The previously classified story of the eccentric researchers who invented cutting edge underwater science to lead the Allies to D Day victory In August 1942 more than 7 000 Allied troops rushed the beaches of Normandy France in an all but forgotten landing Only a small fraction survived unscathed It was two summers before D Day and the Allies realized that they were in dire need of underwater intelligence if they wanted to stand a chance of launching another beach invasion and of winning the war Led by the controversial biologists J B S Haldane and Dr Helen Spurway an ingenious team of ragtag scientists worked out of homemade labs during the London Blitz Beneath a rain of bombs they pioneered thrilling advances in underwater reconnaissance through tests done on themselves in painful and potentially fatal experiments Their discoveries led to the safe use of miniature submarines and breathing apparatuses which ultimately let the Allies take the beaches of Normandy Blast injury specialist Dr Rachel Lance unpacks the harrowing narratives of these experiments while bringing to life the men and women whose brilliance and self sacrifice shaped the outcome of the war including their personal relationships with one another and the ways they faced skepticism and danger in their quest to enable Allied troops to breathe underwater The riveting science leading up to D Day has been classified for generations but Chamber Divers finally brings these scientists stories and their heroism to light     **Insight** ,1996     **NBS Special Publication** ,1980     The Writer's Guide to Self-Editing Naveed Saleh,2019-02-21

Over the years technological advances have given publishers the ability to produce more books and online publications with greater speed This new efficiency however has increased editors workloads limiting the amount of detailed editorial feedback that they can provide authors In turn writers must become self editors ensuring that their text is nearly perfect on submission This book serves as a guide to self editing nonfiction print and online publications including articles for general and academic audiences It is both prescriptive and descriptive drawing from stylebooks dictionaries research and more to provide a full picture of both style and grammar Also provided are techniques that boost search engine optimization and engagement of Internet audiences     Beauty Matters Yael Reisner,2019-11-18

Beauty in architecture matters again This issue of AD posits that after 80 years of aggressive suppression of engagement with aesthetics the temporarily dormant preoccupation with beauty is back This is evidenced by a current cultural shift from the supposedly objective to an emerging trust in the subjective a renewed fascination for aesthetics supported by new knowledge emanating simultaneously from disparate disciplines Digital design continues to influence architectural discourse not only due to changes in manufacturing but also through establishing meaning The very term post digital was introduced

by computational designers and artists who accept that digital gains in architectural design are augmented by human judgement and cognitive intuition The issue takes an interdisciplinary approach to this re emerging interest in beauty across neuroscience neuroaesthetics mathematics philosophy and architecture while discussing the work of the international architects in both practice and academe who are generating new aesthetics Contributors Alisa Andrasek Izaskun Chinchilla Marjan Colletti Peter Cook Robbert Dijkgraaf Winka Dubbeldam David Garcia Graham Harman Claudia Pasquero and Marco Poletto Alan Powers Gilles Retsin Kristina Schinegger and Stefan Rutzinger Fleur Watson and Martyn Hook and Semir Zeki Featured architects Archi Tectonics ecoLogicStudio NaJa deOstos Kazuyo Sejima Ryue Nishizawa SANAA soma architecture Studio Gang John Wardle Architects and Tom Wiscombe Architecture Positive Psychology Alan Carr,2013-09-05

Remediating deficits and managing disabilities has been a central preoccupation for clinical psychologists Positive Psychology in contrast is concerned with the enhancement of happiness and well being involving the scientific study of the role of personal strengths and positive social systems in the promotion of optimal wellbeing Alan Carr s Positive Psychology has become essential reading for anyone requiring a thorough and accessible introduction to the field This new edition retains all the features that made the first edition so popular including accounts of major theories and relevant research learning objectives chapter summaries research and personal development questions suggestions for further reading measures for use in research glossaries of new terms The book has also been completely updated to take account of recent research and major advances and includes a new chapter on Positive Psychotherapy an extended account of research on character strengths and virtues and a discussion of recent ground breaking research on emotional intelligence This new edition of Positive Psychology will prove a valuable resource for psychology students and lecturers as well as those involved in postgraduate training in related areas such as clinical psychology social work counselling and psychotherapy
