically with the advent of postmodernism In modern architecture she argues how buildings looked and how photographs made them look overlapped in consequential ways In architecture and photography the modernist concepts that were visible to the largest number over the widest terrain with the greatest clarity carried the day This richly illustrated work shows for the first time how new ideas and new buildings arose from the interplay of photography and architecture transforming how we see the world and how we act on it *Las Vegas in the Rearview Mirror* Martino Stierli, 2013 An illustrated reevaluation of the seminal architectural manifesto *Learning from Las Vegas* It explores the significance of this controversial publication by situating it in the artistic architectural and urbanist discourse of the 1960s and 70s and by evaluating the book's enduring influence of visual studies and architectural research

Relearning from Las Vegas Aron Vinegar, Michael J. Golec, 2009 Evaluates for the first time one of the foundational works in architecture criticism Immediately on its publication in 1972 *Learning from Las Vegas* by Robert Venturi Denise Scott Brown and Steven Izenour was hailed as a transformative work in the history and theory of architecture liberating those in architecture who were trying to find a way out of the straitjacket of architectural orthodoxies Resonating far beyond the professional and institutional boundaries of the field the book contributed to a thorough rethinking of modernism and was subsequently taken up as an early manifestation and progenitor of postmodernism Architect Ruth Peltason, Grace Ong-Yan, 2017-11-07 In this completely revised and up to date edition the world's most accomplished architects Gehry Pei Meier Nouvel Piano and 37 more express their views on creativity inspiration and legacy in this visually stunning one of a kind collection The Pritzker Prize is the most prestigious international prize for architecture Architect includes all 42 recipients of the Pritzker Prize and captures in pictures and their own words their awe inspiring achievements Organized in reverse chronological order by laureate each chapter features four to six of the architect's major works including museums libraries hotels places of worship and more The text culled from notebooks interviews articles and speeches illuminates the architects influences and inspirations personal philosophy and aspirations for his own work and the future of architecture The book includes More than 1000 stunning photographs blueprints sketches and CAD drawings Architect offers an unprecedented view into the minds of some of the most creative thinkers dreamers and builders of the last three decades and reveals that buildings are political emotional and spiritual Digital Draw Connections Fabio Bianconi, Marco Filippucci, 2021-04-27 This book stems from the seminal work of Robert Venturi and aims at reprojecting it in the current cultural debate by extending it to the scale of landscape and placing it in connection with representative issues It brings out the transdisciplinary synthesis of a necessarily interdisciplinary approach to the theme aimed at creating new models which are able to represent the complexity of a contradictory reality and to redefine the centrality of human dimension As such the volume gathers multiple experiences developed in different geographical areas which come into connection with the role of

representation Composed of 43 chapters written by 81 authors from around the world with an introduction by Jim Venturi and Cezar Nicolescu the volume is divided into two parts the first one more theoretical and the other one which showcases real world applications although there is never a total split between criticism and operational experimentation of research

The Accidental Possibilities of the City Katherine Smith,2021-03-02 Claes Oldenburg's commitment to familiar objects has shaped accounts of his career but his associations with Pop art and postwar consumerism have overshadowed another crucial aspect of his work In this revealing reassessment Katherine Smith traces Oldenburg's profound responses to shifting urban conditions framing his enduring relationship with the city as a critical perspective and conceiving his art as urban theory Smith argues that Oldenburg adapted lessons of context gleaned from New York's changing cityscape in the late 1950s to large scale objects and architectural plans By examining disparate projects from New York to Los Angeles she situates Oldenburg's innovations in local geographies and national debates In doing so Smith illuminates patterns of urbanization through the important contributions of one of the leading artists in the United States Denise Scott Brown In Other Eyes Frida Grahn,2022-10-24 50 years Learning from Las Vegas From the bustle of Johannesburg to the neon of Las Vegas Denise Scott Brown's advocacy for messy vitality has transformed the way we look at the urban landscape Unconventional eloquent and with a profound sociopolitical message Scott Brown is one of our era's most influential thinkers on architecture and urbanism The anthology Denise Scott Brown In Other Eyes marking the 50th anniversary of the seminal treatise Learning from Las Vegas paints a portrait of Scott Brown as seen through the eyes of leading architectural historians and practitioners It features new scholarship on her education on three continents her multidisciplinary teaching and her use of urban patterns and forces as tools for architectural design a practice documented in a new comment by Scott Brown noting that sometimes 1 1 2 With contributions by Mary McLeod Joan Ockman Sylvia Lavin Stanislaus von Moos Jacques Herzog Robin Middleton and Denise Scott Brown among others A comprehensive portrait of one of contemporary architecture's most significant personalities *Diplomatic: Letter from the Architectural Enclave* Jie Zhang,2015-01-15 Seeing Architecture as a political art this book concerns itself with boundaries those of regimes of culture of law and of social strata In a silent crisis where sustained inscription of physical and social boundaries evacuates urban space into archipelagos of enclaves Architecture with only ambiguous claims of public space is rendered both an accomplice and a victim impotent against forces of capital and concerns of security Exposing the absurdities in urban geopolitics and persistent spatial logics of exclusivity is as important as proposing to hack into them Critical of the innocence of so called public space and the underlying architectural impasse the book offers an investigative commentary on the state of urban enclaves while speculating on alternative strategies by designing an embassy a bounded pseudo extraterritory and the epitome of an enclave Through absurd couplings and blatant image making a seemingly open US embassy is proposed for Beijing as an imploded fragment of a boundary its incompleteness buttressed by other territories of privilege and its disparate barriers articulated as

