Adolphson,2000-08 The political influence of temples in premodern Japan most clearly manifested in divine demonstrations where rowdy monks and shrine servants brought holy symbols to the capital to exert pressure on courtiers has traditionally been condemned and is poorly understood In an impressive examination of this intriguing aspect of medieval Japan the author employs a wide range of previously neglected sources to argue that religious protest was a symptom of political factionalism in the capital rather than its cause It is his contention that religious violence can be traced primarily to attempts by secular leaders to rearrange religious and political hierarchies

to their own advantage thereby leaving disfavored religious institutions to fend for their accustomed rights and status In this context divine demonstrations became the preferred negotiating tool for monastic complexes For almost three centuries such strategies allowed a handful of elite temples to maintain enough of an equilibrium to sustain and defend the old style of rulership even against the efforts of the Ashikaga Shogunate in the mid fourteenth century By acknowledging temples and monks as legitimate co rulers The Gates of Power provides a new synthesis of Japanese rulership from the late Heian 794 1185 to the early Muromachi 1336 1573 eras offering a unique and comprehensive analysis that brings together the spheres of art religion ideas and politics in medieval Japan
