

"The crisis deepens. Everyday life is plundered as much as the physical environment. Our predicament points us toward a solution. The voluntary abandonment of the industrial mode of existence is not self-renunciation, but a healing return."

Bill Hibbard

Twilight Of The Machines:

Twilight of the Machines John Zerzan, 2008 The mentor of the green anarchist and neo primitive movements is back with his first book in six years confronting civilisation mass society modernity and technoculture both the history of its developing crisis and the possibilities for its human and humane solutions As John Zerzan writes These dire times may yet reveal invigorating new vistas of thought and action When everything is at stake all must be confronted and superseded At this moment there is the distinct possibility of doing just that Technofutures, Nature and the Sacred Celia Deane-Drummond, Sigurd Bergmann, Bronislaw Szerszynski, 2016-03-03 The capacity of human beings to invent construct and use technical artifacts is a hugely consequential factor in the evolution of society and in the entangled relations between humans other creatures and their natural environments Moving from a critical consideration of theories to narratives about technology and then to particular and specific practices Technofutures Nature and the Sacred seeks to arrive at a genuinely transdisciplinary perspective focusing attention on the intersection between technology religion and society and using insights from the environmental humanities It works from both theoretical and practical contexts by using newly emerging case studies including geo engineering and soil carbon technologies and breaks open new ground by engaging theological scientific philosophical and cultural aspects of the technology religion nature nexus Encouraging us to reflect on the significance and place of religious beliefs in dealing with new technologies and engaging critical theory common in sociological political and literary discourses the authors explore the implicit religious claims embedded in technology

Ethics in Design and Communication Laura Scherling, Andrew DeRosa, 2020-02-20 This timely collection brings together critical analytic historical and practical studies to address what ethics means in the practice of design Designers face the same challenges as everyone else in the complex conditions of contemporary cultural life choices about consumption waste exploitation ecological damage and political problems built into the supply chains on which the global systems of inequity currently balance precariously But designers face the additional dilemma that their paid work is often entangled with promoting the same systems such critical approaches seek to redress how to reconcile this contradiction among others in seeking to chart an ethical course of action while still functioning effectively in the world Ethics in Design and Communication acknowledges the complexity of this subject matter while also demonstrating that in the ongoing struggle towards an equitable and sustainable world the talents of design and critical thought are essential Featured case studies include graphic design internships today the dark web and media coverage of the 2016 US presidential election The fact that within this book such a wide array of practitioners scholars critics and professionals commit to addressing current injustices is already a positive sign Nonetheless it is essential that we guard against confusing the coercive force of moral imperatives with ethical deliberation when conceiving a foundation for action **Continental Stagecraft** Kenneth Macgowan, Robert Edmond Jones, 1922 **The Cultural Power of Personal Objects** Jared Kemling, 2021-12-01 The Cultural Power of

Personal Objects seeks to understand the value and efficacy of objects places and times that take on cultural power and reverence to such a degree that they are treated whether metaphorically or actually as persons or as objects with personality they are living objects Featuring both historical and theoretical sections the volume details examples of this practice including the wampum of certain Native American tribes the tsukumogami of Japan the sacred keris knives of Java the personality of seagoing ships the ritual objects of Hinduism and Ancient Egypt and more The theoretical contributions aim to provide context for the existence and experience of personal objects drawing from a variety of disciplines Offering a variety of new philosophical perspectives on the theme while grounding the discussion in a historical context The Cultural Power of Personal Objects broadens and reinvigorates our understanding of cultural meaning and experience

Attending Daedalus Peter Wright, 2003 This new study of the fiction of Gene Wolfe one of the most influential contemporary American science fiction writers offers a major reinterpretation of Gene Wolfe s four volume The Book of the New Sun and its sequel The Urth of the New Sun After exposing the concealed story at the heart of Wolfe s magnum opus Wright adopts a variety of approaches to establish that Wolfe is the designer of an intricate textual labyrinth intended to extend his thematic preoccupations with subjectivity the unreliability of memory the manipulation of individuals by social and political systems and the psychological potency of myth faith and symbolism into the reading experience

Continental Stagecraft Robert Edmund Jones, It is a pity to begin a book by being dull But a time of change is upon us in the theater and a time of change is a time for definitions We have passed through such times before and we have come out after some years a century or so with categories neatly fixed We can look back along the history of English literature and place a judicial finger there and there and there and say Middle English Classicism