a mechanism of filtration Away from popular strategies of conceptual and spatial blurring the book defines an architectural porosity to orchestrate spaces of varying openness as a nuanced response to both the embassy's double identities and schizophrenic agendas of city building With an architecture that is diplomatic by function and diplomatic by disposition one experiments with an agency beyond the single pursuit of publicness and an escape from the ideological enclave of positivism Ultimately the goal is to suggest and develop a methodology of designing with oppositions irony and latency

American Democracy and the Pursuit of Equality Merlin Chowkwanyun, Randa Serhan, 2016-01-08 This collection assembles some of the country's foremost social scientists in one volume It contains diverse investigations of metropolitan transformation recent education policy the injustice of disaster relief the politics of aesthetics and design immigration the mass media social movements and the practice of social science itself among others Whatever their subjects the writers investigate the promise and constraints of democratic practice in a time of disturbing growth in inequality and political disempowerment Although they at times differ from one another more often they challenge popular received wisdom on a number of these topics Cumulatively the volume amounts to a critical sociological excavation of the United States from its leading social critics that will prove useful to specialists and general readers alike

Interior Design Masters Mark Hinchman, Elyssa Yoneda, 2018-06-27 Interior Design Masters contains 300 biographical entries of people who have significantly impacted design They are the people historical and contemporary that students and practitioners should know Coverage starts in the late Renaissance with a focus on the twentieth and twenty-first centuries The book has five sections with the entries alphabetical in each so it can serve as a history textbook and a reference guide The seventeenth and eighteenth-century section covers figures from Thomas Chippendale to Horace Walpole The nineteenth-century section includes William Morris and Candace Wheeler The early twentieth-century section presents modernism's design heroes including Marcel Breuer Eileen Gray and Gilbert Rohde The post-World War II designers range from Madeleine Castaing to Raymond Loewy The final contemporary section includes Ron Arad and the Bouroullec brothers These are the canonical figures who belong to any design history The book also contains less well-known figures who deserve attention such as Betty Joel the British art deco furniture designer Paul Veyseyre the Frenchman active in China in the 1930s and more recently Lanzavecchia Wai the Italian-Singaporean duo whose work ranges from health care to helicopters Global in its coverage the book is richly illustrated with over 600 black and white and color photographs

To Scale Eric J. Jenkins, 2008 This powerful reference features one hundred famous urban plans all drawn to the same scale each accompanied by a one-page summary of the site discussing its history design and lessons for future urban design

North American Architecture Trends, 1990-2000 Luca Molinari, 2001 This book contains a selection of 18 projects completed in North America by American architects and offers the broadest possible overview of the vast and complex architectural output of the 1990s This decade marked an important transitional phase and the metamorphosis of the work of the American masters of the 1960s and 1970s e.g. Robert

Venturi Cesar Pelli Charles Gwathmey with the full affirmation of new masters e g Frank Gehry Steven Holl and Peter Eisenman and the emergence of new generations represented by Asymptote William and Tsien Ro To and Erik Owen Moss This journey through contemporary American architecture also tries to tell of a new geographical complexity no longer restricted to the major urban centres the traditional locations for avant garde architecture e g New York and Los Angeles It has thus been extended to show the work of the Patkau group in Canada Will Bruder in Arizona and Antoine Predock in New Mexico as new examples of research attentive to traditional production and to the context Also of interest are the various building types represented ranging from new museum complexes e g Richard Meier s Getty Center Robert Venturi s ethnographic museum in Seattle and Frank Gehry s Weisman Art Center to residential projects e g Erik Owen Moss s Samitaur a New York residence by William and Tsien and the Carlson Reges residence in Los Angeles by Ro To and a number of public works such as Bruder s new library in Phoenix the extension of the New York Stock Exchange by Asymptote and Steven Holl s chapel of St Ignatius in Seattle **Archis** ,2001

Venturi Scott Brown And Associates Buildings And Projects 1986 1998 Book Review: Unveiling the Power of Words
