features a variety of solutions from different experts for treating the problem. These experts provide case examples of similar problems with a step by step explanation of how they solved these problems and why they took the approach that they used. The book covers both aesthetic and reconstructive breast surgery. The goal of this text is not to judge which solution is the best; that decision is left to the reader. Rather, it is designed to provide a detailed road map explaining how to move from point A to the problem to point B, the solution. Beautifully illustrated. Dramatic color illustrations and numerous preoperative, intraoperative, and postoperative images help readers visualize the steps of each operative solution. Unique Features. This book's approach is unique and should be of great educational value to surgeons, both residents and practitioners, in solving challenging problems and complications. Even more important, it will help them avoid problems and complications in future cases.
