Transboundary Risk Governance Earthscan Risk In Society:

Transboundary Risk Governance Rolf Lidskog, Linda Soneryd, Ylva Uggla, 2009-12-01 Governing environmental risk particularly large scale transboundary risks associated with climate change and pollution is one of the most pressing problems facing society This book focuses on a set of key questions relating to environmental regulation How are activities regulated in a fragmented world a world of nation states regulators domestic and international law and political contests and one in which a range of actors such as governments corporations and NGOs act in order to influence regulations in specific policy areas How are complex and trans boundary environmental issues managed What role does expert knowledge play in regulating this kind of issues What give rules authority In short how do actors try to render an issue governable Drawing on regulation theory discourse theory and science and technology studies and employing original research the authors analyse the regulation of four kinds of complex and trans boundary environmental issues oil protection in the Baltic Sea mobile phones and radiation protection climate change adaptation and genetically modified crops The outcomes include insights for policymakers regulators and researchers into how dominant frames are constructed legitimate actors are configured and authority is established This in turn exposes the conditions for and possibility of developing regulation making authoritative rules and shaping relevant knowledge in order to govern complex environmental risks

Random Contractions in Global Risk Governance Panagiotis T. Artikis, Constantinos T. Artikis, 2022-01-31 This book contributes to the area of ongoing global risks and the area of forthcoming global risks particularly necessary for the implementation of very important interdisciplinary research activities Global risks are defined in this study as having a global geographical scope an inter industrial presence and exceptionally critical stages of economic and social participation that necessitate a major multi stakeholder input In addition global risks demand an extremely extensive priority in decision making allowance The theoretical and practical results of this work are strongly connected to several quite useful factors The present work mainly concentrates on the contribution of probability theory in the advancement of the practical applicability of global risk governance More precisely the work introduces structural stochastic concepts and fundamental stochastic results for the formulation of stochastic models of various global risk governance operations particularly valuable in proactive treatment of several groups of global risks

The Risk Society Revisited Eugene Rosa, Ortwin Renn, Aaron McCright, 2014 Risk is a part of life How we handle uncertainty and deal with potential threats influence decision making throughout our lives In *The Risk Society Revisited* Eugene A Rosa Ortwin Renn and Aaron M McCright offer the first book to present an integrated theory of risk and governance The authors examine our sociological understanding of risk and how we reconcile modern human conditions with our handling of risk in our quest for improved quality of life They build a new framework for understanding risk one that provides an innovative connection between social theory and the governance of technological and environmental risks and the sociopolitical challenges they pose for a sustainable future Showing how our consciousness

affects risk in the decisions we make as individuals and as members of a democratic society The Risk Society Revisited makes an important contribution to the literature of risk research Governance, Risk and Financial Impact of Mega Disasters

Akiko Kamesaka, Franz Waldenberger, 2019-11-23 This book addresses researchers practitioners and policy makers interested in understanding the financial implications of mega disaster risks as well as in seeking possible solutions with regard to governance the allocation of financial risk and resilience The first part of this book takes the example of Japan and studies the impact of mega earthquakes on government finance debt positions of private household and businesses capital markets and investor behavior by way of economic modeling as well as case studies from recent major disasters In Japan the probability of a mega earthquake hitting dense agglomerations is very high Like other large scale natural disasters such events carry systemic risks i e they can trigger disruptions endangering the stability of the social economic and political order The second part looks at the experience of the Japanese government as a provider of disaster risk finance and an active partner in international collaboration It concludes with an analysis of the general characteristics of systemic risk and approaches to improve resilience *Transboundary Risk Management* Joanne Linnerooth-Bayer, 2017-08-15 Environmental hazards do not respect international boundaries In this volume distinguished international researchers make a significant contribution to the understanding and management of transboundary environmental risks The transboundary risk topics addressed highlight the key political economic social and cultural issues of our times such as how transboundary risks are constructed how they are communicated within and between countries how the authorities can build trust in political management processes and what forms of democratic risk management institutions are appropriate Useful practical lessons on the management of transboundary risk at the national and international levels are drawn from the case studies The volume provides valuable evidence and analysis for those working on international environmental issues and all aspects of risk management

