Covers:

TRX .12 and TRX Pro .15

HOW IT WORKS

The TRX engine is a two-stroke, air-cooled design. It follows "ABC" (Aluminum, Brass, Chrome) type construction. The chrome sleeve is tapered so that the aluminum piston fits tighter at the top of the stroke than at the bottom. The piston and sleeve are designed to reach perfect running clearance when they reach normal operating temperatures. The piston will heat lighter when cold.

Fuel enters the engine through the carburetor when it is metered and mixed with air. The fuel/air mixture is then drawn into the crankcase. A rotating valve in the crankshaft opens and closes the carburetor. On the piston's down stroke, the crankcase becomes pressurized, and fuel is blown into the combustion chamber through two sided intake ports cut into the sleeve. Sighting action prevents the fresh fuel/air mixture from exiting the exhaust port. On the upstroke, the fuel is compressed and ignited. When the engine is first started, the electrically heated glow plug causes the fuel to ignite. Once the engine is running, the fuel is ignited by a combination of rapid compression (similar to a diesel) and retained heat from the glow plug. Exhaust gases are evacuated through a third port in the sleeve.

The correct balance of the engine are lubricated by the oil carried in the fuel mixture. The oil also helps to cool the engine. Some of the oil is burned with the fuel mixture, producing the characteristic smoke trail.

The ratio of air to fuel (mixture) is critically important. A mixture that is too "rich" means that there is too much fuel, and a mixture that is too "lean" means that there is not enough fuel for the given amount of air. When the mixture is too rich, performance will be sluggish and there will be an excessive amount of smoke. There is also a potential to

INTRODUCTION

Thank you for purchasing a new Traxxas TRX engine. This manual contains the instructions you will need to operate and maintain your new engine. **Look over the manual and examine the engine carefully before starting it.** If for some reason you think the engine is not what you wanted, then do not continue any further. Your hobby dealer absolutely cannot accept an engine for return or exchange after it has been run.

Please read this entire manual before attempting to start your new engine. Even if you are an experienced RC enthusiast, please continue reading to learn about the special features that make the TRX engine unique. Pay special attention to the boxes in red ink as outlined in this manual. The engine must be broken in (or "run in") before maximum performance can be achieved. Follow the directions in this manual exactly. Do not be tempted to take a shortcut here and immediately adjust for top speed and acceleration. A comprehensive rebuild section and a troubleshooting guide have also been included.

If you have any questions about your new engine, then call Traxxas' technical support line at 1-888-TRAXXAS (toll free, U.S.A. residents only, outside U.S.A. call 972-613-9300). Technical support is available Monday through Friday, from 8:30 AM to 5:30 PM Central Time. We hope that you will enjoy your TRX engine for many hours to come.
