Torbic, 2012

TRBs National Cooperative Highway Research Program NCHRP Report 737 Design Guidance for High Speed to Low Speed Transitions Zones for Rural Highways presents guidance for designing the transition from a high speed rural highway to a lower speed section typically approaching a small town The report includes a methodology for assessing these highway sections and a catalog of potential treatments for addressing problems Publisher s description *Livable Streets 2.0* Bruce Appleyard,2021-03-22 *Livable Streets 2.0* offers a thorough examination of the struggle between automobiles residents pedestrians and other users of streets along with evidence based practical strategies for redesigning city street networks that support urban livability In 1981 when Donald Appleyard s *Livable Streets* was published it was globally recognized as a groundbreaking work one of the most influential urban design books of its time Unfortunately he was killed a year later by a speeding drunk driver This latest update *Livable Streets 2.0* revisited by his son Bruce updates the topic with the latest research new case studies and best human centered practices for creating more livable streets for all It is essential reading for those who influence future directions in city and transportation planning urban design and community regeneration and placemaking Incorporates the most current empirical research on urban transportation and land use practices that support the need for more livable communities Includes recent case studies from around the world on successful projects campaigns programs and other efforts Contains new coverage of vulnerable populations **Parents and School Technology** Gerard Giordano,2021-05-15 Parents had reasons to be alarmed about school technology They had been warned that these abuses could influence their children s academic progress motivation communication creativity critical thinking job preparedness and even their safety at school They had been told that it was linked to controversial instruction faulty testing inadequate textbooks and invasive spyware Upset by these claims the parents had numerous questions This book identifies their questions the groups to which they directed them the answers they elicited and the educational changes they prompted

Cycling for Sustainable Cities Ralph Buehler,John Pucher,2021-02-02 How to make city cycling the most sustainable form of urban transportation safe practical and convenient for all cyclists Cycling is the most sustainable mode of urban transportation practical for most short and medium distance trips commuting to and from work or school shopping visiting friends going to the doctor s office It s good for your health spares the environment a trip s worth of auto emissions and is economical for both public and personal budgets Cycling with all its benefits should not be reserved for the fit the spandex clad and the daring *Cycling for Sustainable Cities* shows how to make city cycling safe practical and convenient for all cyclists *Envisioning Better Communities* Randall Arendt,2017-11-08 The author s work has shaped a generation of planners designers and landscape architects In this book the author brings his insights to a broader public with a profusely illustrated demonstration of how local officials planning commissioners and everyday citizens can work to make their communities more attractive more habitable and more sustainable Despite the widespread acceptance of good design and planning principles throughout the professions too many of our towns and rural areas remain needlessly ugly and inefficient

In side by side comparisons of similar places and kinds of buildings the author shows that we need not live amid sprawling characterless visual blight Simple design choices and effective municipal decisions can have tremendous impacts on the quality of our communities Written in the author's well known clear accessible nontechnical style this book creates a sense of hope for those who face the everyday challenges of working with developers and landowners to create places that make economic environmental and aesthetic sense The author shows us that with diligence thoughtfulness and care we can make our communities better in countless ways Law, Space, and the Vehicular Environment Sarah Marusek, 2022-11-15 This book examines the paved road as a liminal space and legal frontier for enlivened everyday struggles over property power and place definition Through pavement itself and the pavement based practices of pavementality and pavementteering the road is legally framed as a place for movement Paved terrain is a site of dynamism between law and place that engenders the road as legal metaphor by calling forth the kinetic notion of jurisprudence in which law can be understood through the fluidity of everyday life In Western and particularly American society roads are a material locus of governance in which rights of way are determined communicated and enforced However roads also constitute a site of resistance or disruption beyond regulation Addressing phenomena such as travel political protest public memory and community governance this book explores the paved medium of asphalt as a complex surface for legality that constitutively frames order against disorder involving jurisdiction tensions property ownership and cultural identities in vehicular environments The target audience of this book are those students and scholars who consider how law works in society whether through frameworks of auto mobility and legal geography or through the interdisciplinary approaches of legal semiotics legal culture and or new materialism Planning in the USA Roger W. Caves, J. Barry Cullingworth, 2023-08-29 Extensively revised and updated Planning in the USA fifth edition continues to provide a comprehensive introduction to the policies theory and practice of planning Outlining land use urban planning and environmental protection policies this fully illustrated book explains the nature of the planning process and the way in which policy issues are identified defined and approached The new edition incorporates new planning legislation and regulations at the state and federal layers of government and examples of local ordinances in a variety of planning areas New material includes discussions of education and equity in planning the City Beautiful Movement Daniel Burnham's plan for Chicago segregation Knick v Township of Scott reforming single family zoning and regulatory challenges in zoning and land use Daniel Parolek's Missing Middle Housing climate change mitigation adaptation and resiliency the drinking water crisis in Flint Michigan sharing programs for cars bicycles and scooters hybrid electric and autonomous vehicles Vision Zero COVID 19 relief for housing Innovation Districts Promise Zones and Opportunity Zones the sharing gig and creative economies scenic views and vistas monuments statues and remembering the past and healthy cities Health Impact Assessment and active living This detailed account of urbanization in the United States reveals the problematic nature and limitations of the planning process the fallibility of experts and the difficulties facing

