The Whiteman Scenario:

The Whiteman Scenario Steve McCurdy, 2011-05-01 On the eve of the Nixon resignation the Soviet Union takes an action that elevates the Strategic Air Command and the North American Air Defense Command to just short of full combat alert status Under normal circumstances there would be a direct escalation of responses on both sides that could take us to the brink of nuclear launch On this evening though there is an uncharacteristic hesitation on the part of normally hawkish US leadership Through riveting narrative the story shows that the hesitation was a reluctance to break an iron clad do not disturb order from the President A reluctance based in the fear that the event MUST have a rational explanation an explanation that will vanish in a conflagration of nuclear exchanges if Nixon in his depressed and panicked state interprets the event as an attack and a way out of the Watergate debacle The actions of an observant off duty missile launch officer cause the Joint Chiefs and SAC commanders to back down from an immanent launch The story is based on a real event and documented evidence that during the Yom Kippur war it was Kissinger and not Nixon who handled elevation in DefCon and preparedness Nixon it is reported told Kissinger to handle it Im dying Theyre trying to kill me This was in reference to the Watergate press feeding frenzy that had pushed Nixon to the point of emotional collapse The Secret Service agent on duty was ordered to lock the door from Nixons Camp David office to the swimming pool for fear he might try to drown himself The story compresses a series of many such actual events into the evening before the resignation **The Science of Racism**

Keon West, 2025-02-18 In this frank funny and meticulous book a leading social scientist lays out the striking facts we know about racism how we have uncovered them and how we can start to fix them Studies and surveys show time and again that about 50 percent of people believe that racism is no longer an issue today The other half would disagree vehemently And much of the writing on the subject of race and racism is equally divisive in large part because so much of it is based on opinion and personal experience It s not grounded in empiricism It s not science In *The Science of Racism* social psychologist Keon West corrects that idea moving this urgent conversation beyond anecdote and polemic in search of conclusive answers and solutions Starting with a fascinating look at experiments around race in hiring Dr West brilliantly and methodically walks readers through our comprehensive understanding of this controversial topic He looks at how racism impacts every stage and all facets of life from birth to death in education work and business friendships and relationships police and the justice system and healthcare He also looks at the challenges around studying these questions and the ways we can uncover the truth and then where we go from here why unconscious bias training can actually make things worse and what systems and techniques can lead us to a more equitable future *Hearings, Reports and Prints of the Senate Committee on Foreign Relations*
