The Valley Of The Kings A Site Management Handbook Theban Mapping Project:

The Valley of the Kings Kent R. Weeks, 2014 *The Oxford Handbook of the Valley of the Kings* Richard H.

Wilkinson, Kent Weeks, 2016-01-19 The royal necropolis of New Kingdom Egypt known as the Valley of the Kings KV is one of the most important and celebrated archaeological sites in the world Located on the west bank of the Nile river about three miles west of modern Luxor the valley is home to more than sixty tombs all dating to the second millennium BCE The most famous of these is the tomb of Tutankhamun first discovered by Howard Carter in 1922 Other famous pharaohs interred here include Hatshepsut the only queen found in the valley and Ramesses II ancient Egypt's greatest ruler Much has transpired in the study and exploration of the Valley of the Kings over the last few years Several major discoveries have been made notably the many chambered KV5 tomb of the sons of Ramesses II and KV 63 a previously unknown tomb found in the heart of the valley Many areas of the royal valley have been explored for the first time using new technologies revealing ancient huts shrines and stelae New studies of the DNA filiation cranio facial reconstructions and other aspects of the royal mummies have produced important and sometimes controversial results The Oxford Handbook of the Valley of the Kings provides an up to date and thorough reference designed to fill a very real gap in the literature of Egyptology It will be an invaluable resource for scholars teachers and researchers with an interest in this key area of Egyptian archaeology First introductory chapters locate the Valley of the Kings in space and time Subsequent chapters offer focused examinations of individual tombs their construction content development and significance Finally the book discusses the current status of ongoing issues of preservation and archaeology such as conservation tourism and site management In addition to recent work mentioned above aerial imaging remote sensing studies of the tombs architectural and decorative symbolism problems of conservation management and studies of KV related temples are just some of the aspects not covered in any other work on the Valley of the Kings This volume promises to become the primary scholarly reference work on this important World Heritage Site *The Valley of the Kings* Kent R. Weeks, Nigel J. Hetherington, 2014-03-01 During the New Kingdom c 1570 1070 BCE the Valley of the Kings was the burial place of Egypt's pharaohs including such powerful and famous rulers as Amenhotep III Rameses II and Tutankhamun They were buried here in large and beautifully decorated tombs that have become among the country's most visited archaeological sites The tourists contribute millions of badly needed dollars to Egypt's economy But because of inadequate planning these same visitors are destroying the very tombs they come to see Crowding pollution changes in the tombs air quality ever growing tourist infrastructure all pose serious threats to the Valley's survival This volume the result of twenty five years of work by the Theban Mapping Project at the American University in Cairo traces the history of the Valley of the Kings and offers specific proposals to manage the site and protect its fragile contents At the same time it recognizes the need to provide a positive experience for the thousands of visitors who flock here daily This is the first major management plan developed for any Egyptian archaeological site and as its proposals are

implemented they offer a replicable model for archaeologists conservators and site managers throughout Egypt and the region Published in both English and Arabic editions and supported by the World Monuments Fund this critical study will help to ensure the survival of Egypt's patrimony in a manner compatible with the country's heavy reliance on tourism income
