The War Against Population The Economics And Ideology Of World Population Control:

The War Against Population Jacqueline Rorabeck Kasun, 1988 The War Against Population Jacqueline Rorabeck Kasun, 1987-03-01 *The War Against Population* Jacqueline Rorabeck Kasun, 1999 Challenges the assumption that unchecked human population growth will lead to social and economic disaster **The Sterilization Movement and Global Fertility in the Twentieth Century** Ian R. Dowbiggin, 2008-04-11 Many would be surprised to learn that the preferred method of birth control in the United States today is actually surgical sterilization This book takes an historical look at the sterilization movement in post World War II America a revolution in modern contraceptive behavior Focusing on leaders of the sterilization movement from the 1930 s through the turn of the century this book explores the historic linkages between environment civil liberties eugenics population control sex education marriage counseling and birth control movements in the 20th century United States The Bolivian Revolution and the United States, 1952 to the Present James F. Siekmeier, 2011 A study of United States Bolivian in the post World War II era Explores attempts by Bolivian revolutionary leaders to both secure United States assistance and to obtain time and space to develop their policies and plans Provided by publisher **Moving Health Sovereignty in Africa** Andrew F. Cooper, Hany Besada, 2016-04-15 Today s era of intense globalization has unleashed dynamic movements of people pathogens and pests that overwhelm the static territorial jurisdictions on which the governance provided by sovereign states and their formal intergovernmental institutions is based This world of movement calls for new ideas and institutions to govern people s health above all in Africa where the movements and health challenges are the most acute This book insightfully explores these challenges in ways that put the perspectives of Africans themselves at centre stage It begins with the long central and still compelling African health challenge of combating the pandemic of HIV AIDS It then examines the global governance responses by the major multilateral organizations of the World Bank and the World Trade Organization and the newer informal flexible democratically oriented ones of the Group of Eight It also addresses the compounding health challenge created by climate change to assess both its intensifying impact on Africa and how all international institutions have largely failed to link climate and health in their governance response It concludes with several recommendations about the innovative ideas and institutions that offer a way to closing the great global governance gaps and thus improving Africans health and that of citizens beyond **Economic Integration and Development in Africa** Henry Kyambalesa, Mathurin C. Hounnikpo, 2016-04-29 The debates over what African economic integration and development actually entails continue across international economic organizations national governments and NGOs Despite the glare of media attention and the position this issue has on international political agendas few comprehensive accounts exist that fully examine why this process will be inevitable in the 21st century and how integration of national economies can be attuned to attaining the socio economic goals and aspirations of member countries This book addresses this problem It combines theory with application

enumerating the imperatives and initiatives governments will be forced to confront providing insights for educators and students in African development for policy makers in African governments and for inter governmental organizations

Renewal Colbert Rhodes,2017-07-11 Offering a deep look into the moral uncertainty in the contemporary social sciences and American society this book explores an in depth solution This solution as articulated by Pitirim A Sorokin in the 20th century is the theory of Integralism a perspective dating back to Plato Aristotle and Aquinas Sorokin initially applied Integralism by locating and analyzing three dominant super socio cultural systems over 2500 years of Graeco Roman and Western history Each super system was unified by a central philosophical principle based either on materialism the senses or the rational or the supersensory super rational A super system declines when it reaches the limits of its potential to achieve its true reality and value to be replaced by another super system Sorokin described a trendless rotation of the three super socio cultural systems The current dominant super socio cultural system in the West is a materialist version emphasizing science and technology with little thought given to supersensory super rational reality Sorokin asserted contemporary materialist culture was in a state of collapse due to the breakup of its moral values As a consequence he saw a struggle for power occurring between egoistic individuals and groups often resulting in revolutions wars and inter human strife In response to the one sided materialist view of reality the goal of Integralism is to unify all three forms of reality into an integral culture that harmoniously balances materialist and supersensory super rational orientations A solution to the contemporary moral confusion Sorokin argued can be found in the application of supra conscious intuition that would enable a human to know what is eternal in the ordinary and reach the transcendent an experience not accessible to the senses or the rational intellect alone The supra conscious is the source for reaching the supreme moral value creative unselfish altruism which can be shared by all cultures to produce peace and harmony in the world *Forum for Applied Research and Public Policy* ,1997

