

The image shows the front cover of a book. The background is a complex marbled paper pattern with swirling, organic shapes in shades of brown, tan, and cream. On the left side, there is a vertical strip of dark blue or black material, possibly leather or cloth, which serves as the spine. A white rectangular label with a thin black border is centered on the marbled background. Inside this label, the title is printed in a large, black, serif font. The title is arranged in five lines: 'THE', 'WALL', 'CHART', 'OF', and 'WORLD HISTORY'. The words 'THE' and 'OF' are smaller than the others. Horizontal lines are placed above 'THE' and below 'OF'. The subtitle, 'From Earliest Times To The Present', is written in a smaller, italicized serif font below the main title. A decorative flourish is centered below the subtitle. At the very bottom of the label, the text 'A FACSIMILE EDITION' is printed in a small, all-caps, sans-serif font.

 Michael Twyman,2001 This stimulating and richly illustrated volume addresses the changes brought about by lithography in the design and production of a wide range of graphic material books prints music maps and ephemera Underpinning the text is the view that lithographic printers and their co workers revealed limitations in the capabilities of earlier methods of print production by exploring the range of opportunities offered by the new process In *Breaking the Mould* Professor Twyman demonstrates how these print workers responded to the economy directness versatility and autographic qualities of lithography and how some of the techniques they used led to the blurring of distinctions between printing processes He then explores the lithographically printed products of the nineteenth century and argues that the categorisation of printing by artefact introduced for practical reasons by museums and libraries obscures some of the most significant contributions made by the process during its first one hundred years Finally bringing the debate into current thinking Professor Twyman suggests that research into lithography across artefactual boundaries can provide guidance for anyone studying the integration of graphic communication brought about by the electronic revolution
