Transforming For Stabilization And Reconstruction Operations:

Transforming for stabilization and reconstruction operations , Transforming for Stabilization and Reconstruction Operations Hans Binnendijk, Stuart E. Johnson, 2004 **Transforming for Stabilization and Reconstruction Operations** Hans Binnendijk, Stuart Johnson, 2012-07-23 Recent military operations in Afghanistan and Iraq were characterized by the rapid defeat of enemy military forces by relatively small deployments of American forces and by a very limited destruction of the critical civilian infrastructure This success can be credited in large part to the ongoing transformation of the U S military evident in its effective use of information superiority precision strike and rapid maneuver on the battlefield **Reshaping the Expeditionary Army to Win Decisively: The Case for Greater Stabilization Capacity in the Modular Force** , 2005 Today the U S Army is decisively engaged in both fighting an unfamiliar type of war and transforming itself to meet the challenges of future warfare But what are those challenges What capabilities does U S strategy demand of its military instrument Where are the major capability gaps and how should they inform Army Transformation to ensure the future expeditionary Army has the right campaign qualities This paper argues that the major capability gap in today s force and vital for future campaigns is the ability to conduct stabilization It begins with exploring the changes in U S strategy that are the impetus behind the need for greater capacity to conduct post conflict stabilization and reconstruction Then it analyzes the emerging role of the Army in post conflict operations in the context of modern combat to more fully understand the specific requirements of stabilization The paper then develops an operational concept progressive stabilization that complements the Army s concept of rapid decisive operations while improving its ability to contribute to long term conflict resolution It outlines three key force attributes an expeditionary force structure must have to provide the requisite mix of combat and stabilization capabilities Finally this paper builds on those attributes to suggest three areas where Army leaders must make near term adjustments in the Modular Force to ensure the nation has a truly expeditionary force with the campaign capacity for both rapid decisive operations and stabilization **Peacekeeping and Stability Issues** Keith D. Gerbick, Marjorie Ann Browne, Nina M. Serafino, Martin A. Weiss, 2007 As the international political climate grows increasingly volatile peacekeeping operations have become a mainstay in troubled regions The alternative to military occupation is either to train indigenous police forces or to hire security corporations Policy makers are worried that these forces are not capable of maintaining peace In addition moral and legal issues are factors for policy makers that are debating the extent to which peacekeeping forces should be allowed to infiltrate societies in turmoil Other issues of concern that this book examines are the United States relationship with the U N and the World Bank as all three pursue their different responsibilities in peacekeeping *U.S. Army War College Guide to National Security Issues: National security policy and strategy* J. Boone Bartholomees, 2008 The U S Army War College Guide USAWC to National Security Issues is the latest edition of the U S Army War College Guide to National Security Policy and Strategy which the college has published sporadically under different

titles since 2001 This edition of the Guide is in two volumes that correspond roughly to the two core courses that the Department of National Security and Strategy DNSS teaches Theory of War and Strategy and National Security Policy and Strategy Page vii The U.S. Army War College Guide to National Security Issues ,2010 *Peacekeeping and Related Stability Operations* Nina M. Serafino,2005 One of the most crucial and difficult tasks in peacekeeping and related stability operations is creating a secure and stable environment both for the foreign peacekeepers and for the indigenous population During the past decade the United States and the international community have tried various approaches to providing that security Most of these approaches have included the use of United Nations International Civilian Police UNCIVPOL whose forces are contributed on a case by case basis by UN member states While other countries usually contribute police personnel from their own national forces the United States contracts those it contributes through a private corporation In a few cases such as Afghanistan and Iraq at this time coalition and US military forces and not the United Nation train and work with indigenous police forces to provide security This book presents an up to date evaluation of current issues in peacekeeping *A Nation at War in an Era of Strategic Change* Williamson Murray,2004 The President Secretary of Defense and the Army s Chief of Staff have all stated that the United States is a Nation at War The U S military faces significant strategic challenges as it continues to transform the force and improve interagency integration into joint operations all the while engaging in active combat operations associated with the Global War on Terrorism This collection of outstanding essays three of which won prestigious writing awards by the students enrolled in the Army War College s Advanced Strategic Art Program ASAP highlight some of these strategic challenges and offer thoughtful solutions They provide insights that will undoubtedly prove useful to decisionmakers at the highest levels of our national security establishment ASAP graduates continue to make their mark as outstanding theater strategists in the Office of the Secretary of Defense the Joint Staff and Army Staff and in the Combatant Commands *Negotiation in the New Strategic Environment* David M. Tressler,2007 In stability security transition and reconstruction SSTR operations like the U S mission in Iraq negotiation is a common activity The success or failure of the thousands of negotiations taking place daily between U S military officers and local civilian and military leaders in Iraq affects tactical and operational results and the U S military s ability to achieve American strategic objectives By training its leaders especially junior ones to negotiate effectively the U S military will be better prepared to succeed in the increasingly complex operations it is conducting in Iraq as well as the ones it will face in the new strategic environment of the 21st century This monograph analyzes the U S Army s current predeployment negotiation training and compares it with the negotiating experience of U S Army and Marine Corps officers deployed to Iraq The author argues that successfully adapting to the nature of the contemporary operating environment requires changes that include increased training in negotiation Based on interviews with U S officers the author identifies three key elements of negotiation in SSTR operations and offers recommendations for U S soldiers to consider when

