The Energies of Love Donna Eden, David Feinstein, 2014-09-04. The bestselling authors of *Energy Medicine* and *Energy Medicine for Women* present a complete program for using energy medicine to heal and strengthen romantic relationships. A relationship begins with the meeting of two unique energies. This union of energies, though invisible, determines the way you communicate, fight, love, and want to be loved. In this groundbreaking book, the bestselling authors of *Energy Medicine* draw on the real-life experiences of couples who have attended their popular *Energies of Love* workshops as well as their own experience as husband and wife to show how an understanding of your energy system and that of your partner can help you build a more harmonious and loving bond. We all have different ways of making sense of the world around us, but when faced with conflict, especially with those we care most about, we tend to revert to one of four Energetic Stress Styles. Visuals are extremely passionate and inspire others to care about the things they care about, but in moments of conflict, their take on the situation can overshadow what is actually occurring, undermining their ability to empathize with their partner. Kinesthetics are generous, compassionate, and accepting of other people, but their caring nature pulls them in too many directions. They try to meet others' needs at the expense of their own, which can cause mounting resentment. Digitals are rational and principled and have a gift for quickly understanding complex situations, but they can become closed to others' perspectives and feelings. Tonals have a gift for understanding others and their dilemmas, but during moments of conflict, their ability to read between the lines can morph into hearing what was never said, felt, or thought. According to the authors, the strongest relationships are those in which the two parties feel that they are partners on a shared spiritual journey. By helping you better understand your own unique energy system as well as that of your partner, you will be able to recognize your strengths as a couple and avoid the pitfalls. *The Energies of Love* serves as a powerful resource for anyone who wishes to build a rich partnership while maintaining the spark that keeps a relationship exciting.

Energy Security and Green Energy Angelica Rutherford, 2020-04-16. This book shows how the links between energy security and national and international law and policies on green energy pose challenges to a transition towards a green energy system. Based on empirical work carried out in two very different country case studies, Great Britain and Brazil, this book attempts to foster a better understanding of the role played by energy security in constructing and deconstructing green energy policy initiatives. The broad range of views raised in national contexts leads to legal disputes in international forums when attempts are made to address the issues of this energy security-green energy interplay. As such, building on the findings of the case studies, this book then analyses the interplay between energy security and green energy development in international trade law as encapsulated in the law of the

World Trade Organisation WTO Finally the author proposes a way forward in creating the legal space in the law of the WTO for trade restrictive measures aimed at ensuring green energy security *Federal Energy Regulatory Commission Reports* United States. Federal Energy Regulatory Commission,2006-10 *School Food Politics in Mexico* José Tenorio,2023-10-26 Intertwining policy analysis and ethnography Jos Tenorio examines how and why now the promotion of healthy lifestyles has been positioned as an ideal solution to obesity and how this shapes the preparation sale and consumption of food in schools in Mexico This book situates obesity as a structural problem enabled by market driven policy change problematizing the focus on individual behavior change which underpins current obesity policy It argues that the idea of healthy lifestyles draws attention away from the economic and political roots of obesity shifting blame onto an uneducated population Deploying Foucault s concept of dispositif Tenorio argues that healthy lifestyles functions as an ensemble of mechanisms to deploy representations of reality spaces institutions and subjectivities aligned with market principles constructing individuals both as culprits for what they eat and the prime locus of policy intervention to change diets He demonstrates how this ensemble enmeshes within the local cultural and economic conditions surrounding the provisioning of food in Mexican schools and how it is contested in the practices around cooking Expanding the conversation on the politics of food in schools obesity policy and dominant perspectives on the relation between food and health this book is a must read for scholars of food and nutrition public health and education as well as those with an interest in development studies and policy enactment and outcomes

Can God Improve My Balance Sheet? Dwaraknath Reddy,2006-12-01 Success is not attained through a simple and straightforward strategy One can neither conspire to be lucky enough to be successful overnight nor can defeat competition at one go Success can be won only by invoking one s inner potentials to be determined to become the best that one can be This book focuses on the enhancement of your insight to provide an understanding of the workings of your own mind as well as that of others By blending rational precision with spiritualism the author projects the equation for dynamic activity prosperity and peace and hence shows the path of improvement of the balance sheet of life itself Written in a simple witty manner this book will appeal many besides those interested in management and philosophy *Global Climate Change* United States. those concerned with science and technology are somehow neutral and impartial is today being challenged both in the public arena and in the academy. *The Politics of Display* brings together studies of contemporary and historical exhibitions and contends that exhibitions are never and never have been above politics. Rather, technologies of display and ideas about science and objectivity are mobilized to tell stories of progress, citizenship, racial and national difference. The display of the Enola Gay, the aircraft which dropped the atomic bomb on Hiroshima, is a well-known case in point. *The Politics of Display* charts the changing relationship between displays and their audience and analyzes the consequent shift in styles of representation towards interactive multimedia and reflexive modes of display. *The Politics of Display* brings together an array of international scholars in the disciplines of sociology, anthropology and history. Examples are taken from exhibitions of science, technology and industry, anthropology, geology, natural history and medicine, and locations include the United States, of America, Australia, the United Kingdom, France, the Netherlands and Spain. This book is an excellent contribution to debates about the politics of public culture. It will be of interest to students of sociology, anthropology, cultural studies, museum studies and science studies.