Judgment and Decision Making Baruch Fischhoff, 2013-06-17 Behavioral decision research offers a distinctive approach to understanding and improving decision making It combines theory and method from multiple disciplines psychology economics statistics decision theory management science It employs both empirical methods to study how decisions are actually made and analytical ones to study how decisions should be made and how consequential imperfections are This book brings together key publications selected to represent the major topics and approaches used in the field Put in one place with integrating commentary it shows the common elements in a research program that represents the scope of the field while offering depth in each Together they provide a vision for what has become a burgeoning field **Regulation**

of Risk Abhinayan Basu Bal, Trisha Rajput, Gabriela Argüello, David Langlet, 2022-12-28 Regulation of Risk provides comprehensive insight into regulation of risk in transport trade and environment Contributions provide national regional and international perspectives on pressing questions How is risk conceived in light of novel technological deployment climate change political upheaval evolving geopolitics and the COVID 19 pandemic What legal tools such as contractual frameworks

and governance structures are available to manage the changing landscape of risk This book highlights the importance of dialogue and collaborative decision making on risk between policymakers institutions societal stakeholders and the scientific community *Air Pollution Governance in East Asia* Kuei-Tien Chou,Koichi Hasegawa,Dowan Ku,Shu-Fen Kao,2022-04-19 Focusing on Taiwan South Korea Japan and Mainland China the contributors to this book analyze various cases of air pollution within East Asia Air pollution in East Asia is a major health risk which also has damaging impacts on the environment leading to impacts on society economic growth and welfare While existing laws and policies have made progress in alleviating air pollution in each country in the region the protection of favorable environments and the resolution of transboundary air pollution problems have become major targets of regional cooperation Combining perspectives from social sciences and science technology and society studies the contributors to this book examine both the technical and socioeconomic political aspects of these challenges through a range of case studies from around the region The book is a valuable read for researchers and policymakers looking at air pollution and transboundary governance challenges within and beyond East Asia

The Tolerability of Risk Frederic Boudier,David Slavin,2013-09-05 There is an increasing dissatisfaction about how risk is regulated leading to vivid debates about the use of risk assessment and precaution As a result academics government officials and industry leaders are calling for new approaches and fresh ideas This book provides a historical and topical perspective on the alternative concept of Tolerability of Risk and its concrete regulatory applications In the UK Tolerability of Risk has been developed into a sophisticated framework particularly within the health and safety sectors It is expected to guide decision makers when applying their legal obligation of keeping risks as low as practically reasonable Could Tolerability of Risk become a wider source of inspiration across the full scope of risk analysis and management Written by leading academics and risk practitioners from industry and government The Tolerability of Risk presents a summary of theoretical perspectives on risk approaches providing a detailed elicitation of the methods and approaches used to build the Tolerability of Risk framework and examining the prospect of universal application of that framework From nuclear power to environmental pollution climate change and drug testing the Tolerability of Risk framework may offer a workable pragmatic solution for balancing risks against the costs involved in controlling them as well as developing the institutional capacity to make effective decisions in all jurisdictions worldwide

Arthur James Wells, 2005 **Managing Water Under Uncertainty and Risk** Unesco, 2012 This flagship report is a comprehensive review that gives an overall picture of the world's freshwater resources. It analyses pressures from decisions that drive demand for water and affect its availability. It offers tools and response options to help leaders in government, the private sector and civil society address current and future challenges. It suggests ways in which institutions can be reformed and their behaviour modified and explores possible sources of financing for the urgently needed investment in water. The WWDR4 is a milestone within the WWDR series reporting directly on regions and highlighting hotspots and it has been mainstreamed for gender equality. It introduces a thematic approach. Managing Water under Uncertainty and Risk in the context of a world which is changing faster than ever in often unforeseeable ways with increasing uncertainties and risks. It highlights that historical experience will no longer be sufficient to approximate the relationship between the quantities of available water and shifting future demands. Like the earlier editions the WWDR4 also contains country level case studies describing the progress made in meeting water related objectives. The WWDR4 also seeks to show that water has a central role in all aspects of economic development and social welfare and that concerted action via a collective approach of the water using sectors is needed to ensure water's many benefits are maximized and shared equitably and that water related development goals are achieved **Long Range Planning** Society for Long Range Planning,
