Fact and Fancy in Television Regulation Harvey J. Levin, 1980-07-18 How diverse can and should TV programming be And especially in what precise ways does governmental regulation of TV affect or fail to affect the programs station owners produce programs which in the final analysis shape in such large measure the values of Americans It is to these timely and beguiling questions that Harvey Levin addresses his dispassionate assessment of the complex relationship between government and the TV industry Analyzing data drawn from the history of the FCC s regulatory decisions as well as from interviews with numerous government and industry officials Professor Levin shows how the present form of restrictive governmental regulation almost always results in higher profits and rents for TV stations with no concomitant increase in programming diversity In addition Professor Levin investigates

various other aspects of the media market from the particular kinds of crucial decisions that are made when for example a newspaper owns a TV station to the kinds of problems that arise when commercial rents are taxed to fund public TV from the brand of programming we are offered when a monopoly controls a given TV market to the nature of programming in a situation of steady and fair competition Following a comprehensive assessment the author makes a compelling case for diversification of station ownership in order to be safe rather than sorry He also argues for the entry of new stations more extensive support of public TV and some form of quantitative program requirements all of which will help bring about greater program diversity Professor Levin s volume provides us with a fully documented and sharply focused analysis of the theories policies and problems of one of the most powerful and misunderstood of contemporary institutions **Federal Register** ,1975-03-10 Television And The Crisis Of Democracy Douglas Kellner,2018-02-02 This is one of the best books I ve read on the changing relationship of television to society It provides a very good analysis of theoretical perspectives on television and makes excellent use of critical theory An accessible book that at the same time challenges the reader to think more deeply about the role of television in a formally democratic society Vincent Mosco Carleton University In this pathbreaking study Douglas Kellner offers the most systematic critically informed political and institutional study of television yet published in the United States Focusing on the relationships among television the state and business he traces the history of television broadcasting emphasizing its socioeconomic impact and its growing political power Throughout Kellner evaluates the contradictory influence of television a medium that has clearly served the interests of the powerful but has also dramatized conflicts within society and has on occasion led to valuable social criticism InfoWorld ,1995-09-11 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects The Business of Children's Entertainment Norma Odom Pecora,2002-03-06 For over 20 years the development of children s television programming has been subsidized by toy manufacturers The result has been an increased commercialisation of children s popular culture the creation of a material world of childhood characterized by brand name toys games clothing and television characters Drawing on historical background and case studies this book presents a unique look at the development of children as targets of the media and commercial industries and examines the economic and social forces that have defined the evolution of children s entertainment This volume is of interest to professionals and students in media studies mass communication and related fields readers interested in contemporary children s culture and the content of children s programming
