Work-Life Balance in Architecture Igea Troiani, 2024-03-04 This book seeks to improve the work lives of architects of diverse demographics who do not fit or want to replicate the traditional 24/7 white male architect lifestyle. Aimed at a workforce whose life and career expectations have changed drastically in recent years, it helps readers of different generations to make informed choices about their careers, enabling students, educators, and professionals to prioritise wellbeing and offer their design and practice voice to enhance a built environment for all. *Work-Life Balance in Architecture* examines what it means to play the game of architecture, to choose to study and pursue a career in architecture rather than another profession. The book shows the economic, social, and professional structures within which architectural education and practice operate and reveals the impact of a corporate neoliberal big business mentality on wellbeing. After setting out the context, exacerbating work-life imbalance, the book discusses the paths an architect may take, whether this leads to a career in practice or not in architecture at all, and how alternative gameplay moves can advantage or disadvantage those of different gender, class, ethnicity, race, or age at different career stages. It concludes by examining how the places in which an architect works, the time available to work, and critiques of perpetual neoliberal economic growth can enhance the lives of all architects today.

The Coveted Westside Jennifer Mandel, 2022-03-29 From the middle of the nineteenth century as Euro-Americans moved westward, they carried with them long-held prejudices against people of color. By the time they reached the West Coast, their new settlements included African Americans and recent Asian immigrants as well as the indigenous inhabitants and descendants of earlier Spanish and Mexican settlers. *The Coveted Westside* deals with the settlement and development of Los Angeles in the context of its multiracial, multiethnic population, especially African Americans. Mandel exposes the enduring struggle between Whites determined to establish their hegemony and create residential heterogeneity in the growing city and people of color equally determined to obtain full access to the city and the opportunities, including residential, that it offered. Not only does this book document the Black homeowners' fight against housing discrimination, it shares personal accounts of Blacks' efforts to settle in the highly desirable Westside of Los Angeles. Mandel explores the White-derived social and legal mechanisms that created this segregated city and the African American-led movement that challenged efforts to block access to fair housing.
