Plant Tissue Culture Manual K. Lindsey, 2013-11-11 *Plant Tissue Culture Manual - Supplement 7 K.*

Lindsey, 2013-11-11 Plant tissue culture has a long history dating back to the work of Gottlieb Haberlandt and others at the end of the 19th century but the associated concepts and techniques have reached a level of usefulness and application which has never been greater. The technical innovations have given new insights into fundamental aspects of plant differentiation and development and have paved the way to the identification of strategies for the genetic manipulation of plants. It is the aim of this manual to deliver a broad range of these techniques in a form which is accessible to students and research scientists of diverse backgrounds including those with little or no previous experience. The themes of the manual aim to reflect those research areas which have been advanced by tissue culture technology. As was the case for the sister volume *Plant Molecular Biology Manual* the objective has been from the start to produce a manual which is at home on the laboratory bench. The plastic covered ring bound format has proved to be most popular and is retained here. Equally the emphasis has been on producing a collection of detailed step by step protocols each supplemented with an introductory text and practical footnotes to provide the next best thing to a supervisor at one's shoulder.

Cytoskeleton Proteins Gerhard Isenberg, 2012-12-06 The standard protocols for the purification of all known cytoskeleton proteins are presented in this manual. Proteins are listed alphabetically and each protocol follows a common format. Thus the manual provides a quick and easy reference to all relevant procedures for cytoskeleton protein purification. The isolation procedure for each protein is shown in a clear flowchart while the source of the protein equipment and material needed, a list of suppliers, standard references, accession numbers of sequences as well as further relevant facts and practical tips are given on a separate page.