negotiating with local Iraqi leaders for U S military trainers to consider when reviewing their predeployment negotiation training curriculum and for the Army and Marine Corps training and doctrine commands to consider when planning and structuring predeployment training

Building Operation Readiness in Foreign Affairs Agencies United States. Congress. Senate. Committee on Foreign Relations, 2004 Hearings held on S 2127 Stabilization and Reconstruction Civilian Management Act

Military Transformation and Modern Warfare Elinor Sloan, 2008-02-28 Military transformation can be understood as comprising three overlapping and sometimes competing layers the conventional force dominated revolution in military affairs a more recent irregular warfare emphasis and a wider dimension including homeland defense space and nuclear policy The Western world is currently focusing its attention on transformation s middle layer while China and Russia are focusing on the RMA and transformation s wider aspects This dynamic indicates the United States and its allies should continue to prepare for the full range of conflicts This book establishes the meaning of military transformation assesses the manner in which certain countries are transforming their military forces discusses the relevancy of transformation efforts to modern conflict and in drawing out the key areas of emphasis on the part of various countries provides a window on the future global security environment It is divided into seven chapters plus a conclusion The first chapter focuses on the meaning of military transformation establishing a framework through which national militaries can be examined This comprises transformation s revolution in military affairs components its newer special operations forces counterinsurgency and stabilization and reconstruction aspects and its wider homeland defense space and deterrence dimensions The book devotes two chapters to the United States and one each to China Russia and NATO It also has a chapter that looks individually at each of Australia Britain Canada France and Germany An assessment of the relevancy of force transformation to modern warfare is integrated into the discussion of what transformation means how the United States is responding and the concluding chapter The book contains a biographical sketch of Andrew Marshall Andrew Krepinevich William Owens Arthur Cebrowski Donald Rumsfeld and Thomas Barnett all of whom have been involved in some aspect of military transformation

Cyberpower and National Security Franklin D. Kramer, Stuart H. Starr, Larry K. Wentz, 2009 This book creates a framework for understanding and using cyberpower in support of national security Cyberspace and cyberpower are now critical elements of international security United States needs a national policy which employs cyberpower to support its national security interests

A Nation at War in an Era of Strategic Change , *Conflict Transformation, Peacebuilding, and Storytelling* Laura E. Reimer, Katerina Standish, Chuck Thiessen, 2018-09-15 This book serves as an important link between conflict resolution practice and education by providing research from the unique perspective and approach of the Arthur V Mauro Centre for Peace and Justice one of the world s leading academic programs for PACS research storytelling peacebuilding and conflict transformation Each chapter presents original research in critical issues in the field of PACS and provides recent research for the future development of the field and the education of its practitioners

and academics The book has a wide audience targeting students at the undergraduate graduate and post graduate levels It also extends to those working in and leading community conflict resolution efforts as well as humanitarian aid workers Exploring the issues facing the field provides a means by which academics students and practitioners can develop theory practice pedagogy and methodology to confront the complexity of contemporary conflicts while expanding opportunities for future research and practice Contributors to the book are recognized scholars and practitioners in their respective fields The authors take a holistic approach to the study analysis and resolution of conflict at the personal interpersonal societal and cultural levels The book is a retrospective of the Mauro Centre and through its content explores the roots of a major contributor to PACS scholarship The scholarship represents those who come to the PACS field with a diversity of ideas approaches disciplinary roots and topic areas which speaks to the complexity breadth and depth needed to apply and take account of conflict dynamics and the goal of peace This book reflects the unique model and approach of the Arthur V Mauro Centre for Peace and Justice at the University of Manitoba in central Canada conflict transformation peacebuilding and storytelling Based in the doctoral theses and in celebration of the first decade of Canada's only doctoral program in PACS this volume co edited by three of the graduates of the program and written by colleagues presents and explores a number of these issues while presenting new and leading research across the broad spectrum of Peace and Conflict Studies

