Homeward Bound Harry Turtledove,2005-12-27 The twentieth century was awash in war World powers were pouring men and machines onto the killing fields of Europe Then in one dramatic stroke a divided planet was changed forever An alien race attacked Earth and for every nation every human being new battle lines were drawn HOMEWARD BOUND With his epic novels of alternate history Harry Turtledove shares a stunning vision of what might have been and what might still be if one moment in history were changed In the WorldWar and Colonization series an ancient highly advanced alien species found itself locked in a bitter struggle with a distant rebellious planet Earth For those defending the Earth this all out war for survival supercharged human technology made friends of foes and turned allies into bitter enemies For the aliens known as the Race the conflict has yielded dire consequences Mankind has developed nuclear technology years ahead of schedule forcing the invaders to accept an uneasy truce with nations that possess the technology to defend themselves But it is the Americans with their primitive inventiveness who discover a way to launch themselves through distant space and reach the Race s home planet itself Now in the twenty first century a few daring men and women embark upon a journey no human has made before Warriors diplomats traitors and exiles the humans who arrive in the place called Home find themselves genuine strangers on a strange world and at the center of a flash point with terrifying potential For their arrival on the alien home world may drive the enemy to make the ultimate decision to annihilate an entire planet rather than allow the human contagion to spread It may be that nothing can deter them from this course With its extraordinary cast of characters human nonhuman and some in between Homeward Bound is a fascinating contemplation of cultures armies and individuals in collision From the novelist USA Today calls the leading author of alternate history this is a novel of vision adventure and constant astounding surprise

[New Approaches to Transcodification](#) Massimo Fusillo,Doriana Legge,Mirko Lino,Mattia Petricola,Gianluigi Rossini,2025-08-04 This collection aims to renew our perspective on adaptation and intermedial processes by thinking of them in terms of codes rather than media As a result the notion of transcodification emerges as a crucial tool in order to study the circulation of semiotic and aesthetic resources across disciplines knowledge

systems and cultures Defined as the transfer of meaning making potential from one semiotic domain to another transcodification both includes and transcends intermediality thus dramatically expanding the scope and research potential of adaptation and intermedial studies The essays collected here apply this framework to an incredibly wide variety of objects and issues from the relationship between art and historiography to the visual culture of finance from contemporary approaches to ekphrasis to the hidden labor of screenwriters from modern surveillance to digital comics from fansubbing to the reception of the classical world in the digital age from medieval theater to the role of videogames in the war on terror By fostering dialogue between radically different disciplines the book offers a unique approach to the study of semiotic interrelations across the most diverse aspects of human culture
