Twenty Houses By Twenty Architects:

Twenty Houses By Twenty Architects Mercedes Daguerre, 2003-11-01 Twenty houses designed by the most celebrated architects of the moment The 20 houses in this book represent a cross section of the most innovative residential design completed worldwide since the 1990s by some of the most talked about architects working today Included are celebrated architects such as Rem Koolhaas Steven Holl and Richard Meier as well as emerging talents such as fABRica de Arquitectura in Mexico and Graham Phillips in England Houses are located in widely diverse areas from the heart of Manhattan to the seaside in Greece and from the Spanish countryside to the suburbs of London Beginning where Modernism left off these architects are using the private house as a laboratory to explore new issues in domestic living The book begins with an introduction that discusses the profound changes that are now taking place in the institution of the family in its makeup in the rhythms of its daily life and in the forms of its leisure and work Each house is showcased on 12 pages that open with a brief project description biographical profile of the architect and project data The following spreads present plans elevations and sections and full colour photographs

Twenty-Five+ Buildings Every Architect Should Understand Simon Unwin, 2023-11-03 The underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experience how it can help us make sense of the world and contribute to our sense of identity and place Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading for every architect With the addition of numerous shorter analyses this new edition covers an even greater range of architectural ideas providing students and architects with further inspiration for exploration in their own design work Architects live by ideas But where do they come from And how do they shape buildings There is no one right way to do architecture This book illustrates many Its aim is to explore the rich diversity of architectural creativity by analysing a wide range of examples to extract the ideas behind them *Twenty Five Buildings Every Architect Should Understand* is a companion to Simon Unwin's *Analysing Architecture the Universal Language of Place Making* most recent edition 2021 and part of the trilogy which also includes his *Exercises in Architecture Learning to Think as an Architect* second edition 2022 Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice *Twenty Five Buildings* focusses on analysing examples using the methodology offered by *Analysing Architecture* which operates primarily through the medium of drawing An underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experiences how it can help us give form to the world and contributes to our senses of identity and place Exploring these dimensions through case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading and hopefully an inspiration for every architect In this new edition supplementary analysis and discussion has been

added to each of the twenty five case studies drawing attention to their influences from and on other architects A number of extra shorter analyses have been included too following the practice of presenting extra small dishes interspersed among main courses in high end restaurants These additional short analyses account for the sign after Twenty Five in the title of this edition and double the number of buildings analysed to around fifty The Architect ,1927 *The Architect and Contract Reporter* ,1919 *Housing and Planning References* ,1959 *Architect* ,1874 The Electrical Engineer ,1908

Country Houses and Seaside Cottages of the Victorian Era William T. Comstock,2012-08-09 This fascinating book presents a series of 44 designs for vacation homes of varying styles and sizes created over a century ago by a select group of New York and New Jersey architects Many of them are two story and most were intended to be built on low to medium budgets All of them reflect the ideals of comfort and charm and state of the art technology of the Victorian period The original publishers compiled a splendid variety of designs presented them as seaside and country houses and included designs for a Victorian club house pavilion school house and a small seaside chapel A total of 200 illustrations including perspective views front and side elevations and first and second story floor plans depict these appealing designs Occasionally the architects have specified construction materials and finishing details such as paint color and trim and in all cases they have included the overall anticipated costs which range from about 500 to about 9 000 The Victorians of course loved architectural embellishments of every kind and it is no small part of the charm of this book to study the profusion of gables porches portholes dormers porticoes chimneys pinnacles and more lavished on even the most modest designs Above all the houses and cottages appear to be both comfortable and reassuring appealing reminders of a gracious age long gone Those studying and working in the fields of architecture history and sociology will find in this wonderful book exuberant examples of a rich and charming architectural style Those who wish to join the growing number of home builders and restorers re creating Victorian homes will find inspiration in each of these thoughtful designs The Architect and Building News ,1927

Modern Thai House Robert Powell,2012-10-10 With rich photography and insightful commentary this Thai architecture and interior design book showcases some of the finest modern masterpieces in Southeast Asia A tremendous body of sophisticated and sensitively designed architectural work has been produced in Thailand in the first decade of the 21st century The 25 houses in *The Modern Thai House* illustrate the radical new ideas coming from a dynamic younger generation of architects who are producing work comparable with and sometimes even surpassing the very best architecture in the world Most of these architects were trained in the U S or U K and reflect not only American and European sensibilities but also affinities with their contemporaries in Asia including Japan China Singapore and Bali all hotbeds for innovation in modern design The houses in this book are readily accessible from Bangkok Phuket and Chiangmai They reflect a wide variety of concerns and solutions such as sustainability responses to climate strategies for cooling with minimal electricity openness versus security in a large metropolis such as Bangkok cultural sensitivity and responsiveness as evidenced in a

three generation house built for a society in which the extended family is still prevalent and cultural memory as in the use of elements such as pilings verandahs and steeply pitched roofs with large overhangs that echo traditional Thai designs

Nurtured by an increasingly knowledgeable and wealthy clientele modern architecture in Thailand is emerging with a variety of innovative architectural expressions

The Western Architect ,1918 **The New Urban House** Jonathan Bell, Ellie Stathaki, 2018-11-13 A stunning anthology of contemporary houses that showcases the ways that architecture can respond to local urban challenges while enhancing modern city living Architects face many challenges when designing a modern urban house Environmental performance aesthetics technical logistics material concerns site constraints these are all considerations that have the potential to limit what architects can achieve but that also can inspire creative solutions In addition each city s history obstacles and opportunities influence local design approaches Superbly illustrated with 600 color images this expansive compendium offers fascinating insights into building modern houses on a local level Jonathan Bell and Ellie Stathaki have selected urban structures from around the world to serve as both exemplary solutions and standout works of art in Beijing and Mexico City Athens and Tokyo Los Angeles and Cape Town By examining buildings on six continents from both emerging architects and established studios such as Zaha Hadid Architects MVRDV and Johnston Marklee this stunning volume explores the many ways in which architecture can enhance the experience of dwelling in a modern city by responding to traditional styles and challenges of site and providing a broader understanding of place
