Genders,2025-09-02 Based upon an extensive empirical study of a democratic therapeutic community for women serving long and medium sentences this book explores the opportunities it provided for restorative rehabilitation In so doing it identifies some of the interconnected ways in which these ambitions are undermined by pervasive yet often tacit assumptions that underly penal policies and practices Drawing on a wealth of data gathered from a study spanning a period of eighteen years at the only democratic therapeutic community for women prisoners in the UK the book highlights how feminist criminology has revealed an invidious history of women s treatment in prison demonstrating how reformist and rehabilitative

interventions have reproduced and exacerbated existing states of inequality and oppression. Consequently the question explored in this book is whether a proportionate sentence that imposes a loss of liberty is inevitably destined to this fate or whether it can be constructed in ways that are progressive and transformative. By identifying and understanding some of the interconnected ways in which progressive efforts have typically been undermined it opens a debate about the insinuation of certain often unspoken assumptions that underly penal policies and practices and the need for their deconstruction. It opens an axiomatic debate about how women imprisoned for serious offences might have that loss of liberty interpreted to facilitate a restorative reparative and reintegrative process of rehabilitation informed by principles of social justice. This book will be of great interest to students and scholars of criminology, feminist studies, public policy and human rights. It will also be of value to policymakers and practitioners in women's prisons and psychologists and psychiatrists interested in therapeutic communities.

A Brief Excursion into Human Cognition Hans Kankam, 2025-04-26 This book offers a concise exploration of human cognition charting its historical development and revealing how disciplines such as neuroscience, linguistics, anthropology, the social sciences and behavioral economics shape our understanding. Structured as a condensed handbook, it examines the core principles defining cognition while reflecting on how these insights influence AI advancements and social media interactions. Subsequent sections highlight how evolving cognitive research combined with rapid AI growth is driving a paradigm shift in how we perceive ourselves and our world. Drawing on interdisciplinary perspectives, the book also explores the possible unintended consequences of integrating such knowledge into everyday life. By illuminating emerging trends and potential future directions, it equips both specialists and non-specialists with a fresh lens on how cognition shapes and is shaped by technology and society.

Embracing Our Shadows: Meditations for Gay Men on the Path to Self-Discovery and Healing Pasquale De Marco, 2025-03-03 In a world where labels and societal expectations often overshadow the true essence of self, *Embracing Our Shadows* offers a transformative journey for gay men seeking self-discovery and healing.