The Transformation of the World of War and Peace Support Operations Kobi Michael, David Kellen, Eyal Ben-Ari, 2009-03-20 With the end of the Cold War the euphoria of the Gulf War of the 1990s and the avowal of a New World Order peace operations were declared as the recipe for a better world through international intervention in conflict arenas However the debacles and failures in Cambodia Somalia or the Balkans led to disillusionment and a sense of strategic helplessness among leaders experts and scholars in the industrial democracies While these arguments have been the focus of intense criticism and discussion they nevertheless underscore the fact that since the end of the Cold War the armed forces of the industrial democracies have undergone very significant transformations This is the first work linking the changes in armed forces to Peace Support Operations PSOs those operations with major state building components that demand broad and coherent cooperation between military forces and civilian entities *The Transformation of the World of War and Peace Support Operations* is timely as the recent debates over PSOs continue to take center stage This work embodies a new set of ideas and concepts that aid in grasping and interpreting the transformations taking place in the world of war and in PSOs It seeks to understand how social economic political and organizational transformations around the globe are related to the complex links between armed forces and PSOs Additionally this work addresses issues that continue to define the character and makeup of modern warfare and the missions of PSOs for coming decades

Preparing the Army for Stability Operations Thomas S. Szayna, Derek Eaton, Amy Richardson, 2007-10-16 Much activity is being aimed at revising the approach to planning and implementing Stabilization Security Transition and Reconstruction SSTR operations The changes are meant to

ensure a common U S strategy rather than a collection of individual departmental and agency efforts and on involving all available government assets in the effort The authors find that some elements essential to the success of the process are not yet in place

The Challenge of Nation-Building Rebecca Patterson, 2014-09-17 In the last decades the United States Army has often been involved in missions other than conventional warfare These include low intensity conflicts counterinsurgency operations and nation building efforts Although non conventional warfare represents the majority of missions executed in the past sixty years the Army still primarily plans organizes and trains to fight conventional ground wars Consequently in the last ten years there has been considerable criticism regarding the military's inability to accomplish tasks other than conventional war Failed states and the threat they represent cannot be ignored or solved with conventional military might In order to adapt to this new reality the U S Army must innovate This text examines the conditions that have allowed or prevented the U S Army to innovate for nation building effectively By doing so it shows how military leadership and civil military relations have changed Nation building refers to a type of military occupation where the goal is regime change or survival a large number of ground troops are deployed and both military and civilian personnel are used in the political administration of an occupied country with the goals of establishing a productive economy and a stable government Such tasks have always been a challenge for the U S military which is not normally equipped or trained to undertake them Using military effectiveness as the measurement of innovative success the book analyzes several U S nation building cases including post World War II Germany South Korea from 1945 1950 the Vietnam War and Operation Iraqi Freedom By doing so it reveals the conditions that enabled military innovation in one unique case Germany while explaining what prevented it in the others This variation of effectiveness leads to examine prevailing military innovation theories threat based accounts quality of military organizations and civil military relations This text comes at a critical time as the U S military faces dwindling resources and tough choices about its force structure and mission orientation It will add to the growing debate about the role of civilians military reformers and institutional factors in military innovation and effectiveness

The comprehensive approach Great Britain: Parliament: House of Commons: Defence Committee, 2010-03-18 The Defence Committee report recommends that when troops are committed to operations in future there must be robust plans to coordinate military and reconstruction efforts from the earliest stages The next Government should lay out the requirements of the Comprehensive Approach the combination of civilian and military actors in a counter insurgency operation in order better to preserve all the lessons learned in the complex operations of Iraq and Afghanistan many of them having been painfully re learned from Bosnia Kosovo and even Malaya The Committee looks to the recently formed Stabilisation Unit owned by the Department for International Development the Foreign and Commonwealth Office and the Ministry of Defence to maintain a capacity to deploy significant numbers of personnel for post conflict reconstruction and to ensure that vital knowledge and skills gained during deployments in Iraq and Afghanistan are retained and built on The Comprehensive

Approach requires close work with local nationals to build up their capability and confidence in all fields including security governance law and order and development This must include women at all levels The Government needs to find better ways to draw on the expertise of NGOs without compromising the effectiveness and safety of aid workers on the ground

Salvaging American Defense Anthony H. Cordesman, 2007-04-30 Anthony Cordesman offers a detailed analysis of ten major challenges affecting U S national security systematically identifying current failures and inefficiencies and proposing constructive ways to proceed in the future