policy makers in their search for solutions Planning in the USA fifth edition is an essential book for students of urban planning urban politics environmental geography and environment politics It will be a valuable resource for planners and all who are concerned with the nature of contemporary urban and environmental problems **Handbook on Smart Growth** Knaap, Gerrit-Jan, Lewis, Rebecca, Chakraborty, Arnab, June-Friesen, Katy, 2022-07-08 This timely Research Handbook examines the evolution of smart growth over the past three decades mapping the trajectory from its original principles to its position as an important paradigm in urban planning today Critically analysing the original concept of smart growth and how it has been embedded in state and local plans contributions from top scholars in the field illustrate what smart growth has accomplished since its conception as well as to what extent it has achieved its goals **Report**, 2008 **Reclaiming the Road** David L Prytherch, 2025-06-17 Imagining equitable streets for all For the past century our roadways have been engineered as pipes for cars but they offer vast potential as public spaces From New York and Boston to Portland and Los Angeles cities are rethinking their streets going beyond sidewalks and bike lanes to welcome nonmotorists to share the asphalt roadway Reclaiming the Road traces the historical evolution of America's streets and explores contemporary movements to retake them from cars temporarily and permanently for diverse forms of mobility and community life To share the street raises important questions of equity in transportation and beyond David L Prytherch proposes a bold intersectional vision of a more just street Reclaiming the Road connects cutting edge theory policy analysis and firsthand accounts from those leading the charge in transforming our streets to advocate for changing how we think about and design roads Prytherch features case studies of nine major cities in the United States to show how experiments in reclaiming streets accelerated during the Covid 19 pandemic to become lasting changes Through in depth interviews he shares stories of how planners transportation advocates and community leaders have implemented innovative programs for slowing neighborhood streets opening roads for walking and biking and reconstructing roadways with public parklets and street plazas as social spaces for curbside conversation Examining movements to transform streets through the lenses of equity and justice Reclaiming the Road tackles the conceptual challenge of defining mobility justice and the practicalities of planning a more just public street offering a compelling vision for the future of America's public spaces Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions **Urban Bikeway Design Guide, Second Edition** National Association of City Transportation Officials, 2014-03-24 NACTO's Urban Bikeway Design Guide quickly emerged as the preeminent resource for designing safe protected bikeways in cities across the United States It has been completely re designed with an even more accessible layout The Guide offers updated graphic profiles for all of its bicycle facilities a subsection on bicycle boulevard planning and design and a survey of materials used for green color in bikeways The Guide continues to build upon the fast changing state of the practice at the local level It responds to and accelerates innovative street design and practice around the nation **Challenges of Occupational Safety and Health**

Pradeep Chaturvedi,2006 With reference to India *Environmental Site Plans and Development Review* Robert Sanford,2017-08-15 The most effective way to participate in land stewardship and environmental management is to get involved in the review of proposed developments In smaller communities this review is primarily done by a planning board or commission made up of volunteer members guided by professionals in certain aspects such as traffic historic preservation civil engineering water supply and wastewater disposal In larger communities professional planning staff with the assistance of municipal engineers conducts the review which will then be presented to the planning commission In either case everyone officials volunteers reviewers consultants neighbors and the public in general needs to know what is being proposed The site plan itself is the primary tool for understanding the proposal Environmental review is not an easy task even for consultants and professional planners There is a need for a general guide that presents the design infrastructure and environmental issues to address what a reviewer needs to know about these issues and how to interpret them The book points the reader to accessible low cost resources to aid in the review process In these times of climate change rising populations energy challenges and economic turmoil there is a real need for development to occur in as efficient and environmentally responsible a manner as possible Citizen review is a critical step in the approval alteration or denial of site plans for land subdivision and new development Hence informed participants in the review processes are more important than ever This book is designed to assist professional archaeologists environmental consultants and others interested in construction development and other physical land alteration that must go before some sort of review board The book is also suitable for college undergraduates and graduate students in fields that bring them into environmental development of sites And it is useful for neighbors and other members of the public who want to understand proposed land development in their neighborhood *Directions of Development of Transport Networks and Traffic Engineering* Elżbieta Macioszek,Grzegorz Sierpiński,2018-07-30 This book offers a collection of valuable guidelines for making decisions concerning the future development of transport networks and traffic engineering The decision making support systems described here will certainly attract the interest of those who face the challenge of finding solutions to problems concerning modern transport systems on a daily basis Consequently the book is chiefly intended for local authorities involved in planning and preparing development strategies for specific transport related areas in both urban and regional contexts as well as for representatives of business and industry who are directly engaged in the implementation of traffic engineering solutions The guidelines provided in the respective chapters help to address the given problem soundly and to simplify the selection of an appropriate strategy The topics covered include increasing the competitiveness of public transport the status quo of electric vehicle infrastructures worldwide methods for calming urban traffic as an element of sustainable transport development speed traffic zones and electric buses car sharing systems in Poland a method for deconstructing the regional travel demand model monitoring urban traffic using floating car data problems of deliveries in urban agglomeration distribution systems

estimating the number of threatened people in case of fire in road tunnels and road pavement evaluation using advanced tools Since the book also considers new approaches to theoretical models including traffic flow surveys and measurements transport behaviors human factors in traffic engineering and road condition modeling it will also appeal to researchers and scientists studying these problems The book gathers selected papers presented at the 15th Scientific and Technical Conference Transport Systems Theory and Practice organized by the Department of Transport Systems and Traffic Engineering Silesian University of Technology in Katowice Poland on September 17 19 2018