Romanticism All this is pretty well set Then we come to Realism and its quagmires quagmires of balked creation and quagmires of discussion and we wallow about gesticulating and shouting and splashing the mud into our immortal eyes What is this bog we have been so busy in And what is the fitful and rather blinding storm of illumination which plays about the horizon and calls itself Expressionism Of course these things are just what we care to make them Various parties to the argument choose various definitions the kinds that suit their themes I claim no more for mine than that they will make clear what I am talking about and save a certain amount of futile dispute There are plenty of sources of confusion in discussions about art To begin with it is not an easy thing to limit a dynamic organism by definition Creative efforts in drama fiction or painting run out of one category and into another with distressing ease More than that there are apt to be many parts to a whole many divisions to a category and the parts or the divisions can be extraordinarily different Finally fanatics and tea table gossips are equally unscrupulous when it comes to proving a point They make the definitions of friends and foes mean what they like They take the part for the whole the division for the category They pin down a lively and meandering work of art at just the place where they want it Two disputants bent on exhibiting the more indecent side of human intelligence can make the twilight of discussion into a pit of black confusion Let us bring the thing down to the present quarrel in the theater the quarrel with Realism which has moments of clarity the quarrel with Expressionism which is murky as hell What are we going to mean when we talk about Realism So far as this book goes the word Realism means a way of looking at life which came into vogue about fifty years ago It sees truth as representation It demands a more or less literal picture of people and happenings It insists that human beings upon the stage shall say or do only those things that are reasonably plausible in life Resemblance is not always its end but resemblance is a test that must be satisfied before any other quality may be admitted Realism is not of course a matter of trousers silk hats and machinery The realistic attitude can invade the sixteenth century as it does in Hauptmann's Florian Geyer Trousers silk hats and machinery can be the properties of a non realistic play like O'Neill's The Hairy Ape The test of Realism as the term is here employed is the test of plausibility Would men and women talk in this fashion in real life under the conditions of time place and action supplied by the playwright It is the business of the realistic playwright to draw as much as possible of inner truth to the surface without distorting the resemblance to actuality

The American Robot Dustin A. Abnet, 2020-03-27 Although they entered the world as pure science fiction robots are now very much a fact of everyday life Whether a space age cyborg a chess playing automaton or simply the smartphone in our pocket robots have long been a symbol of the fraught and fearful relationship between ourselves and our creations Though we tend to think of them as products of twentieth century technology the word robot itself dates to only 1921 as a concept they have colored US society and culture for far longer as Dustin A Abnet shows to dazzling effect in *The American Robot* In tracing the history of the idea of robots in US culture Abnet draws on intellectual history religion literature film and television He explores how robots and their many kin have not only conceptually connected but literally embodied some of the most critical questions in modern culture He also investigates how the discourse around robots has reinforced social and economic inequalities as well as fantasies of mass domination chilling thoughts that the recent increase in job automation has done little to quell *The American Robot* argues that the deep history of robots has abetted both the literal replacement of humans by machines and the figurative transformation of humans into machines connecting advances in technology and capitalism to individual and

societal change Look beneath the fears that fracture our society Abnet tells us and you re likely to find a robot lurking there

Abstract Machines Garin Dowd,2007 Abstract Machines Samuel Beckett and Philosophy after Deleuze and Guattari is an innovative approach to the relationship of the work of Samuel Beckett to philosophy The study seeks to combine intertextual analysis and a schizoanalytic genealogy derived from the thought of Gilles Deleuze and Felix Guattari to explore a becoming philosophy of Beckett s literary writing The author focuses on zones of encounter and confrontation spaces and times of becoming between Beckett selected philosophers and Deleuze and Guattari In the retrospective glance occasioned by that part of Deleuze and Guattari s complex legacy which embraces their interest in the author Beckett s writing in particular effectuates a threshold hesitation which can be seen directly to impact on their approach to the history of philosophy and on their contribution to its molecularization in the name of experimentation Abstract Machines with its arresting perspectives on a wide range of Beckett s work will appeal to academics and postgraduate students interested in the philosophical echoes so evident in his writing The extent of its recourse to philosophers aside from Deleuze and Guattari including notably Alain Badiou renders it a timely and provocative intervention in contemporary debates concerning the relationship of literature to philosophy both within Beckett studies and beyond