Margaret Sanger's Eugenic Legacy Angela Franks,2005-02-11 Margaret Sanger the American birth control and population control advocate who founded Planned Parenthood stands like a giant among her contemporaries With her dominating yet winning personality she helped generate shifts of opinion on issues that were not even publicly discussed prior to her activism while her leadership was arguably the single most important factor in achieving social and legislative victories that set the parameters for today s political discussion of family planning funding population control aid and even sex education This work addresses Sanger s ideas concerning birth control eugenics population control and sterilization against the backdrop of the larger eugenic context **International Population Assistance Programs**

United States. Congress. Senate. Committee on Finance. Subcommittee on Social Security and Family Policy,1997 **Faith Facts** Leon J. Suprenant,2004 Where did the Mass come from What is an annulment Where is heaven Is there salvation outside the Catholic Church In today s world Catholics must be ready at any moment to face unexpected questions about the teaching of the Church Faith Facts II is a valuable resource for anyone who needs answers on topics that are crucial to belief

and evangelization Emmaus Road delivers another great resource on the Catholic faith It s a gold mine that helps save you time and effort it should be on every Catholic s bookshelf Z E ROMANOWSKY CRISIS Magazine **The Global**

Bourgeoisie Christof Dejung,David Motadel,Jürgen Osterhammel,2019-11-26 This essay collection presents a global history of the middle class and its rise around the world during the age of empire It compares middle class formation in various regions highlighting differences and similarities and assesses the extent to which bourgeois growth was tied to the increasing exchange of ideas and goods and was a result of international connections and entanglements Grouped by theme the book shows how bourgeois values can shape the liberal world order **Future Survey Annual 1990** Michael

Marien,1990-01-01 **Review of Austrian Economics, Volume 10** Murray Rothbard,1997 *Ideology, Social Theory, and the Environment* William D. Sunderlin,2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity **Population and Development in Poor Countries** Julian Lincoln Simon,2014-07-14 Making

the case that population growth does not hinder economic progress and that it eventually raises standards of living Julian Simon became one of the most controversial figures in economics during the past decade This book gathers a set of articles theoretical empirical and policy analyses written over the past twenty years which examine the effects of population increase on various aspects of economic development in less developed economies The studies show that within a century or even a quarter of a century the positive benefits of additional people counterbalance the short run costs The process is as follows increased numbers of consumers and the resultant increase of total income expand the demand for raw materials and finished products The resulting actual and expected shortages force up prices of the natural resources The increased prices trigger the search for new ways to satisfy the demand and sooner or later new sources and innovative substitutes are found These new discoveries lead to cheaper natural resources than existed before this process began leaving humanity better off than if the shortages had not appeared Originally published in 1992 The Princeton Legacy Library uses the latest print on

demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Catholic Social Ethics Stephen Scrimenti, 2005-04 This book provides the reader with an ethical context based on knowledge adequate understanding and immediate application of Catholic principles so one can make daily decisions for the individual group organization culture and society as a whole The spiritual health of the individual is promoted with an extension to the larger society involving good and holy behavior i e error less behavior toward perfection GOD In this manner one can become fully human The book is an update from the original primer on ethics

Beyond the Numbers Laurie Ann Mazur, 2013-04-16 Beyond the Numbers presents a thought provoking series of essays by leading authorities on issues of population and consumption The essays both define the poles of debate and explore common ground beyond the polarized rhetoric Specific chapters consider each of the broad topics addressed at the International Conference on Population and Development held in September 1994 in Cairo Egypt The essays are supplemented by sidebars and short articles featuring more impassioned voices that highlight issues of interest not fully explored in the overviews As well as providing a sense of the difficulties involved in dealing with these issues the essays make clear that constructive action is possible Topics covered include the interrelationships between population economic growth consumption and development the history of population and family planning efforts gender equality and the empowerment of women reproductive rights reproductive health family planning health and mortality

The War Against the Family William D. Gairdner, 2007-08 Inspired by his own passionate experience as a son husband and father Gairdner offers in this book a forum for a long overdue debate about the future of the family in Western civilization
