Theorising Posthuman Childhood Studies Karen Malone, Marek Tesar, Sonja Arndt, 2020-11-05 This book is a genealogical foregrounding and performance of conceptions of children and their childhoods over time We acknowledge that children's lives are embedded in worlds both inside and outside of structured schooling or institutional settings and that this relationality informs how we think about what it means to be a child living and experiencing childhood The book maps the field by taking up a cross disciplinary genealogical niche to offer both an introduction to theoretical underpinnings of emerging theories and concepts and to provide hands on examples of how they might play out This book positions children and their everyday lived childhoods in the Anthropocene and focuses on the interface of children's being in the everyday spaces and places of contemporary communities and societies In particular this book examines how the shift towards posthuman and new materialist perspectives continues to challenge dominant developmental social constructivist and structuralist theoretical approaches in diverse ways to help us to understand contemporary constructions of childhoods It recognises that while such dominant approaches have long been shown to limit the complexity of what it means to be a child living in the contemporary world the traditions of many Eurocentric theories have not addressed the diversity of children's lives in the majority of countries or in the Global South

Bibliographie linguistischer Literatur ,1997 **The National union catalog, 1968-1972** ,1973 Library of Congress Catalogs Library of Congress,1978 Narratives of the Religious Self in Early-Modern Scotland David George Mullan,2016-04-22 Drawing on a rich yet untapped source of Scottish autobiographical writing this book provides a fascinating insight into the nature and extent of early modern religious narratives Over 80 such personal documents including diaries and autobiographies manuscript and published clerical and lay feminine and masculine are examined and placed both within the context of seventeenth century Scotland and also early modern narratives produced elsewhere In addition to the focus on narrative the study also revolves around the notion of conversion which while a concept known in many times and places is not universal in its meaning but must be understood within the peculiarities of a specific

context and the needs of writers located in a specific tradition here Puritanism and evangelical Presbyterianism These conversions and the narratives which provide a means of articulation draw deeply from the Bible including the Psalms and the Song of Solomon The context must also include an appreciation of the political history especially during the religious persecutions under Charles II and James VII and later the changing and unstable conditions experienced after the arrival of William and Mary on her father's throne Another crucial context in shaping these narratives was the form of religious discourse manifested in sermons and other works of divinity and the work seeks to investigate relations between ministers and their listeners Through careful analysis of these narratives viewing them both as individual documents and as part of a wider genre a fuller picture of seventeenth century life can be drawn especially in the context of the family and personal development Thus the book may be of interest to students in a variety of areas of study including literary historical and theological contexts It provides for a greater understanding of the motivations behind such personal expressions of early modern religious faith whose echoes can still be heard today Library Journal, 1967-04 *Books and Pamphlets, Including Serials and Contributions to Periodicals* Library of Congress.
