Transition And Development In China Towards Shared Growth:

Transition and Development in China Mr Yun Chen, 2012-11-28 China's transition from a planned economy to a market economy has succeeded in producing more than a decade of phenomenal growth. Whilst similar reforms in countries of Central and Eastern Europe and the former Soviet Union have seen an initial downturn in production usually with a significant rise in unemployment, the success of the approach taken by China has been remarkable. However, China embarked upon the process without a well designed blueprint at the outset. The resulting piecemeal, partial, incremental and often experimental approach has proved complicated to implement, requiring a complex melding of politics and economics, internal and foreign affairs, government and market. How the difficult task of balancing the diverse array of often competing concerns has been achieved is the subject of this book, which examines the dismantling of the centrally planned system and the mechanism of institutional change in Chinese transition.

Prevention and Crisis Management Steven Rosefielde, 2013 This book highlights the future threat to Asia from a broader perspective that takes account of the Japanese and Asian financial crises during the 1990s as well as the global crisis of 2008. It reveals that Asian crises take many diverse forms and that the solutions devised to date have only been locally and not universally effective. Policymakers are accordingly advised to always plan for the element of surprise.

Rising China in the Changing World Economy Liming Wang, 2012-03-12 China's rapid and sustained growth over last thirty years has propelled it to become the world's second largest economy today and potentially the largest in the foreseeable future. As one of the first major economies pulling out of recession and the last remaining major socialist country in the world today, China presents a challenge to established thinking on the essential primacy of global capitalism and the settled nature of the world system as China becomes more integrated into the world economy and the international system, both are themselves potentially transformed as a result of China's involvement. This book explores a wide range of issues connected with the impact of China on the global economy and the prevailing international system. Subjects covered include China's multinationals, international acquisitions, the exchange rate, research and development and technology transfer, China's emerging major business

groupings and small and medium sized enterprises

The Balkans: Foreign Direct Investment and EU Accession

Aristidis Bitzenis, 2016-03-23 The fall of communism and subsequent developments have put a renewed spotlight on the potential of the Balkan economies Bulgaria Albania Serbia Montenegro Romania and the Former Yugoslav Republic of Macedonia are countries which have attracted low levels of investment and poor political leadership in most of the countries has delayed much needed reforms However there are now signs of improvement and this timely book fills a significant gap in the available literature Demonstrating that these countries must engage as fully as possible with the world economy via EU accession this book explores the implications of the specific characteristics of these countries which have made the transition process more difficult This exciting new volume is valuable reading for students academics and business professionals interested in international development in the Balkans

The Evolution of the Stock Market in China's Transitional

Economy Jianxun Chen, Huici Shi, 2002 The book The Evolution of the Stock Market in China's Transitional Economy by Chien Hsun Chen and Hui Tzu Shih offers valuable insights into the evolution and development of the Chinese stock market The book was written with an important mission in mind how to develop an efficient financial system that facilitates innovation and spontaneous evolution of the society Guojun Wu Journal of Asian Business Chien Hsun Chen and Hui Tzu Shih have produced an informative and insightful study of China's stock market development In The Evolution of the Stock Market in China's Transitional Economy the reader will find a straightforward account of the development of China's stock markets that further clarifies the role China's capital markets will play in the country's financial future Mark T Fung The China Business Review The establishment of the Shanghai Stock Exchange in December 1990 was a landmark in China's institutional transformation With this in mind the authors consider the factors relating to institutional change such as changes in the financial system the scale and structure of stock market operational efficiency and the regulatory system of the stock market During the course of its development the Chinese stock market has experienced speculation dramatic fluctuations and violations of market regulations of frequent and diverse natures There is therefore urgent need for the discussion contained within this volume of best procedure policies for the establishment of a properly ordered and regulated market The authors assess the operational performance of listed companies and changes in the external environment such as the impact of China's accession to the WTO on the stock market The authors find that WTO accession will have a more serious impact on the more heavily protected agricultural sector and on capital intensive industries such as automobile instruments cotton and wheat to name a few They argue that the fundamental reason for the inefficiency of China's stock market is the weakness of the competitive mechanism leading to imperfect competition and rent seeking activity This book will be of great interest to academics and researchers of Asian studies and money and finance Multinational enterprise managers as well as brokers dealers business economists and others involved in the global financial markets will also find this book of value
