Forensic Mental Health Assessment Kirk Heilbrun, Geoffrey Marczyk, David DeMatteo, 2002-04-11 Forensic mental health assessments are evaluations conducted by individuals from different disciplines on a variety of questions in civil criminal and family law A growing number of mental health professionals including psychologists psychiatrists and social workers are being called upon to assess everything from an individual s competence to stand trial to the risk or threat of future violence and asked to weigh in on cases ranging from murder and assault to malpractice and child custody General principles have emerged to guide professionals conducting forensic mental health assessment Forensic Mental Health Assessment A Casebook illustrates those principles using relevant real world case material Built around actual case reports from expert forensic psychologists and psychiatrists the volume probes a broad range of legal questions through the detailed examination of more than 40 cases Topics include Miranda rights waiver competence to act as one s own attorney competence to stand trial juvenile commitment sanity at the time of the offense

child custody termination of parental rights guardianship and malpractice This is the first casebook focusing specifically on forensic assessment It contains cases from a broad range of civil criminal and family legal questions described in case reports contributed by expert forensic psychologists and psychiatrists It will be useful for anyone involved in assessments for the courts and attorneys including psychologists psychiatrists social workers and attorneys *Murderous Minds on Trial* Stanley Semrau, Judy Gale, 2001-10-01 Each murder trial brings its own tangle of evidence legal parameters medical factors social circumstances and personalities The tangle gets trickier when we must keep in mind that A person shall not be criminally responsible for an act or omission if they suffer from a mental disorder such that they were not able to appreciate the nature and quality of their act or to know that it was wrong Forensic Psychiatrist Stanley Semrau takes us through some of the more terrible and fascinating tales from his career and from historical sources including several cases that came to national attention Clifford Olson and Terry Driver The Abbotsford Killer and the Daniel McNaughten case that marked the beginning of the insanity defense in Britain in 1843 These chilling and thought provoking stories delve deep into the psychiatric aspects of homicide law and into the psychology of the murderous mind Semrau s examination of these thrilling cases also offers a critique of the existing laws in Canada as he argues for profound changes Offender Profiling in the Courtroom Norbert Ebisike, 2008-09-30 Offender profiling is mainly used by the police to narrow down suspects in cases where no physical evidence was left at a crime scene Recently however this technique has been introduced into the courtroom as evidence raising questions of its reliability validity and admissibility at trial Because offender profiling was not originally intended to be used in the courtroom its entrance there has caused both confusion and controversy Offender Profiling in the Courtroom discusses the use of profiling evidence in criminal trials Ebisike also covers the history development approaches to and the legal aspects of this crime investigation technique Several serial crime cases where investigators used offender profiling during the criminal proceedings are discussed including the case of the New York Mad Bomber George Metesky who caused thirty two bomb explosions in New York City between 1940 and 1956 and the case of Albert DeSalvo known as the Boston Strangler who carried out several sexually motivated murders in Boston Massachusetts between 1962 and 1964 Ebisike demystifies offender profiling and raises awareness about the successes and the pitfalls of the process and its use at trial Offender profiling is a crime investigation technique where information gathered from the crime scene witnesses victims if alive autopsy reports and information about an offender s behavior is used to draw up a profile of the sort of person likely to commit such crime Offender profiling does not point to a specific offender It is based instead on the probability that someone with certain characteristics is likely to have committed a certain type of crime In spite of the ever increasing media interest in the use of offender profiling in criminal trials this technique is still not well understood by many people including judges lawyers and jurors who weigh such evidence at trial Some people see offender profiling as a tried and true method of identifying suspects and others simply see it as a fiction Here the author helps readers
