God and Evolution: Creativity In Action Jock Abra, 2015-01-20 Atheism this book argues is unbelievable The universe's wonders couldn't have come about by chance Natural selection alone doesn't produce evolution Therefore since evolution resembles the creative process especially in using trial and error God's creative activity is responsible and human creators reveal much about him However that process is goal directed so evolution must be as well But the goal a Picasso or Darwin pursues is vague They don't know exactly where they're going and make mistakes and so therefore must God Thus Abra rejects the perfect God assumed by many religions and Intelligent Design Why bring back God To restore meaning and purpose to existence and faith's many benefits To better explain how the universe scientific laws and life itself came about and living things attractive but useless properties Other discussions clarify both creativity and the creative God Is there one kind of creativity or many A sex difference Are creators neurotic

How we Get Mendel Wrong, and Why it Matters Kostas

Kampourakis,2023-12-28 This book illustrates that the stereotypical representations of Gregor Mendel and his work misrepresent his findings and their historical context The author sets the historical record straight and provides scientists with a reference guide to the respective scholarship in the early history of genetics The overarching argument is twofold on the one hand that we had better avoid na ve hero worshipping and understand each historical figure Mendel in particular by placing them in the actual sociocultural context in which they lived and worked on the other hand that we had better refrain from teaching in schools the naive Mendelian genetics that provided the presumed scientific basis for eugenics Key Features Corrects the distorting stereotypical representations of Mendelian genetics and provides an authentic picture of how science is done focusing on Gregor Mendel and his actual contributions to science Explains how the oversimplifications of Mendelian genetics were exploited by ideologues to provide the presumed scientific basis for eugenics Proposes a shift in school education from teaching how the science of genetics is done using model systems to teaching the complexities of development through which heredity is materialized
