Nature's Tapestry: Uncovering the Beauty and Importance of Biodiversity Juan Armando Sánchez,2023-10-09 We cannot separate human beings from biodiversity Our vital functions and our health are synergistic with other species The number of microorganisms we live with is greater than the total number of cells in our bodies So separation from biodiversity and its loss are the greatest threats to human survival and the current model for human development affects our very lives We must integrate marine and terrestrial life to understand our interdependence with biodiversity Colombia a megadiverse country with access to two oceans is the perfect canvas on which to illustrate this message nature has sustainable and straightforward solutions to society s emerging problems The new challenges of a changing environment raise increasingly relevant questions that we must address to prosper as individuals and as a society Can we prevent a new pandemic of viral origin How will we feed a constantly growing population How will the extinction of biological species affect us Do we function the same as all other living beings Are our bodies entire ecosystems for other species Is there a better model for economic development This book presents an approach to these discussions based on Colombia s biodiversity to uncover biodiversity s beauty and importance our nature s tapestry What we have here is an opportunity that we cannot miss

Ocean Pulse John T. Tanacredi,John Loret,2013-06-29 There are many conferences workshops and meetings annually around the world each emphasizing a specialty area for scientific exploration and research Yet in very few instances if at all do the multidisciplinary aspects of science get presented so one may see the diversity of dependencies these seemingly disparate disciplines actually have The Explorers Club and the U S National Park Service collaborated to make a first attempt at what will continue to be an ocean pulse effort conferences combining the aquaculture sciences the search for underwater antiquities and the marinelbio technologies utilized to explore these areas The purpose has been to bring together not just academicians to talk about their finding in the field or the laboratory but to provide a forum for the practical applications of technology to expanding our worlds fisheries as well as to continue to explore our world s oceans the earth s truly last frontier After everything is said and done we still know precious little about our ocean environments Their influences on our lives are monumental and yet we continue to be very parochial and conservative in our dedication to exploring their depths and resources We feel confident that this initial effort by our respective groups to awaken a realization in the public and private sectors of the need for a cross disciplinary approach to scientific research in the marine environment is a necessity as we approach the 21 st century Kevin C
