Read, write, and solve under each flip flap.

Sara went to the bakery and saw 27 cinnamon rolls and 15 cupcakes. How many treats did the bakery have in all?

Then the baker came out with 39 freshly made donuts. Now how many treats does the bakery have altogether?

Read, write, and solve under each flip flap.

My family went to the races. We counted 29 blue cars and 32 red cars. How many cars did we see altogether?

Then 28 yellow cars came out onto the race track. How many blue, red, and yellow cars are there in all?

Making Sense of Word Problems Eric de Corte, Brian Greer, Lieven Verschaffel, 2000-01-01 Word problems have been a staple of mathematics instruction for centuries yet the rationale for their use has remained largely unexamined A range of findings have shown how students consistently answer them in ways that fail to take account of the reality of the situations described This monograph reports on studies carried out to investigate this suspension of sense making in answering word problems In Part One a wide range of examples documenting the strength of the phenomenon is reviewed Initial surprise at the findings was replaced by a conviction that the explanation lies in the culture of the mathematics classroom specifically the rules implicitly governing the nature and interpretation of the word problem genre This theoretical shift is reflected in Part Two A detailed analysis of the way in which word problems are currently taught in typical mathematical classrooms is followed by reviews of design experiments illustrating how by immersing students in a fundamentally changed learning environment they can acquire what the authors consider to be more appropriate conceptions

about and strategies for doing word problems Part Three turns to a wider discussion of theoretical issues a further analysis of the features of the educational system considered responsible for outcomes detrimental to many students understanding and conception of mathematics and suggestions for rethinking the role of word problems within the curriculum *Curriculum Development for Students with Mild Disabilities* Carroll J. Jones, 2010 Many teachers of students with mild disabilities experience difficulty writing IEPs and they lack a foundation in the regular education curriculum of academic skills and sequences associated with each grade level This book was designed to provide this foundation Presented in the form of scope and sequence charts that can be used as objectives for the State Frameworks goals and benchmarks this resource assists in preparing IEPs including the new process of identification of children with disabilities through their responses to intervention RTI An additional focus is on the impact of federal laws IDEA and NCLB on the curriculum and assessment in schools today The book has been reorganized into ten chapters including historical perspectives early childhood special education curricula oral expression curricula reading and listening curricula written expression curricula mathematics curricula educational technology curricula K 12 social and self competence curricula science curricula and evaluation reports case studies Appendix The scope and sequence charts were modified to include current national education standards and benchmarks and the skills in each of the academic areas that require annual state assessment These charts will assist teachers in modifying the general education curriculum for students with mild disabilities and to write complete Individual Education Programs using age appropriate and developmentally appropriate teaching and assessment materials Chapter summaries included for review purposes also serve as selective and motivational reading With special education teachers in short supply and the demands on their time so great this book will provide a valuable resource for cutting the clutter and moving to the heart of the teaching process determining what skills students need to move effectively to the next level
