Programming Languages and Systems Giuseppe Castagna, 2009-03-09 ETAPS 2009 was the 12th instance of the European Joint Conferences on Theory and Practice of Software ETAPS is an annual federated conference that was established in 1998 by combining a number of existing and new conferences This year it comprised five conferences CC

ESOP FASE FOSSACS TACAS 22 satellite workshops ACCAT ARSPA WITS Bytecode COCV COMPASS FESCA FInCo FORMED GaLoP GT VMT HFL LDTA MBT MLQA OpenCert PLACES QAPL RC SafeCert TAASN TERMGRAPH and WING four tutorials and seven invited lectures excluding those that were specific to the satellite events. The five main conferences received 532 submissions including 30 tool demonstration papers, 141 of which were accepted, 10 tool demos giving an overall acceptance rate of about 26% with most of the conferences at around 25%. Congratulations therefore to all the authors who made it to the final programme. I hope that most of the other authors will still have found a way of participating in this exciting event and that you will all continue submitting to ETAPS and contributing towards making it the best conference on software science and engineering. The events that comprise ETAPS address various aspects of the system development process including specification, design, implementation, analysis and improvement. The languages, methodologies and tools which support these activities are all well within its scope. Different blends of theory and practice are represented with an inclination towards theory with a practical motivation on the one hand and soundly based practice on the other.

Functional Programming, Glasgow 1994 Kevin Hammond, David N. Turner, Patrick M. Sansom, 2013-03-09. This is the proceedings of the seventh annual workshop held by the Glasgow Functional Programming Group. The purpose of the workshop is to provide a focus for new research to foster research contacts with other functional language researchers and to provide a platform for research students to develop their presentation skills. As in previous years we spent three days closeted together in a pleasant seaside town isolated from normal work commitments. We were joined by colleagues from other universities both UK and abroad and from industry. Workshop participants presented a short talk about their current research work and produced a paper which appeared in a draft proceedings. These papers were then reviewed and revised in the light of discussions at the workshop and the referees' comments. A selection of those revised papers, the majority of those presented at the workshop, appears here in the published proceedings. The papers themselves cover a wide span from theoretical work on algebras and bisimilarity to experience with a real world medical application. Unsurprisingly given Glasgow's track record there is a strong emphasis on compilation techniques and optimisations and there are also several papers on concurrency and parallelism.
