Transnational Currents In A Shrinking World 1870 1945:

Transnational Currents in a Shrinking World Emily S. Rosenberg, 2014-04-21 Emily Rosenberg examines the social and cultural networks that emerged from global exchanges between 1870 and 1945 Transnational connections were being formed many decades before globalization became a commonplace term in economic and political discourse and these currents underscore the fluidity of spatial and personal identifications The Great Cauldron Marie-Janine Calic, 2019-06-10 We often think of the Balkans as a region beset by turmoil and backwardness but from late antiquity to the present it has been a dynamic meeting place of cultures and religions Marie Janine Calic invites us to reconsider the history of this intriguing diverse region as essential to the story of global Europe Locating the Global Holger Weiss, 2020-08-10 This volume adds to the plurality of global histories by locating the global through its articulation and manifestation within particular localities It accomplishes this by bringing together interlinked case studies that analyse various temporal and spatial dimensions of the global in the local and the interactions between the local and the global The case studies apply a spatial approach to analyse how global questions of space movement networks borders and territory are worked out at a local level The material draws on the Nordic countries Europe the Atlantic world Africa and Australia and ranges from the seventeenth to the twentieth century It is further divided into sections that address topics such as the translocality of humans and goods local articulations of identities and globalities parliamentarism and anti colonialism the organization of knowledge and the construction of spaces of representation and memory **Legalist Empire** Benjamin Allen Coates, 2016 Legalist Empire explores the intimate connections between international law and empire in the United States from 1898 to 1919

The European Heritage Gerard Delanty, 2017-07-06 Gerard Delanty offers a critical interpretation of the European heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in Europe that compels us to re think the European past One of the main insights informing this book is that a transnational and global perspective on European history can reorient the European heritage in a direction that offers a more viable way for contemporary Europe to articulate an intercultural identity in keeping with the emerging shape of Europe and with its own often acknowledged past He argues that the European heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives Such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance He argues that the specificity of the European dimension of culture is in the entanglement of many cultures rather than in an original culture The cultures of Europe are not separated but have been shaped in close interaction with each other and with the non European world Nations are not therefore unique exceptional or fundamentally different from each other The outcome of such intermingling is a multiplicity of ideas of Europe that serve as shared cultural reference points **Esperanto and Languages of Internationalism in Revolutionary Russia** Brigid O'Keeffe, 2021-05-20 Winner

of the 2022 Ab Imperio Award Hoping to unite all of humankind and revolutionize the world Ludwik Zamenhof launched a new international language called Esperanto from late imperial Russia in 1887 Ordinary men and women in Russia and all over the world soon transformed Esperanto into a global movement Esperanto and Languages of Internationalism in Revolutionary Russia traces the history and legacy of this effort from Esperanto's roots in the social turmoil of the pre-revolutionary Pale of Settlement to its links to socialist internationalism and Comintern bids for world revolution and finally to the demise of the Soviet Esperanto movement in the increasingly xenophobic Stalinist 1930s In doing so this book reveals how Esperanto and global language politics more broadly shaped revolutionary and early Soviet Russia Based on extensive archival materials Brigid O Keeffe's book provides the first in depth exploration of Esperanto at grassroots level and sheds new light on a hitherto overlooked area of Russian history As such Esperanto and Languages of Internationalism in Revolutionary Russia will be of immense value to both historians of modern Russia and scholars of internationalism transnational networks and sociolinguistics **Technological Internationalism and World Order** Waqar H.

Zaidi,2021-06-03 Between 1920 and 1950 British and US internationalists called for aviation and atomic energy to be taken out of the hands of nation states and instead used by international organizations such as the League of Nations and the United Nations An international air force was to enforce collective security and internationalized civil aviation was to bind the world together through trade and communication The bomber and the atomic bomb now associated with death and devastation were to be instruments of world peace Drawing on rich archival research and focusing on public and private discourse relating to the control of aviation and atomic energy Waqar H Zaidi highlights neglected technological and militaristic strands in twentieth century liberal internationalism and transforms our understanding of the place of science and technology in twentieth century international relations Revolutionary World David Motadel,2021-03-25 Throughout the modern age revolutions have spread across state borders engulfing entire regions continents and at times the globe Revolutionary World examines the spread of upheavals during the major revolutionary moments in modern history the Atlantic Revolutions Europe's 1848 revolts the commune movement of the 1870s the 1905 15 upheavals in Asia the communist revolutions around 1917 the Wilsonian uprisings of 1919 the Third World revolutions the global Islamic revolt of 1978 79 the events of 1989 and the rise and fall of the Arab Spring The chapters explore the nature of these revolutionary waves tracing the exchange of radical ideas and the movements of revolutionaries around the world Bringing together a group of distinguished historians Revolutionary World shows that the major revolutions of the modern age which have so often been studied as isolated national or imperial events were almost never contained within state borders and were usually part of broader revolutionary moments *Performing the Cold War in the Postcolonial World* Christopher B.

