Zealots Gifted Generation Ebook:

EBOOK: Deconstructing Special Education Gary Thomas, Andrew Loxley, 2007-08-16 This revised edition of a popular text offers students an updated and comprehensive overview across special education. It critically examines the intellectual foundations of special education and considers the consequences of their influence for professional and popular thinking about learning difficulties. The chapters place inclusion within a social and political context to highlight how concepts have been influenced by theory and ideology across the years. The book offers guidance to students on specific issues such as reading and behavioural difficulties with theoretically grounded information. With a fresh chapter discussing current research, intersectionality and increased marketisation within education, this book reflects the new landscape and legislation of special education. Essential reading for anyone studying or working in either special or inclusive education. Few could build the case as well as Thomas and Loxley. Melanie Nind, Professor of Education, University of Southampton, UK. Few books in the field of education merit the soubriquet 'must read'. This is one such. Philip Garner, Professor, Brunel University, UK. An absolute must read for all of us committed to realising genuine inclusion within schools and society. Jan Valle, The City College of New York, USA.
