Prosperity for All Matthew Hilton, 2011-05-02
The history of consumerism is about much more than just shopping. Ever since the eighteenth century, citizen consumers have protested against the abuses of the market by boycotting products and promoting fair instead of free trade. In recent decades, consumer activism has responded to the challenges of affluence by helping to guide consumers through an increasingly complex and alien marketplace. In doing so, it has challenged the very meaning of consumer society and tackled some of the key economic, social, and political issues associated with the era of globalization. In *Prosperity for All*, the first international history of consumer activism, Matthew Hilton shows that modern consumer advocacy reached the peak of its influence in the decades after World War II. Growing out of the product testing activities of Consumer Reports and its international counterparts including Which in the United Kingdom, Que Choisir in France, and Test in Germany, consumerism evolved into a truly global social movement. Consumer unions, NGOs, and individual activists like Ralph Nader emerged in countries around the world, including developing countries in Southeast Asia and Latin America, concerned with creating a more equitable marketplace and articulating a politics of consumption that addressed the needs of both individuals and society as a whole. Consumer activists achieved many victories, from making cars safer to highlighting the dangers of using baby formula instead of breast milk in countries with no access to clean water. The 1980s saw a reversal in the consumer movement's fortunes, thanks in large part to the rise of an antiregulatory agenda both in the United States and internationally. In the process, the definition of consumerism changed, focusing more on choice than on access. As Hilton shows, this change reflects more broadly on the dilemmas we all face as consumers: Do we want more stuff and more prosperity for ourselves, or do we want others less fortunate to be able to enjoy the same opportunities and standard of living that we do? *Prosperity for All* makes clear that by abandoning a more idealistic vision for consumer society, we reduce consumers to little more than shoppers, and we deny the vast majority of the world's population the fruits of affluence.

The Indispensability of Phenomenology, Experiment and History René Van Hezewijk, Henderikus J. Stam, 2024-11-08 This book is the first comprehensive intellectual biography of Johannes Linschoten whose work has been credited with helping to bring down the Utrecht School of phenomenological psychology The authors show this to be a mistaken assumption in the light of Linschoten's entire oeuvre and demonstrate his importance for an understanding of a phenomenological psychology that necessarily coexists with an experimental scientific psychology In the Netherlands Linschoten is particularly appreciated for his last book published posthumously That volume *Idols of the Psychologist* took a critical look at phenomenological psychology and its pretensions while simultaneously acknowledging that a phenomenological outlook is a necessity for beginning any kind of experimental investigation Most commentators on this book considered Linschoten a convert from phenomenology to experimental psychology but have either ignored his earlier substantive work or have not seen the importance of the intellectual context for his final work By examining his life and the full extent of his voluminous writings this book demonstrates Linschoten's importance for the development of psychology in the Netherlands and beyond It will shed new light on the life and work of Johannes Linschoten as well as the Dutch school of phenomenology and its postwar contributions to psychology in Europe and North America Furthermore for the first time this book brings together important aspects of Linschoten's life with his prodigious output It demonstrates how his life and work created a unique psychology that deserves to be continued and developed
