The “New” Epidemic- Grading Practices Andre’ Mathews, 2016-03-16 This book is a comprehensive view on the grading practices and policies in American public schools. The content of the book identifies the lack of alignment amongst the Federal, State and Local Districts and the need to adopt a unified policy. Educational institutions are creating their own versions of grading systems that lack integrity, flawed in design, hinder many students from graduating and/or achieving opportunities to become a more productive citizen after high school completion. Section I: The structure of the book begins with a systemic view of development by identifying the philosophical and theoretical aspects involved in the grading system. Section II: The authors work then transitions to the structure of the grading system, addressing the mathematical aspects of calculating a student's grade point average to the teacher's validity of grades. Section III: This section identifies the parent's role and need to understand the grade itself and its effect on the student's overall outcome and class ranking. Section IV: The book ends with a strong analysis of the system, parental rights, examples of educational disasters, and schools' quest for new grading systems. All in all, this book takes a journey throughout the entire educational system, identifying a need for change on all levels as it relates to the grading system. The overall message emphasizes the parent's need to be cognizant of the importance of being involved and properly motivating, mentoring, monitoring, modeling, and managing their child's educational careers. All stakeholders should walk away with a sense of ownership to the problem and an understanding that the time for change is now. The ethnic margin is widening, and too many students are graduating unmarketable. A grade is more than a number; it's a quality of life.

The Art of Focused Conversation for Schools, Third Edition Jo Nelson, 2013-08-20 Why don't kids learn? Why can't students do higher order thinking? Why do educators have endless staff meetings with few results? How can parents and teachers communicate better? The pressure upon educators to teach more to a wider range and number of students with decreasing resources and supports makes it urgent to find tools to answer such questions. *The Art of Focused Conversation for Schools* demonstrates how the Focused Conversation method, widely used in organizations and businesses, can effectively be used in a K-12 educational setting. Each section deals with interactions among students, staff, and parents and elaborates with over 100 sample conversations designed to make learning more meaningful, prevent and solve problems, and make communications in meetings more effective. Appendices showcase integrated curriculum examples where conversations have been used in unique combinations and list sample questions for each level of the conversation method. With a bibliography and index included and patterned after its highly successful predecessor *The Art of Focused Conversation: 100 Ways to Access Group Wisdom in the Workplace*, this book will be welcomed by parents, students, educators, and school administrators everywhere. The Institute of Cultural Affairs has over 40 years' experience in more than 32 nations. A unique facilitation, research, and training organization, ICA Canada has provided participatory skills to many thousands of people worldwide.