Strikwerda, 2025-01-17 This book offers a new interpretation of the origins of the contemporary global order the set of institutions and international practices created by the USA and its allies after the Second World War Previous interpretations have argued that the USA played the predominant role in creating the global order to fight the Cold War against the Soviet Union The author argues that a broader perspective is necessary to understand both the origins of the global order and its ongoing tensions up until today a perspective that includes the legacy of both world wars the role of imperialism and the alternative strategy of globally oriented economic blocs The cooperative tradition in the founding of the global order and the contributions of nations besides the USA provides useful insights for those interested in the current global order and the challenges it faces from Russia and China **Beyond 1917** Thomas W. debate over the interpretation of a limited number of texts produced by a small group of prominent scholars writers and intellectuals from the cultural centers of Europe Addressing the question What is European intellectual space this collection of essays seeks to demonstrate how this space is shaped ordered and communicated between Europe s fluctuating cores and peripheries Focusing on the asymmetrical relations between large and small centers and peripheries cores and margins in scholarly and other forms of interaction and within Europe as well as globally the volume brings forth a variety of trajectories and strategies developed by intellectuals outside the culturally dominant centers Contributors are David Cottingham Narve Fuls s Tommaso Giordani Marja Jalava Zs fia L rand ukasz Miko ajewski Diana Mishkova Stefan Nyg rd Emilia Palonen Manolis Patiniotis Johanna Rainio Niemi Tore Rem Jos Mar a Rosales and Johan Strang The Idealist Samuel Zipp,2020-03-10 Winner of the Robert H Ferrell Book Prize The Idealist is a powerful book gorgeously written and consistently insightful Samuel Zipp uses the 1942 world tour of Wendell Willkie to examine American attitudes toward internationalism decolonization and race in the febrile atmosphere of the world s first truly global conflict Andrew Preston author of Sword of the Spirit Shield of Faith A dramatic account of the plane journey undertaken by businessman turned maverick internationalist Wendell Willkie to rally US allies to the war effort Willkie s tour of a planet shrunk by aviation and war inspired him to challenge Americans to fight a rising tide of nationalism at home In August 1942 as the threat of fascism swept the world a charismatic Republican presidential contender boarded the Gulliver at Mitchel Airfield for a seven week journey around the world Wendell Willkie covered 31 000 miles as President Roosevelt s unofficial envoy He visited the battlefield in North Africa with General Montgomery debated a frosty de Gaulle in Beirut almost failed to deliver a letter to Stalin in Moscow and allowed himself to be seduced by Chiang Kai shek in China Through it all he was struck by the insistent demands for freedom across the world In One World the runaway bestseller he published on his return Willkie challenged Americans to resist the America first doctrine espoused by the war s domestic opponents and warned of the dangers of narrow nationalism He urged his fellow citizens to end colonialism and embrace equality of opportunity for every race and every nation With his radio broadcasts regularly drawing over 30 million listeners he was able to reach Americans directly in their homes His call for a more equitable and interconnected world electrified the nation until he was silenced abruptly by a series of heart attacks in 1944 With his death America lost its most effective globalist the man FDR referred to as Private Citizen Number One At a time when America first is again a rallying cry Willkie s message is at once chastening and inspiring a reminder that one world is more than a matter of supply chains and economics and that racism and nationalism have long been intertwined **The Institution of International Order** Simon Jackson,Alanna O'Malley,2018-07-11 This volume delivers a history of internationalism at the League of Nations and the United Nations UN with a focus on the period from the 1920s to the 1970s when the nation state ascended to global hegemony as a political formation Combining global regional and local scaes of analysis the essays presented here provide an interpretation of the two institutions and their complex

interrelationship that is planetary in scale but also pioneeringly multi local Our central argument is that although the League and the UN shaped internationalism from the centre they were themselves moulded just as powerfully by internationalisms that welled up globally far beyond Geneva and New York City The contributions are organised into three broad thematic sections the first focused on the production of norms the second on the development of expertise and the third on the global re ordering of empire By showing how the ruptures and continuities between the two international organisations have shaped the content and format of what we now refer to as global governance the collection determinedly sets the Cold War and the emergence of the Third World into a single analytical frame alongside the crisis of empire after World War One and the geopolitics of the Great Depression Each of these essays reveals how the League of Nations and the United Nations provided a global platform for formalising and proliferating political ideas and how the two institutions generated new spectrums of negotiation and dissidence and re codified norms As an ensemble the book shows how the League of Nations and the United Nations constructed and progressively re fashioned the basic building blocks of international society right across the twentieth century Developing the new international history s view of the League and UN as dynamic complex forces the book demonstrates that both organisations should be understood to have played an active role not just in mediating a world of empires and then one of nation states but in forging the many principles and tenets by which international society is structured

The History of Social Movements in Global Perspective Stefan Berger, Holger Nehring, 2017-01-12 Social movements have shaped and are shaping modern societies around the globe this is evident when we look at examples such as the Arab Spring Spain s Indignados and the wider Occupy movement In this volume experts analyse the classic and new social movements from a uniquely global perspective and offer insights in current theoretical discussions on social mobilisation Chapters are devoted both to the study of continental developments of social movements going back to the nineteenth century and ranging to the present day and to an emphasis on the transnational dimension of these movements Interdisciplinary and truly international this book is an essential text on social movements for historians political scientists sociologists philosophers and social scientists
