Two Homelands Toyoko Yamasaki, 2007-10-31 *Two Homelands Futatsu no sokoku* tells the powerful story of three brothers during the years surrounding World War II. From the attack on Pearl Harbor to the Pacific War relocation to Manzanar, the atomic bombing of Hiroshima and the Tokyo war crimes trials, we follow the lives of Kenji Tadashi and Isamu Amo, the California-born sons of Japanese immigrants. The eldest Kenji must grapple with what it means to belong to two nations at war with one another and to face betrayal by both. Tadashi, in school in Japan when war breaks out, is drafted into the Japanese army and renounces his U.S. citizenship. Later, Kenji and Tadashi find themselves on opposite sides of a battlefield in the Philippines, although they both survive the conflict; their relationship is destroyed by the war. Isamu, the youngest and the most thoroughly American of the brothers, loves John Wayne movies and gives his life to rescue the lost Texas battalion fighting in France. Popular Japanese novelist Toyoko Yamasaki spent five years interviewing Japanese Americans and researching documentary sources to assemble the raw material for her book. Through the story of the Amo family, she forces readers to confront the meaning of love of country as her characters encounter prejudice and suspicion on both sides of the Pacific. Almost a quarter century after its Japanese publication, this English language translation affords a valuable opportunity to understand the postwar reassessment of what it means to be Japanese in the modern world. **Two**

Miller, 1932 108-2 *Hearings: Department of Homeland Security Appropriations for 2005, Part 4, March 18, 2004*, 2004 Coevolution William H. Durham, 1991 Charles Darwin's *On the Origins of Species* had two principal goals: to show that species had not been separately created and to show that natural selection had been the main force behind their

proliferation and descent from common ancestors In Coevolution the author proposes a powerful new theory of cultural evolution that is of the descent with modification of the shared conceptual systems we call cultures that is parallel in many ways to Darwin s theory of organic evolution The author suggests that a process of cultural selection or preservation by preference driven chiefly by choice or imposition depending on the circumstances has been the main but not exclusive force of cultural change He shows that this process gives rise to five major patterns or modes in which cultural change is at odds with genetic change Each of the five modes is discussed in some detail and its existence confirmed through one or more case studies chosen for their heuristic value the robustness of their data and their broader implications But Coevolution predicts not simply the existence of the five modes of gene culture relations it also predicts their relative importance in the ongoing dynamics of cultural change in particular cases The case studies themselves are lucid and innovative reexaminations of an array of oft pondered anthropological topics plural marriage sickle cell anemia basic color terms adult lactose absorption incest taboos headhunting and cannibalism In a general case the author s goal is to demonstrate that an evolutionary analysis of both genes and culture has much to contribute to our understanding of human diversity particularly behavioral diversity and thus to the resolution of age old questions about nature and nurture genes and culture

Homeland Security Scams James T. Bennett, 2017-07-28 A direct consequence of the War on Terror launched after the attacks of September 11 2001 is an awareness of the need for homeland security This war is being used to justify a huge expansion of government powers and spending but funds allocated for homeland security are often for programs far removed from anything that might be termed defense or security In *Homeland Security Scams* James T Bennett shows that this government spending is doing very little to make us safer but a great deal to make us poorer less free and more dependent on the federal government Regardless of the color of the security alert issued by the Homeland Security czar the spending light is always green as pork barrel dollars are showered on programs of dubious worth Lobbyists lobby for homeland security grants and contracts corporations and state and local governments are becoming ever more dependent on federal subsidies the vested interest in prolonging and intensifying the concern about homeland security increases and lobbyists press for ever more money As Bennett makes clear with government money comes government control Law enforcement and emergency response agencies at all levels of government are being effectively nationalized Police power is being concentrated and the Department of Homeland Security DHS envisions a surveillance state that the East German State Police under Communism would have envied In this hard hitting critique Bennett argues that all the spending and surveillance will not win the War on Terror or preserve us from natural disasters The foe cannot be beaten we re having trouble even finding the enemy cannot surrender and still has awesome powers to lay waste to American cities and citizens He argues that we should view terrorism as just one of many other serious threats to individuals and to nations More sternly he warns that the War on Terror is also a War on Privacy and a War on Liberty
